- 314. Inferior Vena Cava
- 315. Right lobe of liver

FOUNDATION OF NURSING

1. If the required volume of infusion to be administered in 8 hours is 1000ml and the drip factor is 20drops/mL. How many drops will be allowed in a minute?
 - a. **42 drops/min**
 - b. 36 drops/min
 - c. 28drops/min
 - d. 43 drops/min
2. Retirement from a career and departure of grown children from the home could be regarded as
 - a. Perceived loss
 - b. Situational loss
 - c. **Developmental loss**
 - d. Psychological loss
3. Second of inflammatory process is marked by
 - a. Leukocyte aggregation at the injury site
 - b. **Production of inflammatory exudates**
 - c. Vascular permeability leading to hyperemia
 - d. Leukocytosis
4. During physical examination of abdomen, which of the following is in the right order?
 - a. Inspection-palpation-percussion-auscultation
 - b. Inspection-percussion-auscultation-palpation
 - c. Inspection-auscultation-palpation-percussion
 - d. **Inspection-auscultation-percussion-palpation**
5. Which of the following classes of food is required for the repair of worn out tissues?
 - a. Roughages
 - b. Carbohydrate
 - c. Fat
 - d. **Protein**
6. Development is the result of
 - a. Good nutrition and heredity
 - b. Learning and motivation
 - c. **Heredity and environment**
 - d. Maturation and phenotype

7. According to Erickson, the central problem of the adolescence establishing a sense of
 - a. **Identity**
 - b. Intimacy
 - c. Industry
 - d. Initiative
8. The best index for assessing child growth & development is
 - a. Height
 - b. Width
 - c. **Weight**
 - d. Length
9. Sigmund Freud described _____ stages of development
 - a. Four
 - b. Eight
 - c. **Five**
 - d. Six
10. The most widely known cognitive theorist is
 - a. Sigmund Freud
 - b. Erik Erickson
 - c. **Jean Piaget**
 - d. Roger Gould
11. Which of the following may be regarded as a subjective data?
 - a. **Patient pain report**
 - b. Blood pressure reading
 - c. Discoloration of skin
 - d. Yellowness of the eye

Situation: Match the theorists in column A with related developme stages in column B.

Column A	Column B	Answers
12. Maslow	a. Cephalo-caudal	C
13. Piaget	b. Intimacy vs Isolation	F
14. Ericsson	c. Self actualization	B
15. Freud	d. Classical condition	E
	e. Anal phase	
	f. Pre-operational	

16. The most common system of measurement used by Nigerian nurses is the metric system. Which of the following is not a basic unit of measurement in metric system?
 - a. Mcg
 - b. mL

- c. **lb**
 - d. Kg
17. In describing the models of health and wellness, the narrowest interpretation of health occurs in
- a. Role performance model
 - b. Adaptive model
 - c. **Clinical model**
 - d. Eudemonistic model
18. Health is defined as creative process in
- a. Role performance model
 - b. **Adaptive model**
 - c. Clinical model
 - d. Eudemonistic model
19. The opposite of health in clinical model is
- a. Death
 - b. Inability to perform ones work
 - c. Failure in adaptation
 - d. **Injury**
20. Which procedure provides information regarding the physiology of an organ?
- a. X-ray
 - b. Computerized Tomography
 - c. Magnetic resonance Imaging
 - d. **Nuclear scan**
21. The client has a urinary health problem. Which of the following procedures is performed using indirect visualization
- a. Intravenousy
 - b. **X-ray of Kidney,Ureter & Bladder**
 - c. Retrograde Pyelography
 - d. Cystocopy
22. The following are directly related to visualization of Gastro-intesti nal tract except
- a. Anoscopy
 - b. **Cystoscopy**
 - c. Proctoscopy
 - d. Colonoscopy.
23. A nurse while reading the physician's plan of action saw proctos. copy.The nurse understands proctoscopy as
- a. **Viewing rectum**
 - b. Viewing of the prostate gland

- c. Viewing of the bladder
 - d. Viewing of the pelvic organs.
24. Which of the following is an invasive procedure?
- a. Computerized axial tomography
 - b. Magnetic resonance Imaging
 - c. Echocardiography
 - d. **Angiography**
25. The following are true about pain except
- a. Pain is a warning signal
 - b. Pain is primarily protective in nature
 - c. **Pain is indication of systemic involvement**
 - d. Pain is usually evoked by an external or internal noxious stimulus.
26. In assessing collateral circulation; the test used to assess the patency of the radial and ulnar arteries is the
- a. **Allen's test**
 - b. Homan's sign
 - c. Trendelenberg's test
 - d. Weber's test.
27. The nurse is assessing a wound and observes new tissue growing onto the wound from surrounding tissue. The nurse understands that this situation is called
- a. Angiogenesis
 - b. **Granulation**
 - c. Crepitation
 - d. Wound contraction.
28. A nursing student performed urinalysis during a practical examination and got the pH of the urine as 3.2. A fellow student was asked to interpret the result. The best answer should be that
- a. The pH of the urine is normal
 - b. The urine is highly concentrated
 - c. **The urine is acidic**
 - d. The pH is alkaline
29. A homeostatic imbalance:
- a. Must be restored by negative feedback
 - b. **Is considered the cause of most diseases**
 - c. Is when the internal conditions of the body become more stable
 - d. Only when positive feedback mechanisms are overwhelmed
30. Which of the following is not a characteristic of life?
- a. Growth

- b. Responsiveness
 - c. Reproduction
 - d. Reformation**
31. A law voted on by a legislative body of government is called
- a. Administrative
 - b. Common law
 - c. Constitutional law
 - d. Statutory law.**
32. When a judge interprets a law and issues a decision, this is called
- a. Administrative law
 - b. Common law**
 - c. Statutory law
 - d. Constitutional law.
33. Sometimes, a doctor or a nurse may unintentionally harm a patient. This is called
- a. Libel
 - b. Malpractice**
 - c. Misdemeanor
 - d. Non maleficence
34. There are several types of law, and the practice of nursing is governed by
- a. Civil law**
 - b. Administrative law
 - c. Common law
 - d. Public law.
35. The patients' Bill of Rights was published by the
- a. American Hospital Association**
 - b. American Nurses Association
 - c. Joint Committee of Hospitals
 - d. Occupational Safety and Health act
36. A nurse gives legal testimony that is taken and recorded outside the courtroom. This is called
- a. Certified testimony
 - b. Contract
 - c. Deposition**
 - d. Tort.
37. A nurse alters a hospital record because she knows an error has been committed. Her action may be classified as
- a. Fraud**
 - b. Libel

- c. Malpractice
 - d. Slander.
38. An appropriate reason for the loss of a nursing license is
- a. Bankruptcy
 - b. Decline in health
 - c. **Theft**
 - d. Therapeutic abortion.
39. A nurse caring for a two year old patient leaves the bedside with-out raising the side rails and the patient falls to the floor. What type of legal action could be used in a lawsuit?
- a. Battery
 - b. Felony
 - c. **Negligence**
 - d. Slander
40. A nurse who gives a patient injection without obtaining consent from the client would be committing
- a. Assault
 - b. Invasion of privacy
 - c. Defamation
 - d. **Battery**
41. Although the client refused the procedure, the nurse insisted and inserted a nasogastric tube in the right nostril. The administrator of the hospital decides to settle the lawsuit because the nurse is most likely to be found guilty of which of the following?
- a. An unintentional tort
 - b. Assault
 - c. **Invasion of privacy**
 - d. Battery
42. Writing in the nurses notes that a physician is incompetent because he didn't respond immediately to a call is an example of
- a. Slander
 - b. Assault
 - c. Felony
 - d. **Libel**
43. A primary care provider prescribes 100mg of tramadol, but the nurse accidentally administers 250mg. After notifying the primary care provider, the nurse monitors the client carefully for untoward effects of which there are none. Is the client likely to be successful in suing the nurse for malpractice?
- a. **No the client was not harmed**
 - b. No the nurse notified the physician
