

SELECT THE MOST APPROPRIATE OPTION

71. A research question should have the following characteristics EXCEPT :

- a. Not be interrogative and usually stated in the present
- b. Must contain one or more variables
- c. Should be clear and specific
- d. Should be measurable

SELECT THE MOST APPROPRIATE OPTION

72. Geriatric syndrome include all EXCEPT :

- a. Abdominal distension
- b. Impaired mobility
- c. Risk for infection
- d. Risk for lost of skin integrity

SELECT THE MOST APPROPRIATE OPTION

73. The bony labyrinth is found in :

- a. Auricle
- b. Middle ear
- c. Outer ear
- d. Inner ear

SELECT THE MOST APPROPRIATE OPTION

74. The part of ear that functions in both hearing and balance is :

- a. Auricle
- b. Middle ear
- c. Outer ear
- d. Inner ear

SELECT THE MOST APPROPRIATE OPTION

75. Which of the following nerves innervate the diaphragm :

- a. Radial nerve
- b. Phrenic nerve
- c. Vagus nerve
- d. Median nerve

SELECT THE MOST APPROPRIATE OPTION

76. The fluid between the parietal and visceral pericardial :

- a. Lubricate the heart as it beats
- b. Relaxes the heart as it beats
- c. Nourishes the heart as it beats
- d. contracts the heart as it beats

SELECT THE MOST APPROPRIATE OPTION

77. The valve that separate the atria and the ventricles are called :

- a. Interventricular valves
- b. Interatrial valves
- c. Atrioventricular valves
- d. Semilunar valves

SELECT THE MOST APPROPRIATE OPTION

78. Antidiuretic hormone (ADH)

- a. Increases water reabsorption
- b. Increases sodium reabsorption
- c. Increases water and sodium reabsorption
- d. Decreases water reabsorption

SELECT THE MOST APPROPRIATE OPTION

79. The part of the neurone that transmits electrical signal to a target cells is :

- a. Soma
- b. Dendrite
- c. Cell body
- d. Axon

SELECT THE MOST APPROPRIATE OPTION

80. Which cell produces the pigment that contribute to hair colour:

- a. Keratinocytes
- b. Melanocytes
- c. Langerhans cells
- d. Merkel cell
