

Explanation:

Need recognition: Identifying a requirement for a product or service.

Requisitioning: Formal request for the needed items.

Sourcing: Finding and selecting a supplier.

Purchase order management: Creating and managing the purchase order document.

Contract management: Overseeing the supplier relationship and contract compliance.

7. B. Indicate any two procurement ethics

Answer: Two important procurement ethics are fairness and transparency.

Explanation:

Fairness: Treating all potential suppliers equitably and without bias.

Transparency: Ensuring all processes are open to scrutiny and well-documented.

7. C. Indicate three roles of the in charge at the health facility.

Answer: Three roles of the person in charge at a health facility related to logistics and procurement are approving requisitions, overseeing inventory management, and ensuring compliance with procurement procedures.

Explanation:

Approving requisitions: Authorizing requests for new supplies.

Overseeing inventory management: Ensuring proper stock control and storage.

Ensuring compliance: Adhering to relevant laws and regulations in procurement.
