64. A type of depression that occurs within the first two (2) weeks after delivery is called:
- A. involuntional depression
 - B. major depression
 - C. postnatal depression
 - D. seasonal affective disorder
65. Symptoms of mania include:
- I. creativity
 - II. irritability
 - III. persecutory delusions
 - IV. pressured speech
- A. I and II
 - B. II, III and IV
 - C. III and IV
 - D. I, II, III and IV
66. While performing an initial assessment on a patient admitted with depression, what physical aspect is **most** important to assess?
- A. Height and weight
 - B. Last menstrual period
 - C. Sleeping patterns
 - D. Urinary functioning
67. Jaundice, photosensitivity and parkinsonism may occur in patient's taking:
- A. amitriptyline
 - B. chlorpromazine
 - C. diazepam
 - D. meprobamate
68. During the nursing assessment, a client describes constantly hearing voices mumbling in the background. The client denies that the voices are telling him to do anything harmful. The nurse documents that the client is experiencing which of the following?
- A. Auditory hallucinations
 - B. Command hallucinations
 - C. Gustatory hallucinations
 - D. Olfactory hallucinations
69. Which one of the following nursing principles would be the **priority** of care for patient exhibiting delusions of persecution?
- A. Encourage activities
 - B. Establishing trust
 - C. Presenting reality
 - D. Reducing anxiety

70. A patient expresses the belief that the national security officers are spying on him and monitoring his movements. This is an example of a/an:
- auditory hallucination
 - delusion of persecution
 - delusional perception
 - self-accusatory delusion
71. Which of the following is a cognitive symptom of schizophrenia?
- Apathy
 - Disorganized speech
 - Hallucinations
 - Memory deficits
72. At what age does schizophrenia typically onset?
- Adolescence
 - Childhood
 - Middle age
 - Old age
73. Which type of delusion involves believing one has exceptional abilities or fame?
- Delusions of control
 - Delusions of grandeur
 - Delusions of persecution
 - Delusions of reference
74. Which of the following are known environmental risk factors for schizophrenia?
- Childhood trauma
 - High socioeconomic status
 - Prenatal exposure to infections
 - Urban upbringing
- I, II, III
 - I, II, IV
 - II, III, IV
 - I, III, IV
75. Refusing to obey command and doing exactly the opposite of what has been requested or instructed to do is termed as:
- echolalia
 - echopraxia
 - negativism
 - neologism
76. Which disorder is characterized by pervasive mistrust and suspiciousness of others?
- Dependent personality disorder
 - Histrionic personality disorder
 - Paranoid personality disorder
 - Schizoid personality disorder

CANDIDATE'S NUMBER:..... SIGNATURE:.....

77. A client is admitted for major depression. What should the nurse expect to find during assessment?
- A. Anhedonia, feelings of worthlessness, and difficulty focusing
 - B. Changes in sleep pattern, tired, and grandiose mood
 - C. Depressed mood, guilt, and pressured speech
 - D. Difficulty focusing, feelings of helplessness, and flight of ideas
78. The immediate priority of care to be rendered to a manic patient who is pacing, agitated, and presenting aggressive gestures is:
- A. assist the staff in a caring for the patient in a controlled environment
 - B. offer the patient a less stimulated area to calm down and regain control
 - C. provide safety for the patient and other patients on the ward
 - D. provide the patients on the units with a sense of comfort and safety
79. Which of the following does **not** form part of the assessment of a mental patient?
- A. Mental status examination
 - B. Physical examination
 - C. Psychiatric history
 - D. Psychotherapy
80. Throughout the assessment, the patient shows disorganized thinking, jumping from one idea to another with no clear relationship between the thoughts. The nurse would assess the patient as having which of the following?
- A. Ideas of reference
 - B. Loosening associations
 - C. Tangential thinking
 - D. Word salad
81. The patient with schizophrenia makes the following statement, "I just don't know how to count. The sky turned to fire; I have a ball in my head". The nurse documents this entire statement as an example of:
- A. delusional thinking.
 - B. flight of ideas.
 - C. ideas of reference.
 - D. loosening associations
82. Morbid preoccupation of guilt and deaths are commonly found in which of the following disorders?
- A. Depression
 - B. Hypochondriasis
 - C. Mania
 - D. Schizophrenia
83. To understand the meaning of the cleaning rituals the nurse must realize that:
- A. medications cannot help
 - B. rituals relieve intense anxiety
 - C. the patient cannot change
 - D. the patient cannot help herself

84. In giving a patient information regarding psychotropic medications, the nurse stresses that the primary purpose of these medications is to:
- A. cure most psychosis
 - B. decrease psychotic symptoms
 - C. modify learned behaviour
 - D. provide missing chemicals
85. A patient is admitted to the psychiatric unit and states, "I am President of the largest corporation in the world. Everyone comes to me for advice". The patient is exhibiting which of the following?
- A. Flight of ideas
 - B. Grandiose delusion
 - C. Loosening associations
 - D. Thought broadcasting
86. The patient states that he is 15 billion years old and created the world. The nurse documents this statement as an example of which type of thinking shown by the patient?
- A. Delusional thinking
 - B. Hallucination
 - C. Ideas of reference
 - D. Word salad
87. A pathological, irrational repetition of another person's words or speech is termed as:
- A. echolalia
 - B. perseveration
 - C. obsession
 - D. verbigeration
88. The patient with schizophrenia believes that the student nurses are there to spy on the patients. The patient is exhibiting which of the following symptoms?
- A. Anhedonia
 - B. Hallucinations
 - C. Ideas of reference
 - D. Persecutory delusions
89. The depressed patient who has been taking Phenelzine (Nardil) states she is going to stop taking the drug. She asks the nurse, "When can I start eating normally again?". The nurse states that the patient should stay away from tyramine-containing diet for:
- A. 2-3 days
 - B. about 2 weeks
 - C. about a month
 - D. about a week
90. A patient was asked of his name and he answered, "Thomas". When he was asked of his age and other personal data he continued to say "Peter". Which sign is he exhibiting?
- A. Circumstantiality
 - B. Echolalia
 - C. Perseveration
 - D. Verbigeration

91. During the nursing assessment, a patient describes constantly hearing voices mumbling in the background. The patient accepts that the voices are telling him harm other people. The nurse documents that the patient is experiencing which of the following hallucinations?
- A. Auditory
 - B. Command
 - C. Gustatory
 - D. Olfactory
92. Which neurotransmitter is most commonly associated with schizophrenia?
- A. Dopamine
 - B. Gamma-amino butyric acid (GABA)
 - C. Glutamate
 - D. Serotonin
93. The patient tells the nurse, "That new television anchor is telling the world about me". This is an example of:
- A. delusion of reference.
 - B. persecutory delusions.
 - C. thought broadcasting.
 - D. thought insertion.
94. What is a common positive symptom of schizophrenia?
- A. Avolition
 - B. Delusions
 - C. Social withdrawal
 - D. Weight gain
95. Which of the following are considered types of delusions?
- I. Delusions of grandeur
 - II. Delusions of persecution
 - III. Delusions of reference
 - IV. Delusions of withdrawal
- A. I, II, III
 - B. I, II, IV
 - C. II, III, IV
 - D. I, III, IV
96. What is a common negative symptom of schizophrenia?
- A. Delusions
 - B. Hallucinations
 - C. Social withdrawal
 - D. Thought disorder

97. What is the most frequently experienced type of hallucination in schizophrenia?
- Auditory
 - Gustatory
 - Tactile
 - Visual
98. Which of the following are cognitive symptoms of schizophrenia?
- Disorganized thinking
 - Hallucinations
 - Impaired executive function
 - Poor attention span
- I, II, III
 - I, II, IV
 - II, III, IV
 - I, III, IV
99. Which of the following statements about the neurobiological causes of mental illness is most accurate?
- Genetics and heredity can explain all causes of mental illness.
 - Several mental disorders may be linked to genetic and nongenetic factors.
 - There is no evidence that the immune system is related to mental illness.
 - Viral infection has been proven to be the cause of schizophrenia.
100. Which subtype of schizophrenia is characterized by severe motor disturbances?
- Catatonic
 - Disorganized
 - Paranoid
 - Undifferentiated
101. Which of the following is a common early warning sign of schizophrenia?
- Decline in personal hygiene
 - Increased interest in social activities
 - Improved academic performance
 - Sudden weight loss
102. A very angry patient is threatening to leave the hospital. What action should be taken by the nurse?
- Inform him of the consequences of leaving the hospital
 - Let him check out of the hospital
 - Put the patient in restraints until the physician comes
 - Tell him that no one is allowed to leave the hospital
103. What is a common consequence of untreated schizophrenia?
- Chronic psychosis
 - Increased intelligence
 - Rapid recovery
 - Stable employment

CANDIDATE'S NUMBER:..... SIGNATURE:.....

104. Which of the following is a cognitive deficit in schizophrenia?
A. Avolition
B. Impaired attention
C. Social withdrawal
D. Weight gain
105. Which of the following is a primary symptom of schizophrenia?
A. Cognitive symptoms
B. Gastrointestinal symptoms
C. Physical symptoms
D. Respiratory symptoms
106. The nurse observes increasing restlessness, agitation, swinging of legs, and pacing in a patient who has been taking Thorazine 400 mg daily. These are manifestations of:
A. akathisia
B. dystonia
C. extra pyramidal symptoms (EPS)
D. neuroleptic malignant syndrome (NMS)
107. Which **best** explains the biochemical processes responsible for depression?
A. Decreased glucocorticoid activity
B. Decreased serotonin and norepinephrine activity
C. Increased activity of dopamine
D. Potentiating of the kindling process
108. A patient with bipolar disorder takes lithium carbonate 300mg three times daily. The nurse evaluates that the dose is **appropriate** when the patient reports:
A. feeling sleepy and less energetic.
B. increased feelings of self-worth.
C. minimal mood swings.
D. weight gain of 7 pounds in the last 6 months
109. When teaching a client about restrictions for tranylcypromine (Parnate), the nurse will tell the client to **avoid** which of the following foods?
A. Broad beans
B. Citrus fruit
C. Egg products
D. Fried foods
110. The mixture of words put together to make a statement without any logical connection as seen in schizophrenia is known as:
A. clang association
B. loose association
C. neologism
D. word salad

111. Which of the following are known genetic risk factors for schizophrenia?
- I. Advanced paternal age
 - II. Family history of schizophrenia
 - III. Genetic mutations
 - IV. High intelligence
- A. I, II, III
 - B. I, II, IV
 - C. II, III, IV
 - D. I, III, IV
112. Which of the following are known to influence the prevalence of schizophrenia?
- I. Environmental stressors
 - II. Genetic factors
 - III. High educational level
 - IV. Substance abuse
- A. I, II, III
 - B. I, II, IV
 - C. II, III, IV
 - D. I, III, IV
113. Which of the following best describes "mental health"?
- A. A condition characterized by frequent mood swings
 - B. A state of well-being where every individual realizes their own potential
 - C. The ability to maintain physical health
 - D. The absence of mental illness
114. The patient is experiencing a fixed, false belief that **cannot** be corrected by logical reasoning. This is a/an:
- A. delusion
 - B. hallucination
 - C. illusion
 - D. symbolism
115. A patient complains that he cannot get rid of the idea that harm is looming all around him. The thought comes, unbidden, and upsets him. This repeated, unbidden thought is a/an:
- A. compulsion
 - B. delusion
 - C. illusion
 - D. obsession
116. The patient who misinterprets and believes that strangers he sees are talking about him is exhibiting:
- A. clang association
 - B. flight of ideas
 - C. grandiose delusion
 - D. ideas of reference

CANDIDATE'S NUMBER:..... SIGNATURE:.....

117. A patient with major depression is **most** likely to respond to which of the following drugs?
- A. Amitriptyline
 - B. Carbamazepine
 - C. Diazepam
 - D. Largactil
118. A 16-year-old girl states that she doesn't get along with her mother, "I hate her for what she has done to me." Then, a few minutes later she tells the therapist, "I can't help but love my mother for all she has done for me". The patient is exhibiting:
- A. ambivalence
 - B. confusion
 - C. helplessness
 - D. manipulation
119. Which of the following is the international standard for reporting diseases, disorders, injuries and other related health conditions across the world?
- A. Diagnostic and Statistical Manual of Mental Disorders (DSM)
 - B. Epidemiology
 - C. International classification of diseases (ICD)
 - D. Standard treatment guide book
120. An adverse effect of antipsychotic use which is marked by irregular, involuntary spastic muscle movement, torticollis, facial grimacing, and oculogyric crisis is termed as:
- A. acute dystonic reaction
 - B. akathisia
 - C. neuroleptic malignant syndrome
 - D. tardive dyskinesia
