

- c. **Singing**
  - d. Hand gestures
61. For communication to be effective, the following is applicable except
- a. Avoid use of jargons
  - b. know audience's/client's background
  - c. **Speak like a professional to show your skills**
  - d. Use gestures and expressions that animate the scene
62. Qualities of a good advocate include all except
- a. Able to bring people together in coalitions and network
  - b. Accessible to the people whose life he/she is trying to affect
  - c. **Must have completed a course in psychology**
  - d. Have tolerance and perseverance in the face of problems
63. A process of getting a job done or accomplishing an organiza-tional goal is
- a. Delegation
  - b. Leadership
  - c. **Management**
  - d. Problem solving
64. Communication model include the following except
- a. Encoding
  - b. Decoding
  - c. **Procoding**
  - d. Channel
65. The statement of financial resources set aside for specific activities in a given period of time is
- a. Project
  - b. Program
  - c. Plan
  - d. **Budget**
66. Statements specifying actions that must be taken in a given situa-tion is called
- a. Programmes
  - b. **Rules**
  - c. Policy
  - d. Project
67. The process of inspiring, encouraging and arousing the interest of the people to make them actively involved in finding solution to their health problems is called
- a. Advocacy
  - b. Motivation

- c. **Mobilization**
  - d. Participation
68. A broad statement by which the organization specifies how it will achieve its goals is
- a. Vision statement
  - b. **Mission statement**
  - c. Policy statement
  - d. Protocol
69. In material management, the period in days that elapses between placing an order and receiving the stores is termed as
- a. **Lead time**
  - b. Economic order quantity
  - c. Quantity survey
  - d. Recorder time
70. Hygiene factors and motivational factors are key concepts in
- a. Maslow's hierarchy of needs
  - b. Expectancy theory
  - c. Goal setting theory
  - d. **Herzberg's theory**
71. Which of the following characteristics is not related to laissez-faire leadership?
- a. Very little guidance from leaders
  - b. Complete freedom for followers to make decisions
  - c. Leaders provide the tools and resources needed
  - d. **There is little time for group decision making**
72. Which type of leadership theories consider 'people inherit certain qualities that make them better suited to leadership'?
- a. Contingency theories
  - b. Behavioural theories
  - c. **Trait theories**
  - d. Situation theories
73. Scientific management theory was developed by
- a. Max Weber
  - b. **Frederick Taylor**
  - c. Adam Smith
  - d. Rensis Likert
74. Theory X and theory Y of management was proposed by
- a. William Ouchi
  - b. Frederick Taylor
  - c. Mary Follett

**d. Douglas McGregor**

75. The extent of resemblance between the purpose of healthcare and the truly granted care is referred to as
- a. Standard
  - b. Audit
  - c. Quality**
  - d. Outcome
76. The time taken for any project is estimated by
- a. Work sampling
  - b. Input-output analysis
  - c. Network analysis**
  - d. System analysis
77. Finding the most cost effective way of doing a project is
- a. Network analysis
  - b. System analysis
  - c. Cost analysis**
  - d. Field analysis
78. Theory of bureaucracy in management was proposed by
- a. Gantt
  - b. Max Weber**
  - c. Henry Fayol
  - d. Peter Ducker
79. Human relations theory is concerned with
- a. Increase productivity
  - b. Interpersonal relationship**
  - c. Discipline of workers
  - d. Organizational growth.
80. The relationship between management function is
- a. Interrelated**
  - b. Complementary
  - c. Supplementary
  - d. Interdependent
81. The accountability of health personnel for the quality of care pro-vided is
- a. Standard of care
  - b. Criterion for care**
  - c. Quality assurance
  - d. Credentials
82. Two basic elements used in standard development are

- a. Applied and basic
  - b. Effective and efficiency**
  - c. Primary and secondary
  - d. Criteria and norms
83. The purpose of quality assurance programme is to
- a. Control the planning aspect of the program while ignoring the execution
  - b. Measure quality in an elaborate item
  - c. Identify malpractices and document them
  - d. Continue corrective actions to ensure improvement**
84. Under total quality management (TQM)/continuous quality improvement (CQI), quality is defined as
- a. Customer satisfaction**
  - b. Workers efficiency
  - c. Successful outcome
  - d. Job satisfaction
85. Which of the following is considered to be the foundation for the performance of a manager's job?
- a. Planning**
  - b. Budgeting
  - c. Controlling
  - d. Organising
86. In management, the biblical quote of Luke 14:28 (which states "for which of you, intending to build a tower sitteth not down first and counteth the cost, whether he has sufficient to finish it") is used to illustrate which managerial functions
- a. Planning**
  - b. Budgeting
  - c. Estimating
  - d. Strategizing
87. Which of the following is not an element of planning?
- a. Objectives
  - b. Procedures
  - c. Staffing**
  - d. Rules
88. Organisations are formed for the following reasons except
- a. To meet objectives that can best be met collectively.
  - b. To overcome individual limitations
  - c. To actualize individual objectives**
  - d. For material reasons.

89. In management, the principle that says “there should be one head and one plan for a group of activities is
- a. The scalar chain
  - b. Unity of direction**
  - c. Unity of command
  - d. Espirit de corps
90. Which principle states that authority and responsibility should flow in a continuous line from the highest to the lowest?
- a. The scalar chain**
  - b. Unity of direction
  - c. Unity of command
  - d. Espirit de corps
91. Learning is represented by
- a. A change in behaviour**
  - b. The ability to read and write
  - c. Change in motivation
  - d. Change in cognitive structure
92. The following are aspects of cognitive domain of learning except
- a. Feeling**
  - b. Synthesis
  - c. Comprehending
  - d. Analysis
93. There should be one central point which exercises overall directional control of all the parts. This is Fayol’s organizational theory of
- a. Unity of direction
  - b. Scalar chain
  - c. Centralisation**
  - d. Subordination of individual interest.
94. Limitations in applying the Japanese techniques to nursing setting include all except
- a. Focus on productivity
  - b. Low retention rates
  - c. Individual decision making**
  - d. None of the above
95. The study of leadership style focuses around two theoretical approaches are the **Trait theory** and **Situational theory**.
96. In doing their work, managers as people carry out specific functions called **Management**

functions which are different from what non managers do which is known as Operating Function.

97. The acronym **PODSCCoRB** in management stands for

- i. **P – Planning**
- ii. **O – Organizing**
- iii. **D – Directing**
- iv. **S – Staffing**
- v. **C – Controlling**
- vi. **Co – Coordinating**
- vii. **R – Reporting**
- viii. **B – Budgeting**

98. **Counselling** is person to person interactions in which the provider gives adequate information which will enable a client make an informed decision.

99. The strategic planning process involves assessing the internal and external environment of an organization. One method for doing this is known as the **SWOT** analysis. The SWOT stands for

- i. **S – Strength**
- ii. **W – Weakness**
- iii. **O – Opportunities**
- iv. **T – Threats**

100. Theory Z of management comprises three major characterization are Trust, Subtlety and Intimacy.

## **NURSING RESEARCH**

1. Research process must be systematic in order to

- a. **Achieve orderliness**
- b. Be free from personal bias
- c. Be free from subjective judgment
- d. Make it measurable

2. The major reason for nursing research is

- a. Improve the image of nursing profession

- b. Improve the quality of client care**
  - c. Add to body of knowledge unique to nursing
  - d. Assist the doctors and other members of health care team.
- 3. The most estimate of the variability of scores in statistics is
  - a. Mean
  - b. Mode
  - c. Standard deviation**
  - d. Frequency
- 4. When the researcher states the benefit one will drive from the study, he is therefore talking about
  - a. The purpose of the study
  - b. Objective of the study
  - c. Significance of the study**
  - d. Scope of the study.
- 5. That which is said to have ignited a researcher to choose a particular interest of study is termed
  - a. Background
  - b. Statement of the problem**
  - c. Scope of the study
  - d. Purpose of the study
- 6. Which of the following types of research could show how community expectations can result in the actual provision of services?
  - a. Basic research
  - b. Operational research**
  - c. Action research
  - d. Applied research
- 7. The following are possible sources of data except
  - a. Experience**
  - b. Census
  - c. Survey
  - d. Research
- 8. Research can be said to have the following characteristics except
  - a. Objectivity
  - b. Generalizability
  - c. Accuracy**
  - d. Revocability

**Situation:** Kelvin is a member of the nursing research council of a hospital. His first assignment is to determine the level of patient satisfaction on the care they received from the hospital. He

plans to include all adult patients admitted from April to May with average length of stay of 34 days, first admission, and with no complications. Use this situation to answer the next 10 questions.

9. Which of the following is an extraneous variable of the study
  - a. Date of admission
  - b. Length of stay**
  - c. Age of patients
  - d. Absence of complications.
10. He thinks of an appropriate theoretical framework.Whose theory addresses the four modes of adaptation?
  - a. Martha Rogers
  - b. Sr.Callista Roy**
  - c. Florence Nightingale
  - d. Jean Watson
11. He opts to use a self report method;which of the following is not true about this method?
  - a. Most direct means of gathering information
  - b. Versatile in terms of content coverage**
  - c. Most accurate and valid method of data gathering
  - d. Yields information that would be difficult to gather by another method
12. Which of the following articles would Kelvin least consider for his review of literature?
  - a. Story telling and anxiety Reduction among pediatric patients
  - b. Turn around time in emergency rooms
  - c. Outcome standards in tertiary health care institution**
  - d. Environmental manipulation and client outcomes.
13. Which of the following variables will he likely exclude in his study?
  - a. Competence of nurses**
  - b. Caring attitudes of nurses
  - c. Salary of nurses
  - d. Responsiveness of staff
14. He plans to use a likert scale in his study. The scale will enable him to determine
  - a. Degree of agreement and disagreement**
  - b. Compliance to treatment
  - c. Level of satisfaction
  - d. Degree of acceptance
15. He checks if his instrument meets the criteria for evaluation.Which of the following criteria refers to the consistency or the ability to yield the same response upon its repeated administration?

- a. Validity
  - b. Reliability**
  - c. Sensitivity
  - d. Objectivity
16. Which criteria refer to the ability of the instrument to detect fine differences among the subjects being studied?
- a. Sensitivity**
  - b. Reliability
  - c. Validity
  - d. Objectivity
17. Which of the following terms refer to the degree to which an instrument measures what it is supposed to measure?
- a. Validity**
  - b. Reliability
  - c. Meaningfulness
  - d. Sensitivity
18. He plans for his sampling method. Which sampling method gives equal chance to all units in the population to get picked
- a. Random**
  - b. Accidental
  - c. Quota
  - d. Judgment
19. Deductive reasoning is applied in
- a. Qualitative research
  - b. Quantitative research**
  - c. Action research
  - d. Applied research
20. The major goal of nursing research is to
- a. Extend nursing knowledge
  - b. Provide literatures for nurses
  - c. Improve client care**
  - d. Enhance nurse's scientific knowledge base.
21. Nurse Cammy was carrying out a study on the effect of alcohol on blood pressure. She decided to use sphygmomanometer to measure the blood pressure of the subjects. She checks whether the sphygmomanometer is accurately calibrated to ensure
- a. Reliability of the result**
  - b. Validity of the result
  - c. Sensitivity of the instrument

- d. Standard error is maintained.
- 22. The tool used for collection of data in research include the follow-ing except
  - a. Questionnaire
  - b. Interview
  - c. Discussion**
  - d. Observation
- 23. Analysis of variance (ANOVA) is used to
  - a. Test the difference between two independent group means
  - b. Test the difference between related group means
  - c. Test the difference among the mean of 3+ independent group**
  - d. The difference between rank of score of 3+ independence group
- 24. The F statistics is calculated in
  - a. ANOVA**
  - b. T-test
  - c. Correlation analysis
  - d. Chi-Square test
- 25. Chi-square test is used to test
  - a. Difference in proportions**
  - b. Difference in means of two independent variables
  - c. Relationship between two bivariate variables
  - d. Difference in means of three or more set of variables.
- 26. Randomization is useful to eliminate
  - a. Observer bias
  - b. Confounding factors**
  - c. Parent bias
  - d. Sampling bias
- 27. Weight in Kg is
  - a. Nominal variable
  - b. Discrete variable
  - c. Confounding variable
  - d. Continuous variable**
- 28. A hypothesis which a researcher tries to disprove is
  - a. Research hypothesis
  - b. Null hypothesis**
  - c. Alternate hypothesis
  - d. Positive hypothesis
- 29. A table that shows how often different scores appearing in a set of scores is called
  - a. Polygon
