

INDEX NUMBER.....DATE.....

METHODIST UNIVERSITY COLLEGE GHANA

FACULTY OF SCIENCE.

DEPARTMENT OF NURSING & APPLIED SCIENCE

(DANSOMAN & TEMA COMPUS)

END OF FIRST SEMESTER EXAMINATION, 2024/2025

B.S.c PUBLIC HEALTH NURSING

COURSE CODE: MNUR 207

COURSE TITLE: NURSING THEORIES

TIME: 2 Hours

INSTRUCTIONS:

1. DO NOT OPEN THE BOOKLET UNTIL YOU ARE TOLD TO DO SO
2. READ THE QUESTIONS CAREFULLY AND PROVIDE ONLY RELEVANT ANSWERS
3. WRITE CLEARLY IN THE SPACES PROVIDED OR CIRCLE APPROPRIATELY USING A BLUE PEN
4. STOP WRITING AS SOON AS YOU ARE INSTRUCTED TO DO SO
5. REMAIN IN YOUR SEAT UNTIL THE PAPERS ARE COLLECTED

1. These are steps in theory development, EXCEPT:
 - A. Analysis and implementation
 - B. Conduct Literature Review
 - C. Develop Conceptual Framework
 - D. Identify a Phenomenon
2. 'Create a visual representation of the relationships between concepts' describes this step.
 - A. Analysis and implementation
 - B. Conduct Literature Review
 - C. Develop Conceptual Framework
 - D. Identify a Phenomenon
3. This is NOT a type of theory.
 - A. Administrative theories
 - B. Descriptive theories
 - C. Middle-Range theories
 - D. Practice theories
4. This type of theory is specific and testable.
 - A. Administrative theories
 - B. Descriptive theories
 - C. Middle-Range theories
 - D. Practice theories
5. This is one of the challenges of theory development.
 - A. Application in Diverse Settings
 - B. Global Collaboration
 - C. Integration with Technology
 - D. Limited Collaboration
6. are a representation of reality or organizing a complex phenomenon.
 - A. Concepts
 - B. Frameworks
 - C. Models
 - D. Paradigms
7. Which of these theorists proposes that successful nurse-patient relationship goes through orientation, working and termination?
 - A. Parse's theory
 - B. Peplau's theory
 - C. Roger's theory
 - D. Roy's adaptation model
8. focuses on the individual's ability to adapt to changes in their environments, Health, and life circumstances.
 - A. Parse's theory
 - B. Peplau's theory

- C. Roger's theory
 - D. Roy's adaptation model
9. views individuals as open system in a state of constant interaction with environmental stressors, striving for systemic stability
- A. Betty Neumann's systems theory
 - B. Roper-Logan-Tierney's model
 - C. Sister Callister's model
 - D. Virginia Henderson's theory
10. The Needs Theory was proposed by.....
- A. Betty Neumann
 - B. Roper-Logan-Tierney
 - C. Sister Callister
 - D. Virginia Henderson
11. Facilities, equipment and technology of health care systems, are examples of
- A. Healthcare financing
 - B. Healthcare infrastructure
 - C. Healthcare policy and regulation
 - D. Healthcare providers
12. Insurance, government programs, etc. are examples of.....
- A. Healthcare financing
 - B. Healthcare infrastructure
 - C. Healthcare policy and regulation
 - D. Healthcare providers
13. The goals of healthcare systems include all, EXCEPT:
- A. Controlling healthcare costs
 - B. Enhancing patient experiences and outcomes
 - C. Improving population health
 - D. Provide medical and supportive care
14. This is the responsibility of the healthcare team.
- A. Controlling healthcare costs
 - B. Enhancing patient experiences and outcomes
 - C. Improving population health
 - D. Provide medical and supportive care
15. Implementation of nursing care includes.....
- A. Analysis
 - B. Care planning
 - C. Documentation
 - D. Setting priorities
16. The individual has the right to make decisions and take control of their own care. This statement explains.....

- A. Autonomy
 - B. Dignity
 - C. Subjectivity
 - D. Uniqueness
17. The individual's experiences, perceptions, and feelings are acknowledged and respected. This refers to
- A. Autonomy
 - B. Dignity
 - C. Subjectivity
 - D. Uniqueness
18. These are characteristics of theory, EXCEPT:
- A. They are bases for hypotheses
 - B. They are logical
 - C. They are not generalizable
 - D. They are used by practitioners to improve and guide their practice
19. This type of theory is a descriptive nursing theory.
- A. Factor-isolating theory
 - B. Factor-relating theory
 - C. Situation-producing theory
 - D. Situation-relating theory
20. This theory is a predictive theory.
- A. Factor-isolating theory
 - B. Factor-relating theory
 - C. Situation-producing theory
 - D. Situation-relating theory

Provide a True/False answer to questions 21 – 30

- 21. Theory guides research and investigation.....
- 22. Theory deprives critical thinking and analytical skills.....
- 23. A theory challenges existing assumptions and paradigms.....
- 24. Extrinsic factors deal with the internal aspects of the theory itself, such as: Concepts and definitions.....
- 25. The development and application of theories are profoundly influenced by a variety of extrinsic factors.....
- 26. Interdisciplinary Collaboration involves working together with all patients to achieve optimal health outcomes.....

27. Patients can advocate for each other, ensuring that their needs and preferences are heard throughout their care.....
28. Empathy is communicating needs and concerns clearly and confidently, while still being respectful.....
29. Nursing theories are frameworks that nurses use to explain predict and understand the phenomena they encounter in their practice.....
30. Theories help nurses make sense of their observations, guide their actions, and improve patient care.....

For questions 31 to 45, fill in the spaces provided with the appropriate words.

31. Imogene King's Theory of
32. Dorothea Orem's..... Theory
33. Interpersonal Relations Theory was proposed by.....
34. Theory of Human Caring was developed by.....
35. Patricia Benner'sTheory
36.is the highest level of theory development.
37. is the second level of theory development.
38. The central focal of care in nursing theories is the.....
39. The individual has the right to make decisions and take control of their own care. This statement explains.....
40.was the first Ghanaian Chief Nursing Officer.

Definition of nursing by Virginia Henderson:

Assisting the 41....., sick or well, in the 42..... of those activities contributing to 43..... or its 44..... (or to peaceful death) that an individual would perform 45..... if he had the necessary strength, will or power

For questions 46 to 60, match the words in A with their appropriate meanings/definitions in B and write your answers in the space provided.

	A	ANSWER	B
46.	Factor-Relating Theory		A. reduces the risk of infection, leading to better patient recovery.
47.	Self-Actualization Needs		B. individual elements or variables that can influence an outcome
48.	Theory		C. Strong social connections contribute to emotional well-being and recovery.
49.	Love and belonging needs		D. understanding how different variables influence each other.
50.	Improved cleanliness		E. a rational expression of abstract thought about a phenomenon.
51.	Wellness		F. Opportunities for personal growth enhance a patient's sense of purpose and well-being.
52.	Functionality		G. Investigates how sanitation, nutrition, and economic conditions influence humans.
53.	Resilience		H. Process of using logical and cognitive methods to draw conclusions, solve problems, or make decisions.
54.	Propositions		I. An informative representation of an object, person, or system.
55.	Process		J. This enables individuals to perform daily activities, maintain independence, and engage in activities that bring joy and fulfillment.
56.	Knowledge		K. The individual's experiences, perceptions, and feelings are acknowledged and respected.
57.	Reasoning		L. The capacity to bounce back from illness, trauma, or adversity.
58.	Model		M. Statements that explain the relationship between concepts.
59.	Conceptual model		N. the information, understanding, skills, and experiences that an individual or group has acquired through various means, such as learning, experience, or socialization.
60.	Subjectivity		O. A state of being that encompasses physical, emotional, social, and spiritual well-being.
			P. Series of actions, changes or functions intended to bring about a desired result.
			Q. Representation or specification of an idea or object that exists in the mind.
