4. You observe another nurse crushing her client's pills and mixing them with food that is going to be fed to her client by a nursing student. What should you do?
- A. Discuss with the nurse that she needs to observe her clients taking their medications
 - B. Nothing; this is routine practice for clients who have difficulty swallowing pills
 - C. Congratulate the nurse on being creative in medication administration
 - D. Discuss with the student that she should be signing for the medication given
5. What is the term that means a nurse will speak out or take action on behalf of her client and family?
- A. Advocate
 - B. Beneficence
 - C. Compassion
 - D. Competence
6. What should you do if you eavesdrop on another nurse planning to "go for a drink" with a client who is about to be discharged?
- A. Encourage interaction with the client after discharge
 - B. Report the conversation to the nurse manager
 - C. Discuss the overheard conversation directly with the nurse
 - D. Tell the client that he should not meet the nurse socially

7. Which medical ethical principle states that a nurse must not harm a client through carelessness, malice, vengeance, dislike or even through treatments intended to help the client?
- A. Beneficence
 - B. Compassion
 - C. Non-maleficence
 - D. Justice
8. What is the field of ethics that is concerned with the moral issues raised by developments in biological sciences?
- A. Code of ethic
 - B. Bioethics
 - C. Deontology
 - D. Medical ethics
9. A nurse is assigned to work in an Operating Room (OR) where therapeutic abortions are performed. The nurse believes that she cannot participate in these procedures because it is against her religious beliefs. What should she do after she notifies the operating room supervisor?
- A. Complete a work refusal form and leave the surgical suite immediately
 - B. Continue working in the OR because it is where she was assigned
 - C. Contact the local "right to life" association and inform them of the procedures
 - D. Remain in the operating room until another nurse arrives

10. If a nurse says the following statement; "if you don't stop playing with your IV, I will tie your hand to the side rail" she is exhibiting:

- A. An intervention that should be done before the client plays with the IV again
- B. Excellent role modeling for other staff nurses
- C. Behavior that is within the definition of assault
- D. Good insight in identifying a risk and taking appropriate action

11. What term means being functionally proficient in performing tasks with the requisite knowledge, skill, attitudes and values?

- A. Beneficence
- B. Capable
- C. Competence
- D. Rational

12. What should you do first if you observe another nurse charting vital signs that she did not actually take on her clients?

- A. Nothing, it is not your job to report this behavior
- B. Notify the union steward
- C. Discuss the observation with the nurse
- D. Obtain the client's vital signs for the nurse

13. If a client asks the nurse about his recent laboratory results, what is the most appropriate response?

- A. Let me go and get your chart. I will give you the results in a few minutes
- B. Let me call the doctor so she can review the results with you
- C. I can't tell you the results, but I would not worry if I were you
- D. Don't worry about the results, if there were anything wrong the doctor would have told you

14. What term means that the nurse has an understanding and concern for her client's distress?

- A. Compassion
- B. Beneficence
- C. Empathy
- D. Feelings

15. A client continually complains of pain after the administration of oral analgesic. The Doctor writes an order for the nurse to administer a placebo to the client the next time he complains of pain. The doctor says tell the client "it is a stronger analgesic" what should the nurse do?

- A. Consult with the pharmacist to discuss dosing of the placebo
- B. Give the placebo as ordered but do not tell the client it is a strong medicine
- C. Refuse to administer the placebo to the client
- D. Give the placebo as ordered by the doctor

16. A nurse is working in the post anaesthesia care unit when a client's airway becomes obstructed. The anaesthetist is not immediately available, so the nurse re-intubates the client with an endotracheal tube and causes trauma to the vocal cord. The nurse is at risk of being accused of:
- A. Negligence
 - B. Assault
 - C. Malpractice
 - D. Taking initiative
17. A nurse is working at a community clinic. She reviews a client consent form and asks the client how much her annual income is. This nurse would be:
- A. Requesting appropriate data
 - B. Collecting objective data
 - C. Invading the client's privacy
 - D. Collecting information
18. Which is the most appropriate response if a patient hands you a box of chocolate after being discharged?
- A. Thank you, I will enjoy these with my husband when I get home
 - B. I prefer flowers to chocolate, because I am on diet
 - C. Thank you, I will take it to the staff lounge for all to enjoy
 - D. I cannot accept gifts from patients

19. Which principle of ethics refers to fairness in respect to access to quality health care services?

- A. Justice
- B. Beneficence
- C. Utilitarianism
- D. Autonomy

20. A police officer arrives on the surgical unit requesting a copy of the results of a blood alcohol level drawn from a client while he was in the emergency department. What is the most appropriate response by the nurse?

- A. That information can only be released with a warrant
- B. Certainly, here is a copy of the blood alcohol levels.
- C. I can't give you a copy, but I can tell you the result.
- D. The results are not back, but I will send you a copy as soon as they are

21. What is the study of morality, a careful and systematic reflection on moral decisions and behavior?

- A. Deontology
- B. Bioethics
- C. Medical ethics
- D. Ethics
