

Instructions: answer all questions. circle the option

- 1) You would refer to the early phase of scar tissue formation as which of the following kinds of tissue?
 - A. Keloid
 - ☒ B. Cicatrix granulation ✓
 - C. Fibrous

- 2) This nutrient repairs the body from wear and tear, builds new tissue and contributes to numerous essential body functions.
 - ☒ A. protein ✓
 - B. carbohydrate
 - C. fat
 - D. sugar

- 3) This vitamin helps the formation of collagen, maintains the intracellular cement substance and helps with iron absorption.
 - A. Thiamine
 - B. Vitamin A
 - ☒ C. Vitamin C
 - ☒ D. Zinc ✓

- 4) The wound healing process does not include:
 - A. inflammatory phase
 - B. proliferation phase
 - ☒ C. infection phase ✓
 - D. maturation phase

- 5) After an abdominal surgery, abdominal muscles contract and cause intraabdominal pressure. If the incisional area is weak, what is possible to happen?
 - ☒ A. Dehiscence
 - B. Evisceration
 - C. Decubitus
 - D. Shearing

- 6) A cut produced surgically by a sharp instrument creating an opening into an organ or space in the body
 - ☒ A. Puncture
 - ☒ B. Incision

INDEX NUMBER _____

- ☐ C. Stoma
 - ☐ D. Abrasion
- 7) Stab wound for a drainage system
- ☒ A. Puncture
 - ☐ B. Incision
 - ☐ C. Stoma
 - ☐ D. Abrasion
- 8) All these are classification of wound according to degree of contamination except?
- ☒ A. Aseptic or sterile
 - ☐ B. Clean
 - ☐ C. Clean-contaminated
 - ☐ D. Dirty or infected
- 9) Which of the following four phases of wound healing are arranged accordingly?
- ☐ A. Hemostasis, inflammatory phase, maturation, proliferative
 - ☒ B. Hemostasis, inflammatory phase, proliferative, maturation
 - ☐ C. Hemostasis, proliferative, maturation, inflammatory phase
 - ☐ D. Inflammatory phase, hemostasis, maturation, proliferative
- 10) During hemostasis, termination of bleeding begins and blood clots are formed. What is in the blood clot that helps hold the wound together?
- ☐ A. Granulation
 - ☐ B. Hemes
 - ☒ C. Fibrin
 - ☐ D. Leucocytes
- 11) Definition of a Keloid
- ☐ A. A painful disease involving tissue damage
 - ☐ B. This is another phase of wound healing
 - ☐ C. Same as an eschar only with a lighter color
 - ☒ D. Overgrowth of a collagenous scar tissue at the site of the wound
- 12) What is granulation tissue?
- ☐ A. Composed of small microscopic grains of epitelial cells
 - ☐ B. A group of cells that form a grain
 - ☐ C. The tissue that remains after a scar is healed
 - ☒ D. Soft, pink, fleshy projections consisting of capillaries surrounded by fibrous collagen.

13) A patient who had an appendicitis removed early in the morning is having a hard time going to sleep because of coughing. What is the best non-pharmacological intervention that a nurse could provide him?

- ☒ A. Apply a pillow, rolled blanket, or the palms of the hands to the incisional area to lessen intraabdominal pressure
- B. Administer a PRN pain medication
- C. Call the surgeon and tell him to intervene
- D. Bind the wound with a Montgomery wrap

14) The process of applying a pillow, rolling a bath blanket, or the palms of the hands to an incisional area to decrease intraabdominal pressure is called what?

- A. Binding
- B. Wrapping
- ☒ C. Splinting
- D. Dressing

15) Which of the following groups are not a factor that could impair wound healing?

- A. Obesity, malnutrition and age
- B. Impaired oxygenation, radiation and smoking
- ☒ C. Height, weight and body mass
- D. Drugs, diabetes mellitus and wound stress

16) Which of the following is not an evidence of infection?

- A. Elevated WBC
- B. Purulent drainage
- ☒ C. Primary intention
- D. Increased leukocytes

17) All the following constitute significant fluid output EXCEPT:

- A. vomitus
- B. watery stools
- ☒ C. semi-formed stool
- D. urine

18) For patients on strict fluid monitoring, all the following inputs are worth noting EXCEPT:

- A. soup
- B. koko
- C. drinks
- ☒ D. diarrhoea

19) What is meant by healing by primary intention?

- A. Wounds are allowed to granulate.
- ☒ B. Skin edges are brought together and sutured, stapled, or glued.

- ...coughing.
- C. Rare meats
 - D. Whole grains

20. When nursing a terminally ill patient, all the following apply EXCEPT ----
- ~~A.~~ all decisions have to be made for the patient by the nurse since s/he is dying
 - B. pain control is a major aim of treatment
 - C. patients preferences should be considered
 - D. relatives are allowed private time with the patient

SECTION B

State whether each of the options following each of the questions is TRUE OR FALSE by writing F FOR FALSE AND T FOR TRUE, decide each answer options. Only one attempt is allowed. Each correct answer carries half mark.

21. When setting trolley for wound dressing,
- A. Bottles containing lotion are placed on the bottom shelf
 - B. Unwrapped sterile supplies are placed on the bottom shelf
 - ~~C.~~ Unwrapped sterile supplies are placed on the top shelf
 - D. Wrapped sterile supplies are placed on the top shelf
22. This is an indication for fluid and electrolyte monitoring ----
- ~~A.~~ dehydration
 - B. high body temperature
 - C. rapid pulse
 - D. severe bleeding
23. During wound healing by first intention, ----
- A. scar formation is minimal
 - ~~B.~~ wound edges are approximated
 - C. wounds are left open to heal
 - D. wounds take a long time to heal
24. In a terminally ill patient, when death is approaching, all the following may occur EXCEPT ----
- A. circulation slows down, resulting in changes in pulse.
 - ~~B.~~ incontinence of urine and stool may occur.
