

INFORMATIC'S MCQS

1. Informatics in Nursing and Midwifery Practice

Q1. Which of the following best describes nursing informatics?

- a) The use of computers for administrative tasks**
- b) The integration of nursing science with information management and analytical sciences to improve nursing practice**
- c) The use of social media for health education**
- d) The development of new medical devices**

Answer: b) The integration of nursing science with information management and analytical sciences to improve nursing practice

2. Tools Used in Information Technology

Q2. Which of the following is NOT an example of an IT tool used in healthcare?

- a) Electronic Health Records (EHRs)**
- b) Telemedicine devices**
- c) Traditional paper charts**
- d) Mobile health apps**

Answer: c) Traditional paper charts

3. Computer Systems and Fundamentals of ICT

Q3. Which component is essential for a computer system to process data?

- a) Monitor only**
- b) Central Processing Unit (CPU)**
- c) Printer**
- d) External hard drive**

Answer: b) Central Processing Unit (CPU)

4. Confidentiality, Security, and Consent

Q4. Which law primarily protects patient health information privacy in many countries?

- a) HIPAA**
- b) OSHA**
- c) FDA**
- d) CDC**

Answer: a) HIPAA

5. Internet Search & Web Technologies

Q5. Which of the following is a reliable way to verify health information found online?

- a) Check if the website is from a recognized health organization**
- b) Trust the first search result**
- c) Read user comments only**
- d) Assume all information on health forums is accurate**

Answer: a) Check if the website is from a recognized health organization

6. Examples of Social Networks in Health

Q6. Which social network platform is commonly used for professional health discussions?

- a) Facebook**
- b) LinkedIn**
- c) Instagram**
- d) Snapchat**

Answer: b) LinkedIn

7. Ensuring Quality & Best Use of Information

Q7. Which is a key factor in ensuring the quality of health data?

- a) Data completeness and accuracy
- b) Data age only
- c) Data format only
- d) Data volume only

Answer: a) Data completeness and accuracy

8. Healthcare Information System

Q8. HIT (Health Information Technology) encompasses systems used to:

- a) Manage patient data electronically
- b) Manufacture medical devices
- c) Distribute medication
- d) Train medical staff

Answer: a) Manage patient data electronically

9. Electronic Health Records (EHR), Scanned vs Paper Records

Q9. A major advantage of electronic health records over paper records is:

- a) Increased risk of data loss
- b) Easier data sharing and accessibility
- c) Higher costs
- d) Less security

Answer: b) Easier data sharing and accessibility

10. Nursing Informatics Standards

Q10. The goal of nursing informatics standards is to:

- a) Standardize patient care procedures only
- b) Ensure consistency and quality in health data exchange
- c) Limit the use of computers in nursing

d) Eliminate paper records entirely

Answer: b) Ensure consistency and quality in health data exchange

11. Computer File Systems

Q11. Which file system organization method arranges files in folders and subfolders?

- a) Hierarchical file system**
- b) Flat file system**
- c) Indirect file system**
- d) Random access file system**

Answer: a) Hierarchical file system

12. Introduction to MS Word and MS Excel

Q12. Which feature in MS Word allows you to create a table?

- a) Insert > Table**
- b) File > Save As**
- c) Review > Spelling & Grammar**
- d) View > Layout**

Answer: a) Insert > Table

13. Use of MS Excel in Nursing

Q13. Which function in MS Excel could be used for calculating average patient recovery time?

- a) SUM()**
- b) AVERAGE()**
- c) CONCATENATE()**
- d) VLOOKUP()**

Answer: b) AVERAGE()

1. Informatics in Nursing and Midwifery Practice

Q14. How does nursing informatics support clinical decision-making?

- a) By replacing nurses with computers**
- b) By providing evidence-based data and alerts**
- c) By eliminating the need for documentation**
- d) By managing only administrative tasks**

Answer: b) By providing evidence-based data and alerts

2. Tools Used in Information Technology

Q15. Which device is commonly used for telehealth consultations?

- a) Blood pressure cuff**
- b) Webcam and microphone**
- c) Glucometer**
- d) Stethoscope**

Answer: b) Webcam and microphone

3. Computer Systems & Fundamentals of ICT

Q16. What is a primary function of an Operating System (OS)?

- a) To develop medical software**
- b) To manage hardware and software resources**
- c) To connect to the internet**
- d) To store patient data**

Answer: b) To manage hardware and software resources

4. Confidentiality, Security, and Consent

Q17. Which of the following is an example of informed consent in a digital environment?

- a) Clicking "Agree" without reading**
- b) Understanding and agreeing to a digital privacy policy before data collection**
- c) Assumption of consent by default**
- d) Sharing login credentials with others**

Answer: b) Understanding and agreeing to a digital privacy policy before data collection

5. Internet Search & Web Technologies

Q18. Which of these is a secure way to perform medical research online?

- a) Use encrypted websites with HTTPS**
- b) Use any search engine without validation**
- c) Download files from unknown sources**
- d) Rely solely on social media posts**

Answer: a) Use encrypted websites with HTTPS

6. Examples of Social Networks in Health

Q19. Which type of social media platform is ideal for sharing short health tips or updates?

- a) Facebook**
- b) Twitter**
- c) LinkedIn**
- d) Pinterest**

Answer: b) Twitter

7. Ensuring Quality & Best Use of Information

Q20. To ensure best use of health information, professionals should:

- a) Verify sources and validate data before use**
- b) Share incomplete information**

- c) Rely solely on personal opinion
- d) Avoid updating records regularly

Answer: a) Verify sources and validate data before use

8. Healthcare Information System

Q21. Which component is essential in a healthcare information system to facilitate communication between healthcare providers?

- a) Data warehouse
- b) Communication network (e.g., HL7 messaging)
- c) Billing software
- d) Logbook

Answer: b) Communication network (e.g., HL7 messaging)

9. EHR, Scanned Records, Paper Records

Q22. One challenge of electronic health records is:

- a) Easy access to data
- b) Data security concerns
- c) Reduced data accuracy
- d) Limited storage capacity

Answer: b) Data security concerns

10. Nursing Informatics Standards

Q23. The HIMSS (Healthcare Information and Management Systems Society) model primarily aims to:

- a) Develop new hardware
- b) Standardize EHR implementation and data exchange
- c) Replace nurses with IT systems
- d) Standardize patient diets

Answer: b) Standardize EHR implementation and data exchange

11. Computer File System

Q24. In a typical computer file system, which of the following is used to locate a specific file?

- a) Path name or file path**
- b) File size**
- c) Time of creation**
- d) File permissions**

Answer: a) Path name or file path

12. Introduction to MS Word

Q25. Which feature in MS Word helps in spelling and grammar correction?

- a) Review > Spelling & Grammar**
- b) Insert > Header**
- c) View > Ruler**
- d) File > Export**

Answer: a) Review > Spelling & Grammar

13. Introduction to MS Excel

Q26. Which of the following functions in MS Excel is used to combine data from multiple cells?

- a) CONCATENATE()**
- b) SUM()**
- c) AVERAGE()**
- d) COUNT()**

Answer: a) CONCATENATE()

Additional Questions Covering Various Aspects

Informatics as used in nursing and midwifery practices

Q27. What is the primary purpose of nursing informatics?

- a) To automate nurse staffing**
- b) To improve patient care through technology and data management**
- c) To eliminate paper documentation only**
- d) To develop new medicines**

Answer: b) To improve patient care through technology and data management

Tools used in healthcare IT

Q28. Which of the following is a hardware tool used in telehealth?

- a) ECG monitor**
- b) Smartphone with internet access**
- c) Medical journal**
- d) Patient education pamphlet**

Answer: b) Smartphone with internet access

Confidentiality, Security, and Consent

Q29. Which action ensures confidentiality when discussing patient information?

- a) Discussing in public areas**
- b) Using password-protected devices and encrypted communication**
- c) Sharing passwords with colleagues**
- d) Writing details in unsecure notebooks**

Answer: b) Using password-protected devices and encrypted communication

Internet & Web Technologies

Q30. Which protocol provides secure communication over the internet?

- a) HTTP
- b) HTTPS
- c) FTP
- d) SMTP

Answer: b) HTTPS

Social Networks in Health

Q31. A health professional using Facebook for patient education must:

- a) Share confidential information openly
- b) Maintain professional boundaries and protect patient privacy
- c) Post patient records publicly
- d) Avoid professional interactions altogether

Answer: b) Maintain professional boundaries and protect patient privacy

Quality & Best Use of Information

Q32. Which is a criterion for evaluating health information quality?

- a) Source credibility
- b) Popularity on social media
- c) Length of the information
- d) Use of technical jargon only

Answer: a) Source credibility

Healthcare Systems & Records

Q33. An advantage of optically scanned records over paper records is:

- a) Reduced preservation cost and space
- b) Increased handwriting errors
- c) Reduced clarity of patient data

d) Higher risk of physical damage

Answer: a) Reduced preservation cost and space

Standards in Nursing Informatics

Q34. The SNOMED CT terminology system assists in:

- a) Billing processes only**
- b) Standardized clinical documentation and coding**
- c) Hardware manufacturing**
- d) Electronic prescribing only**

Answer: b) Standardized clinical documentation and coding

Computer File Systems

Q35. What is the purpose of file permissions in a computer system?

- a) To increase file size**
- b) To control who can access or modify files**
- c) To archive files automatically**
- d) To delete files**

Answer: b) To control who can access or modify files

Introduction to MS Word & MS Excel

Q36. Which feature in MS Word allows you to create lists and outlines?

- a) Paragraph formatting**
- b) Outline View**
- c) Mail Merge**
- d) Track Changes**

Answer: b) Outline View

1. Informatics in Nursing and Midwifery Practice

Q37. Which of the following skills is most important for a nurse working in informatics?

- a) Advanced medical coding skills**
- b) Strong understanding of computer systems and data management**
- c) Ability to perform surgeries**
- d) Expertise in pharmacology only**

Answer: b) Strong understanding of computer systems and data management

2. Tools Used in Information Technology

Q38. Which of the following is an example of a decision support tool in healthcare?

- a) Electronic Medication Administration Record (eMAR)**
- b) Blood glucose monitor**
- c) Smartwatch health app**
- d) Automated nurse call system**

Answer: a) Electronic Medication Administration Record (eMAR)

3. Computer Systems & Fundamentals of ICT

Q39. Cloud computing in healthcare primarily allows for:

- a) Local data storage only**
- b) Remote access to data and applications via the internet**
- c) Faster hardware processing only**
- d) Manual data entry**

Answer: b) Remote access to data and applications via the internet

4. Confidentiality, Security, and Consent

Q40. Which of the following best describes "security breach" in healthcare IT?

- a) Unauthorized access or disclosure of protected health information (PHI)**
- b) Updating patient records regularly**
- c) Securing system passwords properly**
- d) Encrypting data during transmission**

Answer: a) Unauthorized access or disclosure of protected health information (PHI)

5. Internet Search & Web Technologies

Q41. To ensure privacy while searching health information online, a user should:

- a) Use a VPN (Virtual Private Network)**
- b) Search without logging out of their account**
- c) Share search results with colleagues**
- d) Use only public Wi-Fi networks**

Answer: a) Use a VPN (Virtual Private Network)

6. Examples of Social Networks in Health

Q42. Which of the following social networking sites is most used for patient support groups?

- a) LinkedIn**
- b) Facebook Groups**
- c) Instagram**
- d) TikTok**

Answer: b) Facebook Groups

7. Ensuring Quality & Best Use of Information

Q43. Which principle is most relevant when evaluating health data quality?

- a) Bias susceptibility**

- b) Data consistency and completeness**
- c) Length of data entries**
- d) Frequency of data entry**

Answer: b) Data consistency and completeness

8. Health Care Information System

Q44. Which of the following is a primary function of a Clinical Decision Support System (CDSS)?

- a) Automate billing processes**
- b) Assist healthcare providers in making clinical decisions based on data**
- c) Manage staff schedules**
- d) Store administrative documents**

Answer: b) Assist healthcare providers in making clinical decisions based on data

9. EHR, Optically Scanned Records, Paper Records

Q45. One disadvantage of scanned records compared to digital-native EHRs is:

- a) They are less secure**
- b) They might be hard to search or index effectively**
- c) They are more expensive to store**
- d) They are less likely to be compliant with standards**

Answer: b) They might be hard to search or index effectively

10. Nursing Informatics Standards

Q46. HL7 (Health Level Seven) standards are used to:

- a) Standardize coding of diagnoses only**
- b) Enable interoperability between healthcare systems**
- c) Define billing procedures**
- d) Create new medications**

Answer: b) Enable interoperability between healthcare systems

11. Computer File Systems

Q47. What is a common feature of a relational database used in healthcare?

- a) Data stored in unconnected files**
- b) Data organized into tables with relationships**
- c) Data stored only as images**
- d) Data formatted as text files only**

Answer: b) Data organized into tables with relationships

12. Introduction to MS Word

Q48. How can you quickly change the entire document's formatting in MS Word?

- a) Use styles and themes**
- b) Use the spell check feature**
- c) Insert a table**
- d) Use the Review tab**

Answer: a) Use styles and themes

13. Introduction to MS Excel

Q49. Which feature is used to visually analyze data in MS Excel?

- a) Conditional Formatting**
- b) Format Painter**
- c) Cell Styles**
- d) Insert > Chart**

Answer: d) Insert > Chart

Q50. In midwifery, nursing informatics can help in:

- a) Automating delivery procedures**
- b) Tracking pregnancy progress and neonatal data**
- c) Eliminating need for patient interaction**
- d) Replacing midwives with robots**

Answer: b) Tracking pregnancy progress and neonatal data

Tools in Healthcare IT

Q51. Which device is essential for remote monitoring of vital signs in telemonitoring programs?

- a) Xbox console**
- b) Wearable biosensor device**
- c) Desktop computer**
- d) Traditional thermometer**

Answer: b) Wearable biosensor device

Confidentiality & Security

Q52. Which measure best ensures secure access to patient data on a hospital network?

- a) Using strong, unique passwords and two-factor authentication**
- b) Sharing passwords with colleagues**
- c) Leaving computers unlocked when away**
- d) Not updating security software**

Answer: a) Using strong, unique passwords and two-factor authentication

Web Technologies & Internet Searches

Q53. When searching scholarly health literature, which resource is most reliable?

- a) Google Scholar**
- b) Personal blogs**

- c) Unverified medical forums
- d) Random website ads

Answer: a) Google Scholar

Social Networks in Healthcare

Q54. Which platform is most appropriate for professional healthcare networking?

- a) LinkedIn
- b) TikTok
- c) Snapchat
- d) Pinterest

Answer: a) LinkedIn

Quality and Data Use

Q55. What practice enhances accurate clinical decision-making?

- a) Data validation and audit trails
- b) Ignoring data discrepancies
- c) Relying only on memory
- d) Avoiding data documentation

Answer: a) Data validation and audit trails

Healthcare Information Systems and Records

Q56. Which of these is a characteristic of a well-designed EHR system?

- a) Enables data sharing across different healthcare providers
- b) Data can only be entered once
- c) Only accessible on-site
- d) Does not support decision-making

Answer: a) Enables data sharing across different healthcare providers

Standards in Nursing Informatics

Q57. Which international standard supports the exchange of clinical information?

- a) SNOMED CT**
- b) ISO 9001**
- c) IEEE 802.11**
- d) FDA regulations**

Answer: a) SNOMED CT

Computer File System & MS Word/Excel

Q58. In MS Word, which feature helps track changes made during document editing?

- a) Track Changes**
- b) Style Painting**
- c) AutoCorrect**
- d) Mail Merge**

Answer: a) Track Changes

Q59. In MS Excel, how do you freeze panes so that headers remain visible?

- a) View > Freeze Panes**
- b) Data > Sort**
- c) Insert > Header & Footer**
- d) Formulas > Calculate**

Answer: a) View > Freeze Panes

1. Informatics in Nursing and Midwifery Practice

Q60. Which skill is most crucial for nurses to effectively utilize health informatics tools?

- a) Proficient in medical coding only**
- b) Knowledge of data entry and basic IT literacy**
- c) Advanced pharmacology**
- d) Ability to perform surgeries**

Answer: b) Knowledge of data entry and basic IT literacy

2. Tools Used in Information Technology

Q61. Which device is essential for capturing patient vital signs electronically?

- a) Digital blood pressure cuff**
- b) Manual stethoscope**
- c) Traditional thermometer**
- d) Flash drive**

Answer: a) Digital blood pressure cuff

3. Computer Systems & Fundamentals of ICT

Q62. What is virtualization in ICT?

- a) Running multiple operating systems on a single physical machine**
- b) Physical server deployment**
- c) Hardware encryption techniques**
- d) Data backup process**

Answer: a) Running multiple operating systems on a single physical machine

4. Confidentiality, Security, and Consent

Q63. Which action fails to ensure patient confidentiality?

- a) Encrypting transmitted data**
- b) Regularly updating passwords**

- c) Leaving patient charts unlocked at a nurse station**
- d) Limiting access to authorized personnel**

Answer: c) Leaving patient charts unlocked at a nurse station

5. Internet Search & Web Technologies

Q64. Which tool is useful for verifying the credibility of health websites?

- a) Checking for HTTPS and domain reputation**
- b) Trusting any first search result**
- c) Relying only on social media posts**
- d) Considering only paid advertisements**

Answer: a) Checking for HTTPS and domain reputation

6. Social Networks in Health

Q65. Which platform is specifically designed for professional healthcare networking and education?

- a) LinkedIn**
- b) Facebook**
- c) TikTok**
- d) Instagram**

Answer: a) LinkedIn

7. Ensuring Quality & Best Use of Information

Q66. To maintain data integrity, healthcare workers should:

- a) Document data immediately after collection**
- b) Rely on memory for documentation**
- c) Share patient info openly on social networks**
- d) Avoid double-checking data entries**

Answer: a) Document data immediately after collection

8. Healthcare Information System

Q67. What is the primary benefit of implementing an integrated Electronic Health Record (EHR) system?

- a) Eliminates need for specialized staff**
- b) Facilitates comprehensive patient data access across providers**
- c) Reduces patient care quality**
- d) Limits data to only one department**

Answer: b) Facilitates comprehensive patient data access across providers

9. EHR, Scanned Records, Paper Records

Q68. A key disadvantage of scanned paper records?

- a) Difficult to index and search efficiently**
- b) Increased physical storage needs**
- c) Decreased security**
- d) Less access from multiple locations**

Answer: a) Difficult to index and search efficiently

10. Nursing Informatics Standards

Q69. The American Nursing Association (ANA) promotes standards for nursing informatics that focus on:

- a) Improving workflow only**
- b) Enhancing patient safety and data quality**
- c) Increasing nurse workload**
- d) Eliminating documentation**

Answer: b) Enhancing patient safety and data quality

11. Computer File Systems

Q70. Which of the following is a feature of a flat file system?

- a) Data stored in a single, unstructured file**
- b) Data organized in relational tables**
- c) Data linked through keys**
- d) Multiple nested directories**

Answer: a) Data stored in a single, unstructured file

12. Introduction to MS Word

Q71. To automatically generate a table of contents in MS Word, which feature should be used?

- a) Heading styles and References > Table of Contents**
- b) Insert > Table**
- c) Review > Track Changes**
- d) View > Split**

Answer: a) Heading styles and References > Table of Contents

13. Introduction to MS Excel

Q72. How can Excel be used for statistical analysis?

- a) Using formulas like AVERAGE, STDEV, and COUNTIF**
- b) Creating text documents**
- c) Formatting pictures**
- d) Sending emails**

Answer: a) Using formulas like AVERAGE, STDEV, and COUNTIF

Q73. Why is it important for nurses to understand health informatics standards?

- a) To develop new hardware systems**

- b) To ensure interoperability and accurate data exchange**
- c) To replace clinical judgment**
- d) To avoid documentation**

Answer: b) To ensure interoperability and accurate data exchange

Tools in Healthcare IT

Q74. Which is an example of a decision-making support system?

- a) Computerized Physician Order Entry (CPOE) with alerts**
- b) A standard desktop computer**
- c) A paper-based form**
- d) A hospital lobby sign**

Answer: a) Computerized Physician Order Entry (CPOE) with alerts

Confidentiality & Security

Q75. Which technology enhances the security of patient data during transmission?

- a) WPA2 encryption for Wi-Fi**
- b) Sharing passwords with colleagues**
- c) Using unencrypted email**
- d) Disabling firewalls**

Answer: a) WPA2 encryption for Wi-Fi

Web Technologies & Internet Search

Q76. Which of the following is essential for protecting health information during online research?

- a) Use of secure, HTTPS-enabled websites and VPNs**
- b) Disabling antivirus software**
- c) Saving passwords in plain text files**
- d) Ignoring site credibility**

Answer: a) Use of secure, HTTPS-enabled websites and VPNs

Social Networks and Professional Collaborations

Q77. Which social media feature supports professional networking among healthcare providers?

- a) Groups and forums**
- b) Likes and shares only**
- c) Live streaming only**
- d) Stories and filters only**

Answer: a) Groups and forums

Data Quality in Healthcare

Q78. What is essential for maintaining high-quality healthcare data?

- a) Ongoing data validation and cleaning**
- b) Ignoring duplicate entries**
- c) Relying on outdated data**
- d) Ensuring data is unstructured**

Answer: a) Ongoing data validation and cleaning

Healthcare Information System

Q79. Which is a major feature of a health information system?

- a) Automating administrative tasks without clinical data**
- b) Facilitating clinical workflows and data sharing**
- c) Eliminating need for healthcare providers**
- d) Limiting access to patient data**

Answer: b) Facilitating clinical workflows and data sharing

Standards in Nursing Informatics

Q80. Which standard is used for coding diagnoses and procedures in clinical documentation?

- a) ICD (International Classification of Diseases)**
- b) ISO 27001**
- c) IEEE 802.11**
- d) HIPAA**

Answer: a) ICD (International Classification of Diseases)

Computer File System & MS Word

Q81. What is the purpose of creating templates in MS Word?

- a) To ensure consistency in document formatting**
- b) To insert images automatically**
- c) To perform spell checks**
- d) To automate table creation**

Answer: a) To ensure consistency in document formatting

Introduction to MS Excel

Q82. Which feature in Excel helps in analyzing large data sets with filtering options?

- a) AutoFilter**
- b) Data Validation**
- c) Conditional Formatting**
- d) Data Consolidation**

Answer: a) AutoFilter

Continuing with MCQs to reach 150

1. Informatics in Nursing and Midwifery Practice

Q83. Which is a key benefit of nursing informatics?

- a) Increased documentation errors
- b) Improved patient safety and quality of care
- c) Reduced access to patient data
- d) Eliminating the need for clinical supervision

Answer: b) Improved patient safety and quality of care

2. Tools Used in Information Technology

Q84. Which device can be used to record and transmit patient ECG data remotely?

- a) Telemetry monitor
- b) Blood glucose meter
- c) Traditional stethoscope
- d) Digital thermometer

Answer: a) Telemetry monitor

3. Computer Systems & Fundamentals of ICT

Q85. What does the term "big data" in healthcare refer to?

- a) Large, complex sets of healthcare data that require advanced tools to analyze
- b) Only paper-based records
- c) Small data sets for individual patients
- d) Data stored on physical disks only

Answer: a) Large, complex sets of healthcare data that require advanced tools to analyze

4. Confidentiality, Security, and Consent

Q86. Which principle is fundamental for maintaining confidentiality in health care?

- a) Informed consent
- b) Data encryption and access controls
- c) Rapid data entry

d) Open sharing of patient information

Answer: b) Data encryption and access controls

5. Internet Search & Web Technologies

Q87. Which feature helps in identifying peer-reviewed articles for health research?

a) PubMed or Medline databases

b) Random internet search

c) Facebook posts

d) News websites

Answer: a) PubMed or Medline databases

6. Examples of Social Networks in Health

Q88. Which platform is preferable for professional teleconsultation and resource sharing among healthcare providers?

a) LinkedIn

b) Instagram

c) TikTok

d) Snapchat

Answer: a) LinkedIn

7. Ensuring Quality & Best Use of Information

Q89. What is an effective method to verify the accuracy of health data before use?

a) Cross-check data with multiple sources

b) Trust unverified online posts

c) Use data without validation

d) Rely solely on older data

Answer: a) Cross-check data with multiple sources

8. Healthcare Information System

Q90. A bedside terminal that allows nurses to document patient care directly at the point of care is called:

- a) Point-of-care (POC) documentation system**
- b) Central server**
- c) External hard drive**
- d) Fax machine**

Answer: a) Point-of-care (POC) documentation system

9. EHR, Scanned Records, Paper Records

Q91. Which is a disadvantage of paper records compared to EHRs?

- a) Difficult to share remotely**
- b) More secure from hacking**
- c) Lower storage costs**
- d) Easier to access from different locations**

Answer: a) Difficult to share remotely

10. Nursing Informatics Standards

Q92. Which organization sets standards to promote the interoperability of nursing data?

- a) HL7 (Health Level Seven International)**
- b) WHO**
- c) OSHA**
- d) FDA**

Answer: a) HL7 (Health Level Seven International)

11. Computer File Systems

Q93. In a typical digital file system, what is a 'shortcut' used for?

- a) Quickly accessing a file or application**
- b) Backing up data**
- c) Encrypting files**
- d) Depicting file version history**

Answer: a) Quickly accessing a file or application

12. Introduction to MS Word

Q94. Which step is necessary to add page numbers in MS Word?

- a) Insert > Page Number**
- b) Review > Track Changes**
- c) Layout > Margins**
- d) View > Split**

Answer: a) Insert > Page Number

13. Introduction to MS Excel

Q95. In MS Excel, which function can be used to look up data in a table?

- a) VLOOKUP()**
- b) SUM()**
- c) COUNT()**
- d) CONCATENATE()**

Answer: a) VLOOKUP()

Q96. How does clinical decision support improve nursing practice?

- a) By providing evidence-based recommendations at the point of care**
- b) By replacing nurses in clinical decision-making**

- c) By ensuring only administrative tasks are performed electronically
- d) By eliminating documentation requirements

Answer: a) By providing evidence-based recommendations at the point of care

Tools Used in Healthcare IT

Q97. Which hardware device is vital for remote patient monitoring?

- a) Wearable biosensors
- b) Standard computer mouse
- c) Digital camera
- d) Automated blood pressure cuff only in clinics

Answer: a) Wearable biosensors

Confidentiality & Security

Q98. What is the purpose of malware protection software in healthcare IT?

- a) To protect against unauthorized intrusions and data breaches
- b) To make the system run faster
- c) To ensure data is printed securely
- d) To backup data automatically

Answer: a) To protect against unauthorized intrusions and data breaches

Web Technologies & Internet Search

Q99. Which best practices should be followed when sharing patient data online?

- a) Anonymize data and ensure encrypted communication
- b) Share via unsecured email
- c) Post patient details on social media
- d) Use insecure websites for transmission

Answer: a) Anonymize data and ensure encrypted communication

Social Networks and Professional Collaborations

Q100.

Q101. What is a primary goal of nursing informatics?

- a) Reduce documentation requirements**
- b) Improve patient safety and care quality through data management**
- c) Remove nurses from direct patient care**
- d) Develop new medical devices**

Answer: b) Improve patient safety and care quality through data management

2. Tools Used in Information Technology

Q102. Which device is used to remotely monitor a patient's heart rhythm?

- a) ECG monitor**
- b) Digital thermometer**
- c) Pulse oximeter**
- d) Blood pressure cuff**

Answer: a) ECG monitor

3. Computer Systems & Fundamentals of ICT

Q103. What is a primary purpose of cloud computing in healthcare?

- a) Store and access data remotely and securely**
- b) Only backup data locally**
- c) Creating physical copies of records**
- d) Restrict data access to one device only**

Answer: a) Store and access data remotely and securely

4. Confidentiality, Security, and Consent

Q104. Which of the following best describes "phishing" in healthcare IT security?

- a) Fraudulent attempts to obtain sensitive data by pretending to be trustworthy**
- b) Legitimate email asking for patient feedback**
- c) Secure login process**
- d) Routine software updates**

Answer: a) Fraudulent attempts to obtain sensitive data by pretending to be trustworthy

5. Internet Search & Web Technologies

Q105. Which of the following is a primary use of PubMed?

- a) To find peer-reviewed medical literature and research articles**
- b) To post patient reviews**
- c) To share personal health stories**
- d) To buy medical equipment**

Answer: a) To find peer-reviewed medical literature and research articles

6. Examples of Social Networks in Health

Q106. Which social media platform is most suitable for professional networking and continuing education in healthcare?

- a) LinkedIn**
- b) TikTok**
- c) YouTube**
- d) Reddit**

Answer: a) LinkedIn

7. Ensuring Quality & Best Use of Information

Q107. When using health data for research, what is a key ethical consideration?

- a) Ensuring patient confidentiality and obtaining informed consent**
- b) Sharing data freely on social media**
- c) Ignoring data accuracy to speed up research**
- d) Using data without validation**

Answer: a) Ensuring patient confidentiality and obtaining informed consent

8. Healthcare Information System

Q108. Which of the following is an example of a clinical information system?

- a) Laboratory Information System (LIS)**
- b) Billing Software Only**
- c) Office Word Processor**
- d) Image editing software**

Answer: a) Laboratory Information System (LIS)

9. EHR, Scanned Records, Paper Records

Q109. Which of the following is a benefit of electronic records over paper records?

- a) Easier to share and access remotely**
- b) Less secure from hacking**
- c) More costly to store**
- d) Less reliable for legal purposes**

Answer: a) Easier to share and access remotely

10. Nursing Informatics Standards

Q110. The goal of interoperability standards like HL7 is to:

- a) Enable seamless data exchange among different health IT systems**
- b) Create proprietary data formats**

- c) Limit access to data**
- d) Prevent communication across systems**

Answer: a) Enable seamless data exchange among different health IT systems

11. Computer File Systems

Q111. Which access control method restricts users from viewing or modifying certain files?

- a) Permissions and access rights**
- b) File compression**
- c) File encryption only**
- d) Data recovery options**

Answer: a) Permissions and access rights

12. Introduction to MS Word

Q112. Which feature in MS Word allows you to automatically correct repetitive typing errors?

- a) AutoCorrect**
- b) Track Changes**
- c) Styles**
- d) Header and Footer**

Answer: a) AutoCorrect

13. Introduction to MS Excel

Q113. How do you quickly sum a range of cells in Excel?

- a) Use the SUM() function**
- b) Use the CONCATENATE() function**
- c) Use VLOOKUP()**
- d) Use the AVERAGE() function**

Answer: a) Use the SUM() function

1. Informatics in Nursing and Midwifery Practice

Q114. Which of the following is an example of using informatics to improve patient safety?

- a) Automated allergy alerts during prescribing**
- b) Manual record keeping**
- c) Verbal communication only**
- d) Avoiding electronic documentation**

Answer: a) Automated allergy alerts during prescribing

2. Tools Used in Information Technology

Q115. Which device is essential for remote telehealth consultations?

- a) Webcam and microphone**
- b) Manual thermometer**
- c) Blood pressure cuff**
- d) Skin temperature scanner**

Answer: a) Webcam and microphone

3. Computer Systems & Fundamentals of ICT

Q116. What does "EMR" stand for?

- a) Electronic Medical Record**
- b) Emergency Management Response**
- c) Electronic Manufacturing Resources**
- d) Enhanced Medical Routine**

Answer: a) Electronic Medical Record

4. Confidentiality, Security, and Consent

Q117. Which of the following practices helps ensure patient data security?

- a) Using strong passwords and encrypted connections**
- b) Writing passwords on sticky notes**
- c) Sharing login credentials**
- d) Disabling firewalls for easier access**

Answer: a) Using strong passwords and encrypted connections

5. Internet Search & Web Technologies

Q118. Which domain suffix indicates a website registered in the United States?

- a) .com**
- b) .uk**
- c) .us**
- d) .edu**

Answer: c) .us

6. Examples of Social Networks in Health

Q119. Which social platform is best suited for sharing educational videos for health professionals?

- a) YouTube**
- b) Facebook**
- c) Instagram**
- d) Snapchat**

Answer: a) YouTube

7. Ensuring Quality & Best Use of Information

Q120. Which practice enhances the reliability of clinical data?

- a) Regular audits and validation checks**
- b) Ignoring discrepancies**

- c) Relying on incomplete data
- d) Using outdated standards

Answer: a) Regular audits and validation checks

8. Healthcare Information System

Q121. What is a main purpose of a Medication Administration Record (MAR) system?

- a) To track and document medication administration
- b) To schedule appointments only
- c) To handle billing processes
- d) To record staff work hours

Answer: a) To track and document medication administration

9. EHR, Scanned Records, Paper Records

Q122. Which is a common challenge associated with scanned paper records?

- a) Difficult to search and organize electronically
- b) More secure than electronic records
- c) Cheaper to manage long-term
- d) Less prone to data loss

Answer: a) Difficult to search and organize electronically

10. Nursing Informatics Standards

Q123. Which organization developed the Nursing Minimum Data Set (NMDS) standards?

- a) American Nurses Association (ANA)
- b) WHO
- c) HL7 International
- d) CDC

Answer: a) American Nurses Association (ANA)

11. Computer File Systems

Q124. Which term describes organizing files in a hierarchical manner with folders and subfolders?

- a) Directory structure**
- b) Flat file system**
- c) Data warehouse**
- d) Network topology**

Answer: a) Directory structure

12. Introduction to MS Word

Q125. To insert a footnote in MS Word, you should go to:

- a) References > Insert Footnote**
- b) Insert > Table**
- c) Review > Track Changes**
- d) Layout > Margins**

Answer: a) References > Insert Footnote

13. Introduction to MS Excel

Q126. Which feature can help identify trends in data by highlighting cells that meet certain conditions?

- a) Conditional Formatting**
- b) Data Validation**
- c) Charts and Graphs**
- d) Filters only**

Answer: a) Conditional Formatting

1. Informatics & Data Management

Q127. Which aspect is crucial when implementing a new EHR system?

- a) User training and system customization**
- b) Avoiding user feedback**
- c) Limiting access to all users**
- d) Manual data backup only**

Answer: a) User training and system customization

Q128. Which of the following is a key benefit of clinical decision support systems (CDSS)?

- a) Automates all patient care decisions entirely**
- b) Supports clinicians with evidence-based recommendations, reducing errors**
- c) Eliminates the need for clinical judgment**
- d) Only performs billing and administrative tasks**

Answer: b) Supports clinicians with evidence-based recommendations, reducing errors

2. Tools Used in Information Technology

Q129. Which device is essential for remote patient monitoring of oxygen saturation?

- a) Pulse oximeter**
- b) Blood pressure cuff**
- c) Glucometer**
- d) Thermometer**

Answer: a) Pulse oximeter

3. Computer Systems & Fundamentals of ICT

Q130. What is one primary purpose of data encryption?

- a) Protect data confidentiality during transmission or storage**
- b) Speed up data transfer**

- c) Convert data to non-readable formats for presentation
- d) Compress large data files

Answer: a) Protect data confidentiality during transmission or storage

4. Confidentiality, Security, and Consent

Q131. Which of the following is an ethical obligation regarding patient consent?

- a) Patients must give informed consent before procedures and data sharing
- b) Consent is optional for routine procedures
- c) Consent is only required when using paper records
- d) Verbal consent suffices in all situations

Answer: a) Patients must give informed consent before procedures and data sharing

5. Internet Search & Web Technologies

Q132. When trying to find peer-reviewed medical research online, which site is most reliable?

- a) PubMed
- b) Wikipedia
- c) Facebook
- d) Commercial blogs

Answer: a) PubMed

6. Examples of Social Networks in Health

Q133. Which social media feature facilitates patient support and education?

- a) Facebook groups and communities
- b) Dislike buttons
- c) Only paid advertisements
- d) Personal messaging apps only for friends

Answer: a) Facebook groups and communities

7. Ensuring Quality & Best Use of Information

Q134. What is a best practice for maintaining data integrity?

- a) Regular data validation and audit procedures**
- b) Relying only on initial data entry**
- c) Sharing data without validation**
- d) Avoiding updates and audits**

Answer: a) Regular data validation and audit procedures

8. Healthcare Information System

Q135. Which technology supports secure communication and data sharing across different health systems?

- a) HL7 (Health Level Seven) standards**
- b) MS Word**
- c) ICD-10 coding**
- d) Microsoft Excel**

Answer: a) HL7 (Health Level Seven) standards

9. EHR, Scanned Records, Paper Records

Q136. What is a major limitation of scanned paper records compared to native EHRs?

- a) Difficult to search and index efficiently**
- b) More secure from hacking**
- c) Cheaper to store**
- d) Easier to access remotely**

Answer: a) Difficult to search and index efficiently

10. Nursing Informatics Standards

Q137. Which organization globally promotes standards to improve nursing informatics?

- a) SNOMED International**
- b) OSHA**
- c) WHO**
- d) ISO**

Answer: a) SNOMED International

11. Computer File Systems

Q138. In file management, what is version control?

- a) Tracking changes and maintaining multiple versions of a document**
- b) Creating backups of files**
- c) Compressing files for storage**
- d) Encrypting files for security**

Answer: a) Tracking changes and maintaining multiple versions of a document

12. Introduction to MS Word

Q139. How can you automatically generate a table of contents in MS Word?

- a) Using heading styles and the References > Table of Contents feature**
- b) Manually typing the titles and page numbers**
- c) Using Insert > Table**
- d) Using Layout > Margins**

Answer: a) Using heading styles and the References > Table of Contents feature

13. Introduction to MS Excel

Q140. Which feature in Excel allows you to analyze data visually?

- a) Charts and Graphs**

- b) Data Validation**
- c) Text Formatting**
- d) Cell Highlighting only**

Answer: a) Charts and Graphs

Q141. Which of the following best demonstrates the use of informatics to improve patient safety?

- a) Implementing clinical alerts for drug interactions in EHR systems**
- b) Eliminating electronic documentation**
- c) Removing decision support tools**
- d) Relying solely on manual chart review**

Answer: a) Implementing clinical alerts for drug interactions in EHR systems

2. Tools Used in Information Technology

Q142. What device is used to perform remote vital signs monitoring in telehealth?

- a) Wearable biosensor device**
- b) Desktop computer**
- c) Traditional stethoscope**
- d) Printout thermometer**

Answer: a) Wearable biosensor device

3. Computer Systems & Fundamentals of ICT

Q143. Which term describes a system that allows multiple users to access and modify shared data simultaneously?

- a) Client-server architecture**
- b) Standalone system**
- c) Flat file system**
- d) Standby mode**

Answer: a) Client-server architecture

4. Confidentiality, Security, and Consent

Q144. Which of the following actions best maintains patient confidentiality when using mobile devices?

- a) Using encryption and secure passwords**
- b) Storing devices in public places**
- c) Sharing login details with colleagues**
- d) Disabling security features for ease of access**

Answer: a) Using encryption and secure passwords

5. Internet Search & Web Technologies

Q145. How can health professionals verify the credibility of online medical information?

- a) Check author credentials and website authority**
- b) Trust the first source that appears**
- c) Rely on social media shares alone**
- d) Use only paid advertisements**

Answer: a) Check author credentials and website authority

6. Examples of Social Networks in Health

Q146. Which platform is best suited for professional development and networking in healthcare?

- a) LinkedIn**
- b) TikTok**
- c) Instagram**
- d) Snapchat**

Answer: a) LinkedIn

7. Ensuring Quality & Best Use of Information

Q147. To ensure the accuracy of clinical data, healthcare providers should:

- a) Implement regular data validation and cross-checking**
- b) Depend solely on initial entry data**
- c) Use unverified sources for data verification**
- d) Avoid updating data after initial entry**

Answer: a) Implement regular data validation and cross-checking

8. Healthcare Information System

Q148. Which system is typically used to support medication ordering and administration?

- a) Computerized Physician Order Entry (CPOE) system**
- b) Financial billing system**
- c) Appointment scheduling software**
- d) Document management system**

Answer: a) Computerized Physician Order Entry (CPOE) system

9. EHR, Scanned Records, Paper Records

Q149. Which of the following is an advantage of electronic health records over scanned paper records?

- a) Easier to update and maintain in real-time**
- b) Less secure from hacking**
- c) Increased physical storage needs**
- d) Less ability for multi-user access**

Answer: a) Easier to update and maintain in real-time

10. Nursing Informatics Standards

Q150. The purpose of standards like LOINC in health informatics is to:

- a) Standardize lab and clinical observations for interoperability**
- b) Encrypt all patient data**
- c) Specify hardware requirements**
- d) Assign billing codes only**

Answer: a) Standardize lab and clinical observations for interoperability
