CHRISTIAN SERVICE UNIVERSITY COLLEGE, KUMASI

FACULTY OF HEALTH AND APPLIED SCIENCES

DEPARTMENT OF NURSING & MIDWIFERY

BACHELOR OF SCIENCE IN NURSING

Semester One: End of Semester Examination, 2019/2020 Academic Year, Level 300

NURC 315: THEORETICAL FOUNDATIONS OF NURSING

November 2019

Time: 2HR 30MINS

INSTRUCTIONS TO CANDIDATES:

- This paper is in two sections, **SECTIONS A AND B**
- Answer all questions in all the sections

SECTION A: OBJECTIVE TEST
ANSWER ALL QUESTIONS

Circle the most appropriate option among the answers provide for each of the following questions

1. A good communication is an essential component of which phase of the Nursing Process?
 - A. Diagnosis
 - B. Implementation
 - C. Evaluation
 - ☒ D. Assessment
2. Questioning during the evaluation phase include:
 - A. "Has the goal been met and to what degree?"
 - B. "Is the goal still relevant?"
 - C. "Does the problem statement require modification?"
 - ☒ D. All the above
3. Breaking the whole down into parts that can be examined and subsequently followed with putting data together in a new meaningful way is a vital component of :
 - A. Planning and Outcome identification
 - B. Implementation
 - ☒ C. Diagnosis
 - D. Assessment
4. In which of the phase of the Nursing process would a nurse ask a patient if the medication she administered relieved his pain?
 - A. Assessment
 - B. Analysis
 - C. Planning
 - ☒ D. Evaluation
5. If the plan is not working and the nursing diagnosis and goals are still relevant:
 - A. The plan should be discarded and the staff should start over.
 - ☒ B. Other interventions should be identified and implemented
 - C. Staff should wait at least ten days before changing the plan of care
 - D. None of the above
6. Patient outcome should include;
 - ☒ A. Specific actions or behaviours that the patient takes to achieve the goal
 - B. Subjective and objective data clustered to identify a problem
 - C. Summary of staff accomplishment
 - D. List of hospitals policies

7. A nursing diagnosis is complete when:
- E. All of the data are compiled
 - ☒ F. The cause of the identified problem or related factors are determined
 - G. The nursing team finishes the planning meeting
 - H. The discharge plan is agreed upon

The following statements from Question 8 to 12 best describes which destructive roles among team members, select the best appropriate answer for each.

8. "He/she tries to dominate or constantly interrupt other members of the team"
- ☒ A. Autocrat
 - B. Avoider
 - C. Butterfly
 - D. Help seeker
9. "He/she uses the group as a forum for inappropriate talk about self"
- A. Autocrat
 - B. Avoider
 - C. Help seeker
 - ☒ D. Self-confessor
10. "He/she doesn't show respect to others, comments negatively about them"
- A. Avoider
 - B. Critic
 - C. Clown
 - ☒ D. Aggressor
11. "He/she always sees the negative side to any argument, but never suggests alternatives. Puts down the ideas of others".
- ☒ A. Critic
 - B. Avoider
 - C. Clown
 - D. Self-confessor
12. "He/she shows no involvement in group and engages in distracting communication".
- A. Critic
 - ☒ B. Clown
 - C. Self-confessor
 - D. Aggressor

13. Patient outcome should include;

- ☒ A. Specific actions or behaviours that the patient takes to achieve the goal
- B. Subjective and objective data clustered to identify a problem
- C. Summary of staff accomplishment
- D. List of hospitals policies

14. Which of the following would generally not be considered an intervention?

- A. Take vital signs every four hours
- B. Use open -ended questions as much as possible to encourage the patient to express his/her feelings
- C. When leaving the room, tell patient when you will return
- ☒ D. Anticipate the patient's needs and keep everything he/she uses within reach

15. Which of the following is an appropriately written nursing diagnosis?

- A. Pain related to insufficient use of medication
- B. Pain related to difficulty ambulating
- ☒ C. Anxiety related to cardiac monitor
- D. Bedpan required frequently as a result of altered elimination pattern

16. The nurse is working with a client who is being prepared for a diagnostic test this afternoon. The client tells the nurse she wants to have her hair shampooed. How would the nurse prioritize this client need?

- A. Immediate priority
- B. High priority
- C. Intermediate priority
- ☒ D. Low priority

17. Nursing interventions should be documented according to specific criteria so they are clearly understood by other members of the nursing team. The most appropriate of the following intervention statements is:

- A. Offer fluids to the client every 2 hours
- B. Observe the client's respirations
- C. Change the client's dressing daily
- ☒ D. Irrigate the nasogastric tube every 2 hours with 30 mL normal saline

18. Which of the following is classified as subjective data?

- A. Client appears sleepy
- B. No distress noted
- C. Abdomen soft and non-tender
- ☒ D. Client indicates feeling anxious and tense

19. Which of the following is an appropriate etiology for a nursing diagnosis?
- A. Incisional pain
 - ☒ B. Poor hygienic practices
 - C. Needs bedpan frequently
 - D. Inadequate prescription of medication by the physician
20. Nursing interventions should be documented according to specific criteria so they are clearly understood by other members of the nursing team. The intervention statement "Nurse will apply warm, wet soaks to the client's leg while the client is awake" lacks which of the following components?
- A. Method
 - B. Quantity
 - ☒ C. Frequency
 - D. Qualifications of the person who will perform the task
21. The nurse in charge identifies a patient's responses to actual or potential health problems during which step of the nursing process?
- A. Assessing
 - ☒ B. Diagnosing
 - C. Planning
 - D. Evaluating
22. A nurse is revising a client's care plan. During which step of the nursing process does such a revision take place?
- A. Assessment
 - B. Planning
 - C. Implementation
 - ☒ D. Evaluation
23. A female client who received general anaesthesia returns from surgery. Postoperatively, which nursing diagnosis takes highest priority for this client?
- ☒ A. Risk for aspiration R/T anaesthesia
 - B. Deficient fluid volume R/T blood and fluid loss from surgery
 - C. Impaired physical mobility R/T surgery
 - D. Acute pain R/T surgery
24. The guidelines for writing an appropriate nursing diagnosis include all of the following except:
- A. State the diagnosis in terms of a problem, not a need
 - B. Use nursing terminology to describe the patient's response
 - C. Use statements that assist in planning independent nursing interventions
 - ☒ D. Use medical terminology to describe the probable cause of the patient's response

25. A female patient is diagnosed with deep-vein thrombosis. Which nursing diagnosis should receive the highest priority at this time?
- A. Impaired gas exchange related to increased blood flow
 - B. Fluid volume excess related to peripheral vascular disease
 - ☒ C. Altered peripheral tissue perfusion related to venous congestion
 - D. Risk for injury related to oedema
26. When two nursing diagnoses appear closely related, what should the nurse do first to determine which diagnosis most accurately reflects the needs of a patient?
- ☒ A. Review the defining characteristics
 - B. Examine the related to factors
 - C. Analyze the secondary to factors
 - D. Reassess the patient
27. The nurse performs an assessment of a newly admitted patient. The nurse understands that this admission assessment is conducted primarily to:
- A. Diagnose if the patient is at risk for falls.
 - B. Ensure that the patient's skin is intact
 - ☒ C. Identify important data
 - D. Establish a therapeutic relationship
28. What type of assessment the nurse undertakes on a newly admitted patients is known as;
- ☒ A. Initial
 - B. Time -lapsed
 - C. Emergency
 - D. Focused
29. A nurse is assigned to care for a postoperative male client who has diabetes mellitus. During the assessment interview, the client reports that he's impotent and says he's concerned about the effect on his marriage. In planning this client's care, the most appropriate intervention would be to:
- A. Encourage the client to ask questions about personal sexuality
 - B. Provide time for privacy
 - ☒ C. Suggest referral to a sex counsellor or other appropriate professional
 - D. Provide support for the spouse
30. Using Maslow's hierarchy of needs, a nurse assigns the highest priority to which client need?
- A. Elimination
 - B. Security
 - ☒ C. Safety
 - D. Belonging

31. Independent nursing interventions commonly used for patients with pressure ulcers include:
- ☒ A. Changing the patient's position regularly to minimize pressure
 - B. Applying a drying agent such as an antacid to decrease moisture at the ulcer site
 - C. Debriding the ulcer to remove necrotic tissue, which can impede healing
 - D. Placing the patient in a whirlpool bath containing povidone-iodine solution as tolerated
32. Which of the following items of subjective client data would be documented in the medical record by the nurse?
- A. Client's face is pale
 - B. Cervical lymph nodes are palpable
 - C. Nursing assistant reports client refused lunch
 - ☒ D. Client feels nauseated
33. A nurse explains to a student that the nursing process is a dynamic process. Which of the following actions by the nurse best demonstrates this concept during the work shift?
- A. Nurse and client agree upon health care goals for the client
 - B. Nurse reviews the client's history on the medical record
 - C. Nurse explains to the client the purpose of each administered medication
 - ☒ D. Nurse rapidly reset priorities for client care based on a change in the client's condition
34. The client reports nausea and constipation. Which of the following would be the priority nursing action?
- A. Collect a stool sample
 - ☒ B. Complete an abdominal assessment
 - C. Administer an anti-nausea medication
 - D. Notify the physician
35. Which desired outcome written by the nurse is correctly written and measurable?
- A. Client will have a normal bowel pattern by April 2
 - ☒ B. The client will lose 2kg, within next 2 weeks
 - C. The nurse will provide skin care at least 3 times each day
 - D. The client will breathe better after resting for 10 minutes
36. The rehabilitation nurse wishes to make the following entry into a client's plan of care: "Client will re-establish a pattern of daily bowel movements without straining within two months." The nurse would write this statement under which section of the plan of care?
- A. Nursing diagnosis/problem list
 - B. Nursing orders
 - C. Short-term goals
 - ☒ D. Long-term goals

37. Which of these is a correctly stated outcome goal written by the nurse?

- ☒ A. The client will walk 2 miles daily by March 19
- B. The client will understand how to give insulin by discharge
- C. The client will regain their former state of health by April 1
- D. The client achieve desired mobility by May 7

38. While assisting a client from bed to chair, the nurse observes that the client looks pale and is beginning to perspire heavily. The nurse would then do which of the following activities as a reassessment?

- A. Help client into the chair but more quickly
- B. Document client's vital signs taken just prior to moving the client
- ☒ C. Observe client's skin colour and take another set of vital signs
- D. Help client back to bed immediately

39. The main themes included in the World Health organisation's definition of health include the following states of wellbeing except?

- ☒ A. Spiritual
- B. Physical
- C. Social
- D. Mental

40. According to this principle, the overall output of a team is greater than the sum of outputs of the individual team members.

- A. Collaboration
- B. Accountability
- ☒ C. Synergy
- D. Co-ordination

41. The multi-disciplinary team working skill that emphasise on positive norms about sharing workloads and giving team task priority over other obligations is;

- A. Mutual support
- B. Cohesion
- ☒ C. Effort
- D. Co-ordination

42. The following are classified as destructive team roles except?

- A. Help seeker
- ☒ B. Coach
- C. Critic
- D. Butterfly
