

128. What is the fastest growing body proportion during foetal life

a. Head

b.trunk

b. Limb

c. None of the above

128. When does the trunk grows rapidly

a. Neonate

b. Infancy

c. Childhood

d.adults

129. the circumference of the head is about

130. this increase by..... in the first 4 months then increase by about 5cm in 8months

131. How many does it increase in 1 year and what increase by age 20.

132. Factors affecting head circumference

133. What happens in the ossification of newborns .

134. In children bone synthesis is greater than bone destruction?

True/false

135. Between newborns and adults who has faster heart rate.....

136. AGE AND HEART RATE

BIRTH

1 MONTH

2-4 YEARS

10-14 YEARS

137. 23. Write on lactenogenesis

138 . The physiology of lactation

139. Milk ejection

140. Oxytocin reflex

141. Hormone imbalance,inefficient calorie intake,poor attachment or infrequent feeding,emotional stress,incorrect suckling

142. Infant reflex

143. Techniques to safety and successful breastfeeding
144. Importance of breastfeeding to the mother, family and community
145. Methods of expressing breastfeeding
146. Note the storage of expression
147. Common situations that can affect breastfeeding,
148. Research on breastfeeding and hiv, contraindications to breastfeeding, global and national policies ass with breastfeeding
149. Challenges of breast feeding in infants
150. Nurses role to breastfeeding

151. Note the 10 steps to successful breastfeeding,

152. The breast feeding position and purpose

BOTTLE FEEDING

1. WHAT IS BOTTLE FEEDING
2. IMPORTANCE OF BOTTLE FEEDING TECHNIQUES
3. PREPARING THE BOTTLE
4. COMMON BOTTLE FEEDING ISSUES
5. TRANSITIONING FROM BREAST FEEDING TO BOTTLE FEEDING
6. BURPING THE BABY
7. BOTTLE FEEDING POSITION

WEANING

5. WHAT IS WEANING

6. IMPORTANCE OF WEANING

8. TIMING OF WEANING

9. SIGNS OF DEVELOPMENT READINESS

10. INJURIES AND MANAGEMENT INTRODUCING FIRST SOLID FOODS

11. AVOIDING WEANING MISTAKES

12. MAINTAINING BREASTFEEDING
