

1. Which of the following is a primary strategy for preventing child abuse?

- A. Offering financial aid to families
- B. Educating parents and caregivers on positive parenting techniques
- C. Removing children from families in all cases
- D. Providing only medical care to children at risk

Answer: B. Educating parents and caregivers on positive parenting techniques

2. What is the first priority when a child presents with signs of abuse at a health facility?

- A. Documenting evidence
- B. Providing immediate medical care
- C. Informing the authorities
- D. Contacting the child's parents

Answer: B. Providing immediate medical care

3. Which of the following is a secondary prevention strategy for child abuse?

- A. Encouraging family bonding through counseling
- B. Public awareness campaigns
- C. Reporting cases of suspected abuse to authorities
- D. Providing medical treatment to abuse victims

Answer: C. Reporting cases of suspected abuse to authorities

4. A multidisciplinary team (MDT) in handling child abuse cases includes:

- A. Only doctors and nurses
- B. Professionals from health, social services, and law enforcement
- C. Only social workers and lawyers
- D. Teachers and community volunteers

Answer: B. Professionals from health, social services, and law enforcement

5. When interviewing an abused child, the healthcare professional should:

- A. Conduct the interview in a quiet, private, and non-threatening environment
- B. Use leading questions to clarify details
- C. Ask the child to confront their abuser
- D. Avoid documenting the child's account

Answer: A. Conduct the interview in a quiet, private, and non-threatening environment

6. Which is NOT a public health approach to preventing child abuse?

- A. Strengthening community support networks
- B. Promoting mandatory education on child safety in schools
- C. Penalizing all family members of an abused child
- D. Advocating for parental leave policies

Answer: C. Penalizing all family members of an abused child

7. The principle of "non-maleficence" in caring for abused children means:

- A. Ensuring the child is treated without further harm
- B. Reporting all suspected cases of abuse
- C. Providing the child with autonomy
- D. Focusing solely on physical injuries

Answer: A. Ensuring the child is treated without further harm

8. Which of the following is a tertiary prevention strategy for child abuse?

- A. Educating parents about positive discipline
- B. Implementing rehabilitation programs for abuse victims
- C. Strengthening legal frameworks against abuse
- D. Conducting community awareness programs

Answer: B. Implementing rehabilitation programs for abuse victims

9. A key responsibility of healthcare workers when managing abused children is to:

- A. Respect confidentiality except when reporting abuse is mandatory
- B. Avoid involvement in legal proceedings

- C. Inform only the child's parents about their findings
- D. Prioritize the family's reputation over the child's safety

Answer: A. Respect confidentiality except when reporting abuse is mandatory

10. What should be documented when handling a case of suspected child abuse?

- A. Opinions about the family's behavior
- B. Detailed, objective observations of injuries and child statements
- C. Speculations about the possible abuser
- D. Only verbal reports from the child

Answer: B. Detailed, objective observations of injuries and child statements

11. Which of the following best supports the prevention of child abuse in the community?

- A. Providing free healthcare to children
- B. Strengthening parental education and support programs
- C. Conducting random home inspections
- D. Penalizing parents without investigation

Answer: B. Strengthening parental education and support programs

12. What is the primary goal of tertiary prevention in child abuse?

- A. Prevent future cases of abuse through education
- B. Rehabilitate and support victims to reduce long-term harm
- C. Remove children from their families permanently
- D. Focus on punishing the abuser

Answer: B. Rehabilitate and support victims to reduce long-term harm

13. When caring for an abused child, health professionals should prioritize:

- A. Collecting evidence against the abuser
- B. Ensuring the child's safety and emotional well-being
- C. Reuniting the child with their family immediately
- D. Avoiding documentation to maintain confidentiality

Answer: B. Ensuring the child's safety and emotional well-being

14. Which approach helps prevent child abuse through public health intervention?

- A. Media campaigns promoting child rights
- B. Isolating at-risk families
- C. Reducing access to healthcare
- D. Limiting parental involvement in education

Answer: A. Media campaigns promoting child rights

15. Mandatory reporting laws are designed to:

- A. Protect healthcare workers from liability
- B. Ensure all suspected abuse cases are reported to authorities
- C. Limit interventions to severe abuse cases
- D. Penalize professionals who suspect but do not act

Answer: B. Ensure all suspected abuse cases are reported to authorities

16. A healthcare provider suspects abuse when a child shows:

- A. Delayed milestones without medical explanation
- B. Frequent visits for minor injuries with inconsistent explanations
- C. Exceptional academic performance
- D. Shyness around strangers

Answer: B. Frequent visits for minor injuries with inconsistent explanations

17. Rehabilitation programs for abused children include:

- A. Medical care only
- B. Therapy, counseling, and support groups
- C. Legal proceedings exclusively
- D. Reintegration with the abuser

Answer: B. Therapy, counseling, and support groups

18. A family-centered approach in preventing child abuse involves:

- A. Blaming parents for their failures

- B. Providing resources and education to strengthen family dynamics
- C. Isolating children from their families
- D. Reporting all families to social services

Answer: B. Providing resources and education to strengthen family dynamics

19. What is the role of schools in preventing child abuse?

- A. Identifying signs of abuse and reporting to authorities
- B. Counseling only the parents
- C. Conducting investigations
- D. Punishing suspected abusers

Answer: A. Identifying signs of abuse and reporting to authorities

20. Which principle ensures that the child's rights are prioritized in all actions?

- A. Justice
- B. Beneficence
- C. Best interest of the child
- D. Non-maleficence

Answer: C. Best interest of the child

21. What is an appropriate action when a healthcare worker suspects child abuse but lacks concrete evidence?

- A. Document observations and report suspicions to child protection services
- B. Wait until more evidence is available
- C. Confront the suspected abuser
- D. Inform only the child's relatives

Answer: A. Document observations and report suspicions to child protection services

22. Early identification of abuse can be facilitated by:

- A. Conducting routine screening for abuse in health facilities
- B. Only responding to reported cases
- C. Waiting for visible signs of trauma
- D. Ignoring mild behavioral changes

Answer: A. Conducting routine screening for abuse in health facilities

23. The role of community-based organizations in child abuse prevention includes:

- A. Legal prosecution of abusers
- B. Providing education, support, and intervention for at-risk families
- C. Monitoring child-parent interactions
- D. Removing children from families

Answer: B. Providing education, support, and intervention for at-risk families

24. Which of the following is a sign that a child may require counseling after abuse?

- A. Excessive crying and withdrawal
- B. High academic achievement
- C. Avoidance of healthcare professionals
- D. Infrequent school absences

Answer: A. Excessive crying and withdrawal

25. Which is a key responsibility of health facilities in handling abused children?

- A. Guaranteeing justice through legal action
- B. Providing comprehensive care and referral services
- C. Reuniting the child with the suspected abuser
- D. Limiting interventions to physical injuries

Answer: B. Providing comprehensive care and referral services

26. Community awareness programs aim to prevent child abuse by:

- A. Stigmatizing abusive families
- B. Educating individuals on recognizing and reporting abuse
- C. Monitoring all families closely
- D. Discouraging interaction between children and caregivers

Answer: B. Educating individuals on recognizing and reporting abuse

27. Why is psychological support crucial for abused children?

- A. To ensure they recover academically
- B. To address trauma and promote emotional healing
- C. To reduce dependency on medical care
- D. To prevent them from disclosing abuse

Answer: B. To address trauma and promote emotional healing

28. Healthcare professionals can help prevent child abuse by:

- A. Identifying and supporting high-risk families early
- B. Avoiding involvement in family issues
- C. Punishing abusive parents directly
- D. Limiting their role to physical examinations

Answer: A. Identifying and supporting high-risk families early

29. The most important ethical principle in handling abused children is:

- A. Confidentiality at all costs
- B. Protecting the child's safety and rights
- C. Prioritizing family unity over everything
- D. Avoiding involvement in legal matters

Answer: B. Protecting the child's safety and rights

30. Key elements of handling abused children in health facilities include:

- A. Early identification, immediate care, documentation, and referral
- B. Legal prosecution of suspected abusers
- C. Confidentiality without mandatory reporting
- D. Only addressing visible injuries

Answer: A. Early identification, immediate care, documentation, and referral
