

INDEX NUMBER.....DATE.....

METHODIST UNIVERSITY COLLEGE GHANA

FACULTY OF SCIENCE

DEPARTMENT OF NURSING & APPLIED SCIENCE

(DANSOMAN & TEMA CAMPUS)

END OF FIRST SEMESTER EXAMINATION, 2024/2025

B.S.c REGISTERED GENERAL NURSING

COURSE CODE: MNUR 311

COURSE TITLE: HEALTH ASSESSMENT

TIME: 2 Hours, 20 mins

Lecturer: Dr. Ernest Oyeh

INSTRUCTIONS:

1. DO NOT OPEN THE BOOKLET UNTIL YOU ARE TOLD TO DO SO
2. READ THE QUESTIONS CAREFULLY AND PROVIDE ONLY RELEVANT ANSWERS
3. WRITE CLEARLY IN THE SPACES PROVIDED OR CIRCLE APPROPRIATELY USING A BLUE PEN
4. STOP WRITING AS SOON AS YOU ARE INSTRUCTED TO DO SO
5. REMAIN IN YOUR SEAT UNTIL THE PAPERS ARE COLLECTED

65

1. Which of the following depicts the correct order of abdominal assessment?
 - A. Inspection Palpation Percussion Auscultation
 - B. Inspection Percussion Palpation Auscultation
 - C. Palpitation Auscultation Percussion Auscultation
 - D. Percussion Auscultation Palpitation Inspection
 - E. Auscultation Palpitation Percussion Inspection
2. Oedema on the body can present in all the following ways, except:
 - A. Swelling around the periorbital area
 - B. Swelling of the palms of the hand
 - C. Swelling of the scrotum
 - D. Swelling below the medial malleoli
 - E. Swelling over the sacral region
3. The following organs present with pain in the right hypochondriac region, except:
 - A. Hepatic flexure
 - B. Gallbladder
 - C. Liver
 - D. Right 12th rib
 - E. Sigmoid colon
4. The normal capillary refill is:
 - A. Less than 5 seconds
 - B. Less than 5 minutes
 - C. More than 5 seconds
 - D. Less than 2 seconds
 - E. More than 2 minutes
5. Pick the odd one out:
 - A. Flatulence
 - B. Haematuria
 - C. Abdominal pain
 - D. Anal pain
 - E. Bloody mucoid stools
6. Pick the odd one out:
 - A. Wheeze
 - B. Stridor
 - C. Hoarseness
 - D. Paroxysmal nocturnal dyspnoea
 - E. Cough with bloody sputum
7. After measuring the temperature of the pregnant woman in labour, you recorded a value in degree Celsius which represents fever. Which of the following recordings represents fever?
 - A. Temperature of 36.2 degree Celsius measured in the axilla
 - B. Temperature of 37.2 degree Celsius measured in the axilla
 - C. Temperature of 37.7 degree Celsius measured using infra-red thermometer
 - D. Temperature of 35.5 degree Celsius measured in the mouth
 - E. Temperature of 36.8 degree Celsius measured in the mouth
8. Your classmate wants to know the skin symptom in a patient who has been bleeding profusely for the past 5 minutes. Which one of the following findings will be present on the skin of this patient?
 - A. Dizziness
 - B. Palpitation
 - C. Profuse sweating

- D. Dyspnoea on exertion
- E. Diplopia

9. One hour after feeling rest pain in her left leg, your patient reports to the hospital. As part of your assessment, you feel for the dorsalis pedis pulse on the lower limb. Where is the dorsalis pedis pulse located?

- A. Outer surface of the small toe
- B. In-between the big toe and index toe
- C. Behind the knee joint
- D. Above the medial malleolus
- E. Both A and C

10. Your patient reports to the hospital 30 minutes after feeling rest pain in her left leg. As part of your assessment, you feel for the posterior tibia pulse on the lower limb. Where is the posterior tibial pulse located?

- A. Outer surface of the small toe
- B. In-between the big toe and index toe
- C. Behind the medial malleolus
- D. Above the lateral malleolus
- E. Both B and C

11. The general sequence for physical examination includes:

- A. Inspection Palpation Percussion Auscultation
- B. Inspection Percussion Palpitation Auscultation
- C. Palpation Percussion Auscultation Inspection
- D. Percussion Palpation Percussion Auscultation
- E. Palpation Auscultation Percussion Inspection

12. The following organs present with pain in the left iliac fossa, except:

- A. Left ovary
- B. Caecum
- C. Sigmoid colon
- D. Left testis
- E. Descending colon

13. The following organs present with pain in the right iliac fossa, except:

- A. Appendix
- B. Caecum
- C. Right testis
- D. Left ovary
- E. Right ureter

14. When assessing abdominal organomegaly, which of the following best physical examination practice is used?

- A. Light palpation over the anterior abdominal wall
- B. Deep palpation over the anterior abdominal wall
- C. Auscultation over the 2nd intercostal space
- D. Inspection over the anterior abdominal wall
- E. Listening over the 4th intercostal space

15. Pick the odd one out:

- A. Resonant- Normal lung
- B. Hyper resonant - Pneumothorax
- C. Dull- Fibrosis
- D. Stony dullness- Accumulation of blood

E. Stony dullness- Accumulation of air

16. All the following organs do not present with epigastric pain, except:

- A. Appendix
- B. Ovaries
- C. Urinary Bladder
- D. Left lobe of the liver
- E. Rectum

17. Where is the carotid artery pulse located?

- A. Below the angle of the jaw
- B. In-between the big toe and index toe
- C. At the antecubital fossa
- D. Above the medial malleolus
- E. Both A and C

18. All the following organs present with suprapubic pain, except:

- A. Testicles
- B. Pancreas
- C. Urinary Bladder
- D. Appendix
- E. Rectum

19. 5 days after delivery via caesarean section, your patient developed shortness of breath, mild ankle swelling, paroxysmal nocturnal dyspnoea and orthopnoea whilst on the ward. Which one of the following apex beat positions confirms cardiomegaly?

- A. 2nd left intercostal space mid-axillary line
- B. 1st left intercostal space mid-axillary line
- C. 4th left intercostal space midclavicular line
- D. 4th right intercostal space midclavicular line
- E. 6th left intercostal space mid-axillary line

20. Upon presenting with yellowing of the eyes. You also noticed abdominal distension with positive fluid thrill. This positive fluid thrill means:

- A. the patient has an obstructed jejunum bowel
- B. there may be water accumulation in the peritoneal cavity
- C. the patient has an obstructed stomach
- D. there is diarrhoea
- E. C and D

21. On physically assessing a patient for jaundice, which one of the following areas will be inspected?

- A. Conjunctiva
- B. Sclera
- C. Scalp
- D. Perineum
- E. Hair thickness

22. Upon inspecting the hair on the scalp of your patient, you noticed irregular loss of hair and areas of hair loss with unequal length. This presentation may require further assessment of which of the following systems:

- A. Ear, Nose and Throat (ENT)
- B. Psychiatric and Gastrointestinal only
- C. Psychiatric only
- D. Gastrointestinal only
- E. Ear, Nose and Throat (ENT), Psychiatric and Gastrointestinal

23. The following organs present with pain in the left hypochondriac region, except:

- A. Spleen
- B. Left 12th rib
- C. Splenic flexure
- D. Caecum
- E. Left lung

24. Which of the following is present in a dehydrated baby?

- A. Fused sutures
- B. Tensed, bulging anterior fontanelle
- C. Depressed anterior fontanelle
- D. Caput succedaneum
- E. Cephalhaematoma

25. Two hours before visiting your health facility, a patient experienced pain on walking which subsided when she rested. As part of your assessment, you would like to feel for the pulses on the lower limb. Which one of the following is not a pulse on the lower limb?

- A. Femoral pulse
- B. Dorsalis pedis pulse
- C. Popliteal pulse
- D. Radial pulse
- E. Posterior tibial pulse

26. Nurse, please I feel breathless and coughs frequently when I lie down but feel relieved upon sitting up. Which of the following symptoms explains this patient's complaint?

- A. Ankle oedema
- B. Paroxysmal nocturnal dyspnoea
- C. Orthopnea
- D. Hoarseness of voice
- E. Chest pain

27. All the following organs does not present with periumbilical pain, except:

- A. Caecum
- B. Splenic flexure
- C. Transverse colon
- D. Jejunum
- E. Rectum

28. All the following organs does not present with umbilical pain, except:

- A. Caecum
- B. Duodenum
- C. Transverse colon
- D. Descending colon
- E. Rectum

29. Your friend calls you concerning dizziness and sweating profusely. You would like to find out whether the cause is from a cardiovascular cause. Which one of the following symptoms would help with your conclusion?

- A. Difficulty in breathing on exertion
- B. Stridor
- C. Tremors
- D. Paralysis
- E. B and C

30. Where is the temporal artery pulse located?

- A. Below the angle of the jaw
- B. In front of the ear
- C. At the antecubital fossa
- D. Above the medial malleolus
- E. Both A and C

31. Nervous system symptom:

- A. Jaundice
- B. Strangury
- C. Diplopia
- D. Palpitation
- E. Cold intolerance

32. 26-year-old pregnant woman of 38 weeks' gestation had severe lower abdominal pain associated with about 1000ml of clots. Examination suggests hypovolaemic shock. Which one of the following would be observed in this patient?

- A. Low blood pressure, profuse sweating
- B. Low blood pressure, no pallor
- C. Temperature of 38.9 degree Celsius
- D. Pink conjunctiva and under surface of her tongue
- E. Capillary refill more than 2 seconds

33. A pain of the foregut structures will manifest at which part of the anterior abdominal wall?

- A. Epigastric region
- B. Periumbilical region
- C. Suprapubic region
- D. Left loin
- E. Right loin

34. Your patient complains of dizziness after waking up from bed but you doubt it is dizziness but rather vertigo. Which one of the following suggestions support vertigo?

- A. Vision becoming red
- B. Hearing whining sound in the ear
- C. Sees objects going around her in a circular manner
- D. Sudden onset severe neck pain
- E. Drooling from the mouth

35. You saw a lady at the market bleeding profusely with excessive clots in the vagina. Which of the following parameters would be seen on assessment?

- A. High blood pressure, Low pulse
- B. Low blood pressure, Low pulse
- C. High blood pressure, High pulse
- D. Low blood pressure, High pulse
- E. Normal blood pressure, Low pulse

36. A 42-year-old woman presents with intermittent abdominal pain, abdominal distension and vomiting. Which one of the following shows a complete intestinal obstruction?

- A. Constipation with the passage of gas
- B. Yellowing of both eyes
- C. Inability to pass both stools and flatus
- D. Pruritus
- E. Passage of greenish watery stools

37. All the following organs does not present with hypogastric pain, except:

- A. Duodenum
- B. Liver
- C. Terminal ileum
- D. Ascending colon
- E. Stomach

38. After a 24-hour flight, a woman reports with continuous pain in her right leg which started suddenly during the journey. The symptom described here is called:

- A. Claudication
- B. Rest pain
- C. Sciatica
- D. Labour
- E. Paresis

39. Which of the following is abnormality on eye examination?

- A. Lid lag
- B. Ptosis
- C. Corneal opacity
- D. B and C only
- E. All of the above

40. All the following organs do not present with left lumbar region pain, except:

- A. Rectum
- B. Left Kidney
- C. Urinary Bladder
- D. Appendix
- E. Left lobe of the liver

41. Percussion of the abdomen showed a positive shifting dullness. This means:

- A. There may be blood collection in the peritoneal cavity
- B. There may be air collection in the peritoneal cavity
- C. There may be water collection in the peritoneal cavity
- D. A and C only
- E. All of the above

42. Nurse, please I am bleeding with a lot of clots. which of the following symptom will this patient have?

- A. Stridor
- B. Sweating profusely
- C. Orthopnea
- D. Fever
- E. Paroxysmal nocturnal dyspnoea

43. Nurse, please both palms are yellow but my eyes look white. Which of the following explains the patient's complaint?

- A. Stridor
- B. Haematochezia
- C. No jaundice
- D. Orthopnea
- E. Distended neck veins

44. Auscultation of the abdomen showed high pitched bowel sound. This means:
- A. Bowel obstruction
 - B. Ascites
 - C. Bleeding into the perineal cavity
 - D. Bowel perforation
 - E. All of the above
45. Pick the odd one out:
- A. Resonant- Normal lung
 - B. Hyper resonant - Pneumothorax
 - C. Dull- Fibrosis
 - D. Stony dullness- Accumulation of blood
 - E. Stony dullness- Accumulation of air
46. Examination of your newly delivered baby shows absent philtrum. This confirms which of the following conditions:
- A. Down's syndrome
 - B. Turner's syndrome
 - C. Foetal alcohol syndrome
 - D. Hydrocephalus
 - E. Cerebral palsy
47. Your patient reports to the hospital an hour after feeling rest pain in her left leg. As part of your assessment, you would like to feel for the pulses on the lower limb. Which one of the following is not a pulse on the lower limb?
- A. Dorsalis pedis pulse
 - B. Brachial pulse
 - C. Femoral pulse
 - D. Popliteal pulse
 - E. Posterior tibial pulse
48. All the following organs does not present with periumbilical pain, except:
- A. Caecum
 - B. Appendix
 - C. Transverse colon
 - D. Descending colon
 - E. Rectum
49. The palms and soles of the patient appeared bluish. This is called:
- A. Pallor
 - B. Central cyanosis
 - C. Jaundice
 - D. Peripheral cyanosis
 - E. Hyperthermia
50. Which of the following is not a pulse in the upper body and limbs?
- A. Radial
 - B. Brachial
 - C. Dorsalis pedis
 - D. Carotid
 - E. Subclavian

51. An asthma patient reports with sudden onset difficulty in breathing and wheezing. Which of the examination findings would be seen on assessment of this patient?

- A. Rhonchi sounds on auscultation
- B. Respiratory rate of 25 cycles per minute
- C. Dullness on percussion
- D. B and C only
- E. A and B only

52. All the following organs do not present with epigastric pain, except:

- A. Lower oesophagus
- B. Ovaries
- C. Urinary Bladder
- D. Appendix
- E. Rectum

53. Nurse, please I feel excess heat even when in the air conditioner. Which of the following symptoms explains the patient's complains?

- A. Tremors
- B. Ankle oedema
- C. Orthopnea
- D. Distended neck veins
- E. Heat intolerance

54. All the following are present in the right hypochondrium, except:

- A. Spleen
- B. Liver
- C. Gallbladder
- D. Right hepatic flexure
- E. Ascending colon

55. All the following organs do not present with left lumbar region pain, except:

- A. Appendix
- B. Left lobe of the lung
- C. Urinary Bladder
- D. Left lobe of the liver
- E. Rectum

56. Which of the following signifies dehydration in a baby?

- A. Bulging anterior fontanelle
- B. Pinkish colouration at the trunk with bluish colouration at the hands
- C. Weight loss of 0.2 Kg from previous weight checked
- D. Capillary refill more than 2 seconds
- E. Yellow sclera on the first day of life

57. Assessment of a patient with spinal injury will likely show which of the following parameters?

- A. High blood pressure, Low pulse
- B. Low blood pressure, Low pulse
- C. High blood pressure, High pulse
- D. Low blood pressure, High pulse
- E. Normal blood pressure, Low pulse

58. Nurse, please my hands shake anytime I stretch both upper limbs. Which of the following explains the patient's symptom?

- A. Tinnitus
- B. Orthopnea
- C. Palpitation
- D. Vertigo
- E. Tremor

59. When examining the respiratory system of your patient, you noticed stony dullness on percussing the base of both lungs. Which of the following presents with stony dullness on percussion?

- A. There may be air in the pleural space
- B. There may be water accumulation in the pleural space
- C. There may be blood accumulation in the pleural space
- D. B and C only
- E. A and B only

60. A 19-year-old female reports to the emergency with sudden severe lower abdominal pain for which you performed light abdominal palpation as part of your physical assessment. The purpose of light palpation is to:

- A. identify enlarged Liver
- B. elicit areas of tenderness
- C. feel for fluid
- D. feel for hernia
- E. percuss for fluid

61. An asthma patient reports with sudden onset difficulty in breathing and excessive sweating. Which of the examination findings would be seen on assessment of this patient?

- A. Bronchial breath sounds on auscultation
- B. Respiratory rate of 30 cycles per minute
- C. Rhonchi on auscultation
- D. B and C only
- E. A and C only

62. Your junior nurse would like to know about some symptoms of the genitourinary system, all the following are true, except:

- A. Terminal haematuria
- B. Right loin pain
- C. Straining on micturition
- D. Nocturnal polyuria
- E. Epigastric pain

63. A patient report with severe pallor. Which of the examination findings would be seen on assessment of this patient?

- A. Pulse rate of 70 beats per minute
- B. Shortness of breath on exertion
- C. Feel of heart beating fast
- D. A, B and C
- E. B and C only

64. Choose the wrong pair among the following:

- A. Cardiovascular Orthopnoea
- B. Genitourinary Anuria
- C. Nervous system Headache
- D. Gastrointestinal system Rusty sputum
