

The nurse is using the image below to educate a couple diagnosed with infertility on the importance of ovulation. Study the image carefully and answer questions 31-35.

31. Which number in the diagram corresponds to ovulation?

- A. 1
- B. 2
- C. 3

Ans.....

32. Ovulation occurs at which period in a regular menstrual cycle?

- A. Day 1-7
- B. Day 7-14
- C. Day 14

Ans.....

33. The signs of ovulation include which of the following?

- A. Heavy bleeding per vagina
- B. Increase in core body temperature
- C. Thickening of cervical secretions

Ans.....

34. In order to evaluate the woman's ability to ovulate, blood sample is taken to check the level of which hormone?

- A. Follicular Stimulating Hormone (FSH)
- B. Oxytocin
- C. Thyroxine

Ans.....

35. Which of the following medication is given to promote ovulation in a woman?

- A. Calcium supplements
- B. Folic acids
- C. Oral contraceptive pills

Ans.....

36. Effects of oestrogen include which of the following?

- A. Breast milk production
- B. Proliferation endometrium
- C. Both A and B

Ans.....

37. Sperms are produced in theand stored in the.....

- A. Epididymis, testis
- B. Testis, epididymis
- C. Vas deferens, seminal vesicles

Ans.....

38. There areerectile tissues in the penis

- A. 2
- B. 3
- C. 4

Ans.....

39. Which layer of the endometrium is shed off during menstruation?

- A. Basal layer
- B. Functional layer
- C. Both A and B

Ans.....

40. The muscular layer of the uterus is referred to as.....

- A. endometrium
- B. myometrium
- C. perimetrium

Ans.....

41. The two reproductive hormones, FSH and LH are produced by which endocrine gland?

- A. Anterior pituitary
- B. Ovary
- C. Posterior pituitary

Ans.....

42. Which of the following endocrine glands is referred to as the master gland?

- A. Hypothalamus
- B. Parathyroid gland
- C. Pituitary gland

Ans.....

43. The appropriate stimulus for secretion of prolactin includes which of the following?

- A. Breast feeding
- B. Hypoglycaemia
- C. Hypotension

Ans.....

44. The adrenal cortex secretes which of the following hormones?

- A. Adrenaline
- B. Cortisol
- C. Noradrenaline

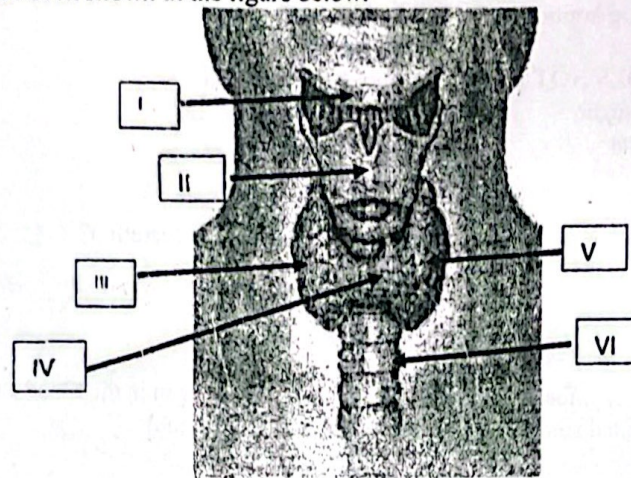

Ans.....

45. Which cells in the pancreas produce insulin?

- A. Alpha cells
- B. Beta cells
- C. Delta cells

Ans.....

Mrs Y, a 40 yr old teacher, has been admitted into the surgical ward with toxic goitre. An ultrasound of the relevant structures has been shown in the figure below.

Use the image above to answer questions 46-50

46. What endocrine gland is shown in the figure?

- A. Parathyroid gland
- B. Pituitary gland
- C. Thyroid gland

Ans.....

47. Posterior relation (s) of the endocrine gland in question (46) include?

- A. I- Hyoid bone
- B. II- larynx
- C. VI- trachea

Ans.....

48. Hormones produced by the endocrine gland in the figure include which of the following?

- A. Thyroid Stimulating Hormone (TSH)
- B. Thyroid Releasing Hormone (TRH)
- C. Thyroxine

Ans.....

49. Overactivity of the endocrine gland in question (46) will lead to which of the following signs?

- A. bradycardia
- B. hypothermia
- C. tachycardia

Ans.....

50. The surgeon decides to remove the part labelled 'IV'. What would be the appropriate name of the procedure?

- A. Isthmusectomy
- B. Lobectomy
- C. Both A and B

Ans.....

51. Gigantism occurs due to hypersecretion of which of the following hormones?

- A. Gonadotrophins
- B. Growth hormone
- C. Thyroid stimulating hormone

Ans.....

52. Effects of insulin **DOES NOT** include which of the following?

- A. Increasing blood sugar
- B. Reduce blood sugar
- C. Storage of fats

Ans.....

53. Which of the following is an appropriate stimulus for adrenaline secretion?

- A. Lactation
- B. Sleep
- C. Stress

Ans.....

54. In afeedback system, high levels of oestrogen in the blood causes a reduction in production of the original stimulus (Follicular Stimulating Hormone)

- A. hormonal
- B. negative
- C. positive

Ans.....

55. Effects of oxytocin in the body **DOES NOT** include?

- A. Contraction of the uterus
- B. Development of breast
- C. Release of breast milk

Ans.....

56. The central Nervous system is made up of theand the

- A. Brain and spinal cord
- B. Cranial and spinal nerves
- C. Meninges

Ans.....

57. Which part of the brain contains the respiratory and cardiovascular centres?

- A. Cerebrum
- B. Cerebellum
- C. Medulla Oblongata

Ans.....

58. The correct arrangement of the coverings of the brain from outward to inward is.....

- A. arachnoid mater, dura mater, pia mater
- B. dura mater, arachnoid mater, pia mater
- C. pia mater, arachnoid mater, dura mater

Ans.....

59. There arepairs of cranial nerves

- A. 10
- B. 11
- C. 12

Ans.....

60. A tumour in frontal lobe of the cerebrum is likely to impair patient's.....

- A. ability to feel pain in the extremities
- B. ability to move the extremities
- C. both motor and sensory functions in the extremities

Ans.....

ANATOMY AND PHYSIOLOGY II
SECTION B: ESSAY-TYPE QUESTIONS
TIME ALLOWED: 1HR

Answer all questions in this section

1. a. Draw a well-labelled diagram of the longitudinal section of the uterus **10 marks**
- b. Briefly explain the menstrual cycle (diagram not needed) **7 marks**
- c. mention 3 functions of the uterus **3 marks**

TOTAL = 20MARKS

2. a. Define digestion and list the organs that make up the upper GIT **6marks**
- b. Copy and complete the table below in relation to digestive juices **8marks**

Juice	Exocrine gland	pH	Enzyme	Function
Saliva	i.....	>7	ii.....	Carbohydrate digestion
iii.....	Gall bladder	iv..... ...	none	Emulsification of fats
Gastric juice	v.....	<7	vi.....	Protein digestion
Pancreatic juice	Pancreas	>7	vii.....	viii.....

- c. Define absorption and state how all food nutrients are absorbed in the intestines **6 marks**

TOTAL= 20MARKS
