METHODIST UNIVERSITY GHANA

DEPARTMENT OF NURSING AND MIDWIFERY

BSC. NURSING: END OF SECOND SEMESTER EXAMINATION: 2024/2025

COURSE CODE/TITLE: MNUR 308 PHARMACOLOGY II

(3 CREDITS)

INSTRUCTIONS:

ANSWER ALL QUESTIONS IN SECTION A AND B

ANSWER SECTION ALL ON THE QUESTION PAPER

TIME ALLOWED: 2 HOURS

SECTION A: ANSWER ALL QUESTIONS IN THIS SECTION BY CIRCLING THE MOST APPROPRIATE ANSWER FROM (A-D). ONE MARK IS ASSIGNED TO EACH QUESTION

1. Pick the odd one out:

- A. Flucloxacillin
- B. Ceftriaxone
- C. Ampicillin
- D. Penicillin G
- E. Dicloxacillin

2. Which one of the following antimalaria has gametocidal effect on the malaria parasites?

- A. Pyrimethamine
- B. Proguanil
- C. Primaquine
- D. Artesunate
- E. Doxycycline

3. Pick the odd one out:

- A. Polymyxins
- B. Aminoglycosides
- C. Amoxicillin
- D. Imipenem
- E. Carbapenems

4. A patient taking oral warfarin to prevent deep vein thrombosis noticed bleeding from his nose and stools, after he took unprescribed Erythromycin for sore throat. This means that:

- A. Erythromycin has no effect on oral warfarin
- B. Erythromycin stopped the effect of oral warfarin

Index number:

Signature:

C. Erythromycin prolonged the effect of oral warfarin

D. Erythromycin and oral warfarin do not interact

E. Erythromycin and oral warfarin are the same

5. Pick the odd one out:

A. Amoxicillin

B. Cefuroxime

C. Ampicillin

D. Penicillin G

E. Penicillin V

6. A 23-year-old woman on warfarin for Deep Vein Thrombosis and was put of oral Erythromycin, which inhibits cytochrome enzyme, for treatment of a sore throat. Which of the following is true?

A. Duration of action of warfarin will be prolonged

B. Duration of action of warfarin will be shortened

C. Duration of action of warfarin will be unchanged

D. A and B only

E. All of the above

7. A patient was given Amoxicillin-clavulanic acid for the treatment of pneumonia. She reports back with bloody mucoid diarrhoea. Which bacteria causes this side effect?

A. Staphylococcus aureus

B. Streptococcus pneumonia

C. Clostridium difficile

D. Salmonella typhi

E. Mycobacterium tuberculosis

8. An immunosuppressed male patient was brought to the emergency room where a CT scan showed a brain mass later confirmed as a fungal infection in the brain. The physician assistant prescribes a medication that creates pores in the ergosterol molecule in the fungal cell wall. Which one of the following antifungal agents performs this action?

- A. Itraconazole
- B. Nystatin
- C. Clotrimazole
- D. Flucytosine
- E. Griseofulvin

9. Pick the odd one out:

- A. Flucloxacillin
- B. Dicloxacillin
- C. Ampicillin
- D. Oxacillin
- E. Nafcillin

10. Pick the odd one out:

- A. Penicillin
- B. Cephalosporins
- C. Vancomycin
- D. Bacitracin
- E. Sulphonamides

11. An insect fell on a lady's eye and the eye became reddened. As part of the management, the medical doctor prescribed a drug that inhibited COX1 and COX2 to reduce the pain. Which one of the following drugs performs this role?

- A. Ciprofloxacin

Index number:

Signature:

B. Ampicillin

C. Hydrocortisol

D. Aspirin

E. Paracetamol

12. Pick the odd one out:

A. Erythromycin

B. Clindamycin

C. Linezolid

D. Chloramphenicol

E. Ampicillin

13. An 18-year-old male with asthma reports with difficulty in breathing and wheezing. As part of management, the medical doctor administered hydrocortisone intra venously. The hydrocortisone works by:

A. inhibiting the conversion of phospholipid to arachidonic acid

B. inhibiting COX1 and COX2 enzyme

C. inhibiting transpeptidase enzyme

D. inhibiting DNA gyrase

E. inhibiting peptidoglycan

14. Which one of the following is not a bacteriostatic antibiotic?

A. Vancomycin

B. Trimethoprim

C. Sulphonamides

D. Macrolides

E. Ethambutol

15. A patient with extensive burns was brought to the Burns unit at your hospital and the medical doctor prescribed a cream containing an antibiotic that inhibits the formation of the active form of folate for nucleic acid synthesis. This antibiotic is:

- A. an Ampicillin
- B. a Clindamycin
- C. a Sulphonamide
- D. a Cephalosporin
- E. an Aminoglycoside

16. You developed a boil on your cheek and reported to the clinic. After examination, the doctor gave you a medication that was not affected by the penicillinase enzyme of the bacteria. Which one of the following is this antibiotic?

- A. Amoxycillin
- B. Penicillin V
- C. Penicillin G
- D. Flucloxacillin
- E. Ampicillin

17. A patient having tuberculosis of the lungs was started on an antibiotic. This patient reports of red-orange discolouration of his urine after taking the prescribed antibiotic. Which one of the following antibiotics does this side effect occur?

- A. Rifampin
- B. Flucloxacillin
- C. Azithromycin
- D. Ampicillin
- E. Meropenem

18. A newborn delivered 12 hours ago after a prolonged labour is brought to you with fever. The doctor prescribed intravenous ampicillin and another antibiotic that inhibits the activity of the 30S subunit of the bacterial ribosome. Which one of the following antibiotics performs such action?

- A. Flucloxacillin
- B. Ciprofloxacin
- C. Gentamicin
- D. Ampicillin
- E. Clindamycin

19. Which of the following is not a bacteriostatic antibiotic?

- A. Chloramphenicol
- B. Clindamycin
- C. Ethambutol
- D. Aminoglycoside
- E. Nitrofurantoin

20. A 1-year-old child is brought to the hospital for treatment of skin infection. Which one of the following antibiotics will you not give for fear of teeth discolouration?

- A. Doxycycline
- B. Azithromycin
- C. Clindamycin
- D. Ampicillin
- E. Ceftriaxone

21. An unconscious female patient was brought to the emergency room where a CT scan showed a brain mass later confirmed as a fungal infection in the brain. The physician assistant prescribes a medication that creates pores in the ergosterol molecule in the fungal cell wall. Which one of the following antifungal agents performs this action?

Index number:

Signature:

- A. Itraconazole
- B. Clotrimazole
- C. Amphotericin B
- D. Flucytosine
- E. Griseofulvin

22. Which one of the following antimalaria medications is also suitable for treating pelvic inflammatory disease (PID)?

- A. Pyrimethamine
- B. Doxycycline
- C. Proguanil
- D. Primaquine
- E. Artesunate

23. A patient was given Amoxicillin-clavulanic acid for the treatment of pneumonia. She reports back with bloody mucoid diarrhoea. What is the treatment of this side effect?

- A. Metronidazole
- B. Amoxicillin
- C. Flucloxacillin
- D. Dicloxacillin
- E. Cefuroxime

24. A 27-year-old patient having diarrhoea and vomiting after eating pizza was started on an oral antibiotic. The patient reports of red'dish urine after taking the prescribed antibiotic. Which one of the following antibiotics does this side effect occur?

- A. Diflucloxacillin
- B. Cloxacillin
- C. Azithromycin
- D. Ampicillin

Index number:

Signature:

E. Metronidazole

25. Your patient had bloody mucoid stools 2 days after starting Amoxicillin-clavulanic acid for the treatment of a sore throat. Another medication was commenced to treat the bloody mucoid stools and patient complained of redness over the hand and neck. Which one of the following antibiotics will cause this redness?

A. Metronidazole

B. Vancomycin

C. Clindamycin

D. Amoxycillin

E. Ampicillin

26. After taking an antifungal agent for a scalp infection, your patient complains of photodermatitis.

Among which one of the following antifungals does this side effect not occur?

A. Tetracycline

B. Ketoconazole

C. Ciprofloxacin

D. Miconazole

E. Doxycycline

27. A patient taking oral phenytoin to prevent seizures started having seizures after taking Erythromycin for pneumonia. Which of the following explains this phenomenon?

A. Inhibition of cytochrome enzyme by Erythromycin

B. Inhibition of transpeptidase enzyme by Erythromycin

C. Inhibition of RNA polymerase enzyme by Erythromycin

D. Inhibition of 30S ribosomal subunit by Erythromycin

E. Inhibition of DNA gyrase enzyme by Erythromycin

Index number:

Signature:

28. Pick the odd one out:

- A. Fluconazole
- B. Ketoconazole
- C. Nystatin
- D. Clotrimazole
- E. Miconazole

29. Your sister calls with a complain of itchy eyes and you suggested an anti-histamine. Which one of the following medications is an example of an anti-histamine?

- A. Cetirizine
- B. Ciprofloxacin
- C. Sulphonamides
- D. Gentamicin
- E. Erythromycin

30. Your patient had bloody mucoid stools 2 days ago and was prescribed a medicine that inhibited the activity of DNA gyrase. All the following antibiotics will perform such action, except?

- A. Levofloxacin
- B. Ofloxacin
- C. Ciprofloxacin
- D. Gentamicin
- E. Norfloxacin

31. A patient reports with fungal infection on the right leg. The medical doctor prescribes a medication that inhibits β -1,3-glucan synthase. Which one of the following antifungal agents performs this action?

- A. Caspofungin
- B. Fluconazole
- C. Amphotericin B
