METHODIST UNIVERSITY COLLEGE GHANA

FACULTY OF SCIENCE

DEPARTMENT OF NURSING & APPLIED SCIENCE

(DANSOMAN & TEMA CAMPUS)

END OF FIRST SEMESTER EXAMINATION, 2024/2025

B.S.c REGISTERED GENERAL NURSING

COURSE CODE: MNUR 313

COURSE TITLE: COMMUNITY HEALTH NURSING

TIME: 2 Hours

Lectures: Madam Veronica Aborbi

INSTRUCTIONS:

1. DO NOT OPEN THE BOOKLET UNTIL YOU ARE TOLD TO DO SO
2. READ THE QUESTIONS CAREFULLY AND PROVIDE ONLY RELEVANT ANSWERS
3. WRITE CLEARLY IN THE SPACES PROVIDED OR CIRCLE APPROPRIATELY USING A BLUE PEN
4. STOP WRITING AS SOON AS YOU ARE INSTRUCTED TO DO SO
5. REMAIN IN YOUR SEAT UNTIL THE PAPERS ARE COLLECTED

Section A

1. What is the primary responsibility of a nurse working in port health?
 - A. To manage the movement of cargo
 - B. To prevent the spread of communicable diseases across borders
 - C. To assist passengers with customs procedures
 - D. To conduct immigration inspections
2. Which of the following is a key task for nurses working in port health?
 - A. Inspecting luggage for contraband
 - B. Administering vaccinations to travelers and crew members
 - C. Handling currency exchange for tourists
 - D. Inspecting ships for mechanical issues
3. What should a nurse do if a traveler arrives at the port with symptoms of a communicable disease?
 - A. Allow the traveler to continue without intervention
 - B. Notify the local health authorities and initiate isolation protocols
 - C. Assist the traveler in finding accommodations
 - D. Recommend over-the-counter medication and send them on their way
4. A nurse at a port is responsible for monitoring travelers for which of the following diseases?
 - A. Asthma
 - B. Cholera, yellow fever, and malaria
 - C. Heart disease
 - D. Diabetes
5. Which of the following actions is critical if a nurse detects an outbreak of an infectious disease at the port?
 - A. Coordinating with customs officers for ship inspections
 - B. Facilitating a quarantine and collaborating with local public health authorities
 - C. Allowing the infected person to board with protective gear
 - D. Ensuring the traveler has the correct travel documents
6. What is the primary focus of regenerative health?
 - A. Curing diseases with medication
 - B. Enhancing the body's ability to heal and regenerate
 - C. Using surgery for all ailments
 - D. Suppressing symptoms without addressing the cause
7. What role does sleep play in regenerative health?
 - A. It weakens the immune system
 - B. It is irrelevant to health
 - C. It supports the body's natural healing and recovery processes
 - D. It causes muscle fatigue
8. How does regular physical exercise contribute to regenerative health?
 - A. By promoting the growth and repair of tissues
 - B. By causing stress and fatigue
 - C. By weakening the bones and muscles
 - D. By damaging cells
9. What is the purpose of detoxification in regenerative health?
 - A. To reduce hydration levels
 - B. To eliminate toxins from the body and support cellular regeneration
 - C. To increase sugar consumption

D. To weaken the immune system

10. Which practice help to enhance the body's ability to regenerate at the cellular level?

- A. High caffeine consumption
- B. Consistent hydration and nutrient intake
- C. Eating processed snacks regularly
- D. Skipping breakfast

11. School health services primarily aim to reduce health disparities by:

- A. Offering free lunches to all students
- B. Ensuring equitable access to health care for all students
- C. Focusing only on high-performing students
- D. Lowering the cost of school uniforms

12. Which professional is most commonly associated with delivering school health services?

- A. School librarian
- B. School nurse
- C. Physical education teacher
- D. Guidance counselor

13. Why is it important for schools to engage parents in health services?

- A. To reduce school hours
- B. To improve attendance records
- C. To ensure continuity of care between home and school
- D. To monitor students' academic performance

14. What is the primary function of the family as a social unit?

- A. Economic production
- B. Socialization of children
- C. Political representation
- D. Environmental conservation

15. Which of the following is considered a traditional function of the family?

- A. Providing financial advice
- B. Offering legal services
- C. Nurturing and raising children
- D. Conducting scientific research

16. The concept of "nuclear family" typically includes:

- A. A single parent and child
- B. Two parents and their children
- C. Extended family members such as grandparents and aunts
- D. Parents, children, and close family friends

17. What preventive measures do port health nurses often promote to reduce the risk of infectious diseases?

- A. Legal advice for passengers
- B. Hygienic practices and vaccination compliance for travelers and workers
- C. Financial guidance for tourists
- D. Safety inspections of vehicles

18. Which of the following is a primary role of the school nurse?

- A. Organizing school events
- B. Administering medications and first aid

- C. Teaching physical education classes
- D. Managing school budgets

19. What is the main purpose of vision and hearing screenings in schools?

- A. To help students improve their academic performance
- B. To detect potential health issues early
- C. To ensure all students participate in sports
- D. To encourage healthy eating habits

20. Which professional in the school health team focuses on students' emotional and psychological well-being?

- A. School Nurse
- B. Physical education teacher
- C. School counselor
- D. Health educator

21. What is the primary focus of health education in schools?

- A. Teaching academic subjects
- B. Promoting healthy behaviors and lifestyles
- C. Preparing students for athletic competitions
- D. Encouraging social interactions among students

22. In which type of family structure does the extended family include multiple generations living together?

- A. Nuclear family
- B. Single-parent family
- C. Extended family
- D. Blended family

23. Which family role is typically responsible for providing emotional support and care?

- A. Breadwinner
- B. Homemaker
- C. Parent
- D. Guardian

24. The term "family dynamics" refers to:

- A. The economic status of the family
- B. The physical health of family members
- C. The interactions and relationships among family members
- D. The legal status of the family

25. Which of the following is a common challenge faced by modern families?

- A. Managing multiple generations under one roof
- B. Limited access to technology
- C. Lack of transportation options
- D. High levels of unemployment

26. What is the primary purpose of a home visit in community health nursing?

- A. To conduct routine medical examinations
- B. To provide personal care to the patient
- C. To assess and address health needs within the home environment
- D. To perform surgical procedures

27. Which of the following is an essential component of preparing for a home visit in community health nursing?
 - A. Ensuring the patient's medical records are up-to-date
 - B. Preparing a detailed report of all previous visits
 - C. Ensuring you have proper personal protective equipment (PPE) and materials for the visit
 - D. Scheduling multiple visits in one day
28. During a home visit, a community health nurse identifies that a patient's living conditions are contributing to their health issues. What should the nurse do first?
 - A. Report the conditions to the appropriate authorities
 - B. Provide the patient with a list of local shelters
 - C. Discuss the identified issues with the patient and explore possible solutions
 - D. Immediately refer the patient to a specialist
29. Which of the following actions is NOT appropriate during a home visit?
 - A. Observing and documenting the home environment for safety hazards
 - B. Providing health education and counseling to the patient
 - C. Making assumptions about the patient's family dynamics without gathering information
 - D. Assessing the patient's health status and providing necessary interventions
30. In which situation would a community health nurse most likely use a home visit as a strategy?
 - A. When the patient requires a routine check-up in a clinical setting
 - B. When the patient is newly discharged from the hospital and needs follow-up care
 - C. When the patient is scheduled for a vaccination at a public clinic
 - D. When the patient requires an elective surgery
31. What is a key factor in ensuring the safety of the community health nurse during a home visit?
 - A. Relying solely on verbal communication with the patient
 - B. Familiarizing oneself with the neighborhood before the visit
 - C. Avoiding personal protective equipment (PPE) to build rapport with the patient
 - D. Conducting visits only during daylight hours
32. Which of the following vaccines is given to protect against tuberculosis (TB)?
 - A. Polio vaccine
 - B. BCG vaccine
 - C. Hepatitis B vaccine
 - D. Rotavirus vaccine
33. Which of the following vaccines is recommended for all infants starting at birth?
 - A. BCG, Oral polio
 - B. Measles, Mumps, and Rubella (MMR)
 - C. Varicella (Chickenpox)
 - D. Human Papillomavirus (HPV)
34. What is the recommended site for administering intramuscular vaccines in infants under 12 months of age?
 - A. Deltoid muscle
 - B. Vastus lateralis muscle
 - C. Gluteus maximus muscle
 - D. Rectus femoris muscle
35. In a clinic setting, which document is essential for recording a patient's immunization history?
 - A. Patient's medical history form
 - B. Road to Health Chart/Book
 - C. Patient's consent form

D. Appointment scheduling form

36. What is the appropriate action if a patient misses a scheduled vaccine dose?

- A. Start the vaccination series from the beginning
- B. Administer the missed dose as soon as possible
- C. Ignore the missed dose if the patient is older than 18
- D. Wait until the next scheduled appointment

37. Which of the following is a common goal of home visits in community health nursing?

- A. To conduct comprehensive medical diagnostics
- B. To provide immediate treatment for acute illnesses
- C. To promote self-management and improve health outcomes in the home environment
- D. To replace the need for hospital visits

38. When a community health nurse assesses a patient's adherence to a treatment plan during a home visit, which factor should be considered?

- A. The nurse's personal opinion on the treatment plan
- B. The patient's understanding and ability to follow the treatment plan
- C. The patient's ability to attend regular clinic appointments
- D. The availability of the latest medical technology

39. What should a nurse do if they encounter a situation during a home visit that is beyond their scope of practice?

- A. Attempt to handle the situation using their best judgment
- B. Refer the patient to a specialist or appropriate service
- C. Ignore the situation and continue with the visit
- D. Document the situation but take no further action

40. How can community health nurses effectively evaluate the success of their home visits?

- A. By assessing the patient's satisfaction with the visit
- B. By comparing the outcomes with those from a similar visit in a different setting
- C. By reviewing the progress toward the patient's health goals and outcomes
- D. By relying on feedback from the patient's family members only

41. What is the primary goal of immunization?

- A. To treat diseases
- B. To prevent diseases
- C. To diagnose diseases
- d. To cure diseases

42. How should a nurse plot a child's weight on the Road to Health Chart?

- A. Mark the weight on the vertical axis corresponding to the child's exact age on the horizontal axis
- B. Mark the age on the vertical axis and the weight on the horizontal axis
- C. Plot the weight on a separate graph and not on the chart
- D. Use the child's height to estimate their weight and plot it accordingly

43. When interpreting the Road to Health Chart, what should a sudden change in growth percentiles typically prompt?

- A. An increase in immunization doses
- B. A review of the child's growth trend and further assessment of health status
- C. A change in the child's diet without further evaluation
- D. Immediate referral to a specialist without any additional monitoring

44. What is the most effective public health strategy to prevent the spread of vector-borne diseases?

- A. Hand washing

- B. Use of insecticide-treated bed nets
- C. Quarantine of infected individuals
- D. Antibiotic distribution

45. What is the primary objective of the Integrated Disease Surveillance and Response (IDSR) strategy?

- A. To ensure disease outbreaks are kept confidential
- B. To strengthen surveillance and response systems for priority diseases
- C. To replace the World Health Organization (WHO) guidelines
- D. To create new vaccines for infectious diseases

46. Which of the following is NOT a component of IDSR?

- A. Case detection
- B. Community engagement
- C. Disease forecasting
- D. Laboratory confirmation

47. What is the most common side effect of vaccines?

- A. Severe allergic reaction
- B. High fever
- C. Mild soreness at the injection site
- D. Persistent cough

48. In a clinic setting, what is the recommended procedure for handling a vaccine that has been exposed to temperatures outside of its recommended range?

- A. Administer the vaccine immediately
- B. Dispose of the vaccine and document the incident
- C. Store the vaccine at room temperature for 24 hours
- D. Contact the manufacturer for instructions

49. Which of the following vaccines is contraindicated during pregnancy?

- A. Hepatitis B
- B. Influenza (inactivated)
- C. Measles, Mumps, and Rubella (MMR)
- D. Tdap

50. What type of vaccine provides immunity by stimulating the body to produce antibodies against a specific pathogen?

- A. Live attenuated vaccine
- B. Inactivated (killed) vaccine
- C. Subunit vaccine
- D. All of the above

51. Which vaccine should be administered to prevent cervical cancer?

- A. Hepatitis B
- B. Human Papillomavirus (HPV)
- C. Varicella (Chickenpox)
- D. Pneumococcal

52. Which vaccine should be administered to prevent cervical cancer?

- A. Hepatitis B
- B. Human Papillomavirus (HPV)
- C. Varicella (Chickenpox)
- D. Pneumococcal

53. The Pentavalent vaccine protects against how many diseases?
- A. 2
 - B. 3
 - C. 5
 - D. 7
54. What is the primary method of administering the BCG vaccine?
- A. Oral drops
 - B. Subcutaneous injection
 - C. Intradermal injection
 - D. Intramuscular injection
55. Which of the following is the first step in organizing a child welfare clinic?
- A. Scheduling patient appointments
 - B. Developing a clinic layout
 - C. Identifying community needs and setting objectives
 - D. Hiring healthcare staff
56. In a child welfare clinic, what is the primary purpose of conducting regular health screenings and assessments?
- A. To reduce clinic operating costs
 - B. To track staff performance
 - C. To identify and address health issues early
 - D. To increase clinic visibility in the community
57. What is the primary purpose of the Road to Health Chart (RTHC)?
- A. To monitor a child's vaccination status
 - B. To track a child's weight and height over time
 - C. To assess a child's vision and hearing
 - D. To record a child's social and behavioral milestones
58. Who is typically responsible for developing policies and procedures related to health services in a school?
- A. School nurse
 - B. School counselor
 - C. School administrator
 - D. Health educator
59. How do school health services contribute to academic success?
- A. By providing students with textbooks
 - B. By ensuring that students are physically and mentally healthy
 - C. By improving teacher-student relationships
 - D. By offering after-school tutoring services
60. Which of the following is a long-term benefit of school health services?
- A. Reduced homework load
 - B. Higher income after graduation
 - C. Lifelong health awareness and behavior changes
 - D. Increased popularity among students

SECTION B ANSWER ONLY TWO QUESTIONS FROM THIS SECTION

(EACH QUESTION CARRY 20 MARKS)

SUBMIT YOUR QUESTION SHEETS WITH YOUR ANSWER BOOKLET

Question One

Q1a. Community- Based Health Planning Services (CHPS) is one of the key tools devised to bring healthcare delivery to the door steps of patients. Outline ALL the steps and milestones of the CHPS concept (15 MARKS)

Q1b. Discuss any 5 benefits of the CHPS concepts you know (5 MARKS)

Question Two

Q2a. A newly trained Public Health Nurse is posted to your facility, as the Nurse In-Charge, explain the 3 types of child welfare clinics you operate (5 MARKS)

Q2b. There has been a surge of malnourished babies reporting to your facility from Kaneshie Zongo-Lane. As the nurse in-charge, plan and intervene to give proper care to solve the situation. (15 MARKS)

Question Three

Q3a. As a community health nurse you were assigned by your supervisor to conduct school health services at Mpoase Basic School. Explain any 4 of the goals of school health services to the pupils. (10 MARKS)

Q3b. Mention any 5 members of the School Health Services team and 2 roles each of them play. (10 MARKS)
