

## MCQs: MICROBIOLOGY

### CHAPTER 22: UNIVERSITY PRESS

#### ANSWER ALL QUESTIONS

1. Which of the following is a double-stranded DNA virus?
  - a. SARS-CoV-2
  - b. MERS-CoV
  - c. Human papillomavirus
  - d. rhinovirus
2. Which of the following bacteria will give positive results for a coagulase test?
  - a. *S. epidermidis*
  - b. *S. saprophyticus*
  - c. *S. aureus*
  - d. *S. hominis*
3. Which enzyme is produced by *S. aureus* coagulates plasma resulting in fibrin deposition and interference with phagocytosis?
  - a. Lipase
  - b. Haemolysin
  - c. Coagulase
  - d. Hyaluronidase
4. Which of these organisms is a cestode?

**MCQs: MICROBIOLOGY**  
**CHAPTER 22: UNIVERSITY PRESS**

- a. *Fasciola hepatica*
  - b. *Tape worm*
  - c. *Paragonimus westermani*
  - d. *Guinea worm*
5. Which of the following is a sexually transmitted infection caused by a spirochete bacterium?
- a. Chlamydia
  - b. Gonorrhea
  - c. Syphilis
  - d. Herpes
6. What is the function of ribosomes in a bacterial cell?
- a. Synthesizing DNA
  - b. Producing ATP
  - c. Protein synthesis
  - d. Cell division
7. Which of the following culture methods is best for the agglutination test?
- a. Stroke culture
  - b. Streak culture
  - c. Lawn culture
  - d. Stab culture
8. Which of the following is positive for the oxidase test?
- a. *Pseudomonas*

**MCQs: MICROBIOLOGY**  
**CHAPTER 22: UNIVERSITY PRESS**

- b. Salmonella
  - c. Shigella
  - d. All of the above
9. Which of the following is indole positive?
- a. Klebsiella
  - b. Salmonella
  - c. *E. coli*
  - d. All of the above
10. Which of the following is positive for the urease test?
- a. Proteus
  - b. Salmonella
  - c. Klebsiella
  - d. a and c
11. which of the following is/are positive for the catalase test?
- a. Listeria
  - b. Pseudomonas
  - c. C. diphtheria
  - d. All of the above
12. Which of the following is a lactose fermenter?
- a. *E. coli*
  - b. Salmonella
  - c. Shigella
  - d. Proteus

**MCQs: MICROBIOLOGY**  
**CHAPTER 22: UNIVERSITY PRESS**

13. The capsid and the nucleic acid in the viral structure are referred to as
- a. Envelope
  - b. Nucleocapsid
  - c. Nucleoside
  - d. nucleosome
14. Which of the following is an enveloped virus?
- a. SARS-CoV-2
  - b. Human Papillomavirus
  - c. Poliovirus
  - d. All of the above
15. Which of the following is a naked virus?
- a. HIV
  - b. Ebola
  - c. SARS-CoV-2
  - d. Human Papillomavirus
16. The SARS-CoV-2 attaches itself to the host through which protein?
- a. S glycoprotein
  - b. Envelope
  - c. Nucleocapsid
  - d. Membrane
17. Which of the following is a viral vector vaccine?

**MCQs: MICROBIOLOGY**  
**CHAPTER 22: UNIVERSITY PRESS**

- a. AstraZeneca
- b. Sinopharm
- c. Sinovac
- d. Pfizer

18. The Varicella Zoster Virus (VZV) is an example of

- a. Rotavirus
- b. Herpesvirus
- c. Parvovirus
- d. All of the above

19. The individual units of the viral capsid are known as

- a. Capsid protein
- b. Capsomers
- c. Tegument
- d. Envelope

20. Which of the following fungi is said to be opportunistic?

- a. Aspergillus
- b. Candida
- c. Cryptococcus
- d. All of the above

21. Which of the following is a true fungal pathogen?

- a. Aspergillus
- b. Coccidioides
- c. Cryptococcus

**MCQs: MICROBIOLOGY**  
**CHAPTER 22: UNIVERSITY PRESS**

d. all of the above

22. Histoplasmosis is a condition caused by

- a. *Histoplasma capsulatum*
- b. *Histoplasma neoformans*
- c. Cryptococcus
- d. Aspergillus

23. Coccidioidomycosis is caused by

- a. *C. immitis*
- b. *C. immanitis*
- c. Cryptococcus

24. Histoplasma What is the primary method of transmission for Salmonella infections?

- a. Vector-borne transmission
- b. Fecal-oral transmission
- c. Droplet transmission
- d. Sexual contact

25. All the following Treponema species cause diseases in humans except:

- a. *T. carateum*
- b. *T. pallidum*
- c. *T. pertenue*

26. *T. paraluiscuniculi* Which microorganism(s) perform photosynthesis by utilizing light?

**MCQs: MICROBIOLOGY**  
**CHAPTER 22: UNIVERSITY PRESS**

- a. Cyanobacteria, fungi, and viruses
- b. Viruses
- c. Cyanobacteria
- d. Fungi

27. Which of the following is a Gram-positive bacterium?

- a. Staphylococcus
- b. Streptococcus
- c. Neisseria
- d. Bacillus

28. What is the primary function of capsules in bacterial cells?

- a. Facilitate cell division
- b. Aid in respiration
- c. Protect against antibiotics
- d. Aid attachment to host cells and protect against host defenses

29. Which of the following is a bacterial toxin that causes muscle paralysis by blocking acetylcholine release at neuromuscular junctions?

- a. Botulinum toxin
- b. Tetanus toxin
- c. Cholera toxin
- d. Diphtheria toxin

**MCQs: MICROBIOLOGY**  
**CHAPTER 22: UNIVERSITY PRESS**

30. Which hosts are involved in the life cycle of Plasmodium parasites?
- a. Mosquitoes only
  - b. Humans and mosquitoes
  - c. Birds and mosquitoes
31. Insect and mosquitoes Which family do herpes viruses belong to?
- a. Herpesviridae
  - b. Flaviviridae
  - c. Adenoviridae
  - d. Papillomaviridae
32. What term describes the process where blood leukocytes engulf disease-causing bacteria?
- a. Phagocytosis
  - b. Vaccination
  - c. Attenuation
  - d. Pinocytosis
33. All the following are gram-positive spherical bacteria, except
- a. *S. aureus*
  - b. *S. epidermidis*
  - c. *E. faecalis*
  - d. *E. coli*.
34. Bacteria with flagella clusters at both cell poles are known as?

**MCQs: MICROBIOLOGY**  
**CHAPTER 22: UNIVERSITY PRESS**

- a. Amphitrichous
- b. Monotrichous
- c. Lophotrichous
- d. Peritrichous

35. Which among the following is a spirochete?

- a. *Treponema pallidum*
- b. *Streptomyces sp.*
- c. *Streptococcus viridans*
- d. *Corynebacterium diphtheriae*

36. Common infections of *Cryptococcus neoformans* occurs in

- a. AIDS patients
- b. Cancer patients
- c. Diabetic patients
- d. All of the above

37. Filariasis is a condition caused by

- a. *Wuchereria bancrofti*
- b. *Ascaris lumbricoids*
- c. *Brugia malayi*
- d. *Ancylostoma duodenale*

38. Which of the following has a capsule around the cell wall?

- a. *Klebsiella pneumonia*
- b. *Vibrio cholerae*
- c. *Neisseria*

**MCQs: MICROBIOLOGY**  
**CHAPTER 22: UNIVERSITY PRESS**

d. All of the above

39. Which of the following is a psychrophile?

- a. *Pseudomonas fluorescens*
- b. *E. coli*
- c. *Bacillus stearothermophilus*
- d. *Staphylococcus aureus*

40. Which of the following is a mesophile?

- a. *E.coli*
- b. *Pseudomonas fluorescens*
- c. Thermococcus
- d. *B. stearothermophilus*
