

NURSING THEORIES QUESTIONS

1. When weighing a client daily, you will most need to weigh the client at which of the following times?
 - a. when most rested
 - b. at the same time each day
 - c. After the shower or bath
 - d. when higher priorities are completed.
2. A theory that has accrued such persuasive empirical support that is accepted as truth
 - a. Law
 - b. Model
 - c. Rule
 - d. Framework
3. A homeostatic body system is constantly in a dynamic process of input, output feedback, and compensation, which leads to a state of balance. " This concept is related to:
 - a. Neuman
 - b. Peplau
 - c. Henderson
 - d. Rogers
4. Self-care deficit theory was proposed by:
 - a. Imogene King
 - b. Virginia Henderson
 - c. Betty Neuman
 - d. Dorothea Orem
5. Roys six-step nursing process induces which of the following?
 - I. assess the behaviours manifested from the four adaptive modes
 - II. assess and categorize the stimuli for those behaviors
 - iii. Set goals to promote adaptation
 - iV. evaluate achievement of adaptive goals
 - a. I and II
 - b. I only
 - c. II and II
 - d. I, II, II and IV
6. Which of the following best describes a concept?
 - I. describes a phenomenon that maybe either empirical or abstract
 - ii. is a label that descibes a phenomenon
 - iii. summarizes ideas, observations, and experiences
 - a. I and II
 - b. I and II
 - c. I, II and iii
 - d. II and II
7. Roy's adaptation model, health is viewed as?
 - a. All conditions, circumstances, and influences surrounding and affecting the development and behavior of persons and groups, with particular consideration of mutuality of person and earth resources
 - b. To promote adaptation for individuals and groups in the four adaptive modes, thus

contributing to health, quality of life, and dying with dignity by assessing behaviour and factors that influence adaptive abilities and to enhance environmental factors

c. An adaptive system with cognator and regulator subsystems acting to maintain adaptation in the four adaptive modes

d. A state and process of being and becoming integrated and whole that reflects person and environment mutuality

8. Which of the following is NOT a concept related to Roy's Adaptation Model?
 - a. Role function :
 - b. Cognator Subsystem
 - c. Flexible line of defense
 - d. Focal Stimuli
9. A group of student nurses knows that starting a petition to lobby the government may lead to policy change. What type of knowing is being utilized in this situation?
 - a. Sociopolitical Knowing
 - b. Emancipatory Knowing
 - c. Empirical Knowing
 - d. Personal Knowing
10. What does the "E" stand for in ADPIE
 - a. Experimentation
 - b. Evaluation
 - c. Environment
 - d. Education
11. Which of the following, in the context of Mishel's uncertainty in illness theory, is defined as biopsychosocial behavior occurring within a person's range of usual behavior?
 - a. illusion
 - b. Self-organization
 - c. Adaptation
 - d. Inference
12. In Virginia Henderson's 1966 definition of nursing, a person/client has which of the following numbers of fundamental needs?
Select one:
 - a. 18
 - b. 7
 - c. 22
 - d. 14
13. The goals of the conservation model are achieved through interventions geared toward following principles?
 - i. conservation of energy
 - ii. conservation of structural integrity
 - iii. conservation of personal integrity
 - iv. conservation of social integrity the follow
 - a. i only
 - b. i and ii
 - c. i, ii, and iv
 - d. i and ii

14. Factor-relating theories are also known as
 - a. Explanatory theory
 - b. Prescriptive theory
 - c. descriptive theory
 - d. Predictive theory
 15. What part of the clinical question format ADPIE is represented by a patients age?
 - a. I
 - b. D
 - c. A
 - d. E
 16. What is a concept common in nursing theory?
 - i. Health ii. Nursing iii. Knowledge iv. Evidence v. Person
 - a. ii and V
 - b. i and ii
 - c. ii, iv and V
 - d. ii and V
 17. Metaphysics is a branch of philosophy which deals with:
 - a. Moral philosophy
 - b. The study of valid argument forms
 - c. The study of the nature of reality
 - d. Theory of knowledge
 18. The process of developing specific predictions from general principles is:
 - a. Deductive reasoning
 - b. Inductive reasoning
 - c. Synectics
 - d. Critical thinking
 19. The following are characteristics of theories EXCEPT
 - a. Creative structuring of ideas
 - b. Tentative in nature *
 - c. Propositions in a theory
 - d. Systematic logical and coherent
 20. Which of the following strategies can most help you as a nurse to enhance your ethical practice and client advocacy?
 - a. reading a book on religions of the world.
 - b. buying a nursing book on ethical decisions.
 - c. talking with peers about their beliefs and values
 - d. examining and carrying your own values.
- . Typology of twenty-one Nursing problems were explained by:
- a. Faye G. Abedallah
 - b. Lydia E Hall
 - c. Imogene King
 - d. Virginia Henderson's

22. Levine's Conservation Model, nursing is

- a. Nursing is human interaction, and goal of nursing is to promote adaptation and maintain wholeness
- b. Health and disease are patterns of adaptive changes
- c. the context in which individuals live their lives and each individual has both internal and external environments
- d. system of systems, and in its wholeness expresses the organization of all the contributing parts

23. According to Rogers' theory "continuous and mutual interaction between man and environment" is termed as.

Select one

- a. Pattern
- b. Resonance
- c. integrality
- d. Helicy

25. What part of a research journal article summarizes the entire article and provides the purpose of the study?

- a. Abstract
- b. Method
- c. Introduction
- d. References

26. The principles of conservation of energy, structural integrity, personal integrity and social integrity were explained by:

- a. Betty Neuman
- b. Hildegard Peplau

c. Myra Estrine Levine

d. Lydia Hall

27. Newman defines the concept of nursing as which of the following?

- a. center of consciousness within an overall pattern of expanding consciousness
- b. seen as a "caring, pattern-recognizing presence" and the nursing process is a process of pattern recognition
- c. an energy field, a universe of open systems, and as an event situation, or phenomena interacting with the person
- d. synthesis that occurs due to the fusion of disease and non-disease that forms health; as a concept is a "pattern of the whole"

28. Health is a word symbol that implies forward movement of personality and other ongoing human processes in the direction of creative, constructive, productive, personal, and community living. This definition of health was given by:

- a. Tidal model of nursing
- b. McGill Model
- c. Levin's conservation principles *
- d. Peplau's theory

29. Which of the following answers shows the correct order of theory from MOST ABSTRACT to MOST CONCRETE

- i. Paradigm ii. Conceptual model iii. Middle-range theory
- iv. Concept V. Practice level theory Vi. Grand theory Vii. Metaparadigm
- a. ii only
- b. vi only
- c. i, ii, iii, v, vi, vii
- d. ii, iii, v, vi, vii

30. Why did the future of nursing rely on the development of nursing theories?

- a. Nursing theories developed medical testing, building facility coordination, and financial assistance programs for patient communities.
- b. Nursing theories positively impacted nursing since they provided decisional guidelines, alternative evaluations for courses of action, and increased nurse competency in dealing directly with patients
- c. The future of nursing relied on nursing theories since they provided patients with home aftercare practices, community care training programs, and district outreach promotions
- d. The future of nursing relied on the development of nursing theories since they provided a path to surgical repetitiveness, medical tool research, and pharmaceutical discovery.

31. Factor-isolating theories are also known as

- a. Prescriptive theory
- b. Predictive theory
- c. Explanatory theory
- d. descriptive theory

32. Theories and models help to stimulate research and the extension of knowledge by providing.

- a. subjectivity
- b. objectivity
- c. data
- d. direction

34. While listening to a client's lung sounds, you hear something that you believe is not normal, and you note that it is a continuous sound. You will chart this as which of the following findings?

- a. pleural friction rub
- b. Rales

c. adventitious sounds

d. crackles

35. "Caring consists of carative factors that result in the satisfaction of certain human needs. This explanation was stated by:

a. Florence Nightingale

b. Sister Calista Roy.

c. Dorothea Orem

d. Jean Watson

15. Watson's carative factors include all the following, EXCEPT:

a. Strengthening flexible lines of defense

b. Cultivating sensitivity to self and others

c. Instilling faith-hope

d. Forming humanistic-altruistic value system

38. King's nurse-patient interactions can be classified into

I. Action II. Reaction III. Disturbance IV. transaction

a. II and III

b. I only

c. I, II, III and IV

d. I and II

39. You highly suspect that your assigned client has abdominal distention. You most need to do and chart which of the following things?

a. Have another nurse verify your suspicions.

b. Measure the abdominal girth at the umbilicus.

c. Measure abdominal girth at the most distended level.

d. Ask the client if they are distended.

40. What is the problem-solving approach to making clinical decisions?

Select one:

a. Critical Thinking

b. Patient Preference

c. Scientific Methodology

d. Evidence-Based Practice

41. The major concepts of Health Belief Model include all, EXCEPT:

a. Perceived severity

b. Perceived Susceptibility

c. Perceived benefits

d. Perceived interaction

42. Patricia Benner describes illness as:

a. manifestation of aberration at the cellular, tissue, or organ level

b. experiences of dysfunction or loss

c. body's response to stress

d. same as disease

43. What part of the clinical question format ADPIE is represented by nurses ordering a low air alternating pressure mattress for a patient with a coccyx Stage 4 pressure ulcer?

a. I

b. P

c. D

d. A

44. Statements accepted as truth, represent the values and beliefs of the theory or conceptual framework are known as

a. Abstraction

b. Concept

c. Phenomenon

d. Assumptions

45. The science of nursing is what type of knowing?

a. Personal

b. Ethical

c. Empirical

d. Emancipatory

47. What is the definition of Florence Nightingale Health?

a. Socially determined by the ability to function in a reasonably manner

b. State and a process of being and becoming integrated and a whole person.

c. Maintaining well-being by using persons powers to the fullest.

d. The positive state of physical, mental and social well-being.

47. Social cognitive theory explains human behavior in terms of. I. behavioral II. environmental III. cognitive influences

a. I and II

b. I, II and III

c. ii and iii

d. i and iii

48. A paradigm refers to

a. Ideas and mental images that help to describe phenomena

b. Propositions

c. A model that explains the linkages of science, philosophy, and the theory accepted and applied by the discipline.

d. Statements that describe concepts

49. Biopsychosocial model was first proposed by

a. Callista Roy

b. Aspect of reality that can be consciously sensed or experienced

c. George Engel

d. Norbert Wiener

50. Which set of concepts is used to direct nursing practices?

a. The four factors of nursing practice are integrity, discipline, respect, and professionalism.

b. Operational, processes, standardization, and interpersonal connections are the four factors of nursing.

c. Factors used to direct nursing practices are life, liberty, and the pursuit of happiness.

d. The four actors considered during nursing practices are person, health, environment, and nursing.

51. Meaning, Rhythmicity, and Cotranscendence are the three major concepts of:

- a. Transcultural Nursing Theory
- b. Self-care Deficit Theory
- c. Unitary Human Being Theory
- d. Human Becoming Theory

52. Who explained about “Care, Cure and Core as three independent but interconnected circles of the nursing model”?

- a. Jean Watson
- b. Lydia Hall
- c. Patricia Benner
- d. Rosemary Rizzo Parse

53. According to Roy’s adaptation theory, which subsystem responds through four cognitive responds through four cognitive-emotive channels (perceptual and information processing, learning, judgment, and emotion)?

- a. Cognator Subsystem
- b. Physiologic Mode
- c. Self-Concept-Group Identity Mode
- d. Regulator Subsystem

54. Statements that explain the relationship between the concepts in a theory:

- a. Predictions
- b. Propositions
- c. Assumptions
- d. Process

55. Whiles Models are verbat, visual, or mathematical representations theories are

- a. Theories are formal.
- b. Theories are phenomenal
- c. Theories are literal.
- d. Theories are conceptual.

56. According to Roy's adapation theory, which subsystem responds through four cognitive responds through four cognitive-emotive channels (perceptual and information

Processing, learning, judgment, and emotion)?

- a. Cognator Subsystem
- b. Physiologic Mode
- c. Self-Concept-Group Identity Mode
- d. Regulator Subsystem

57. Statements that explain the relationship between the concepts in a theory.

- a. Predictions

b. Propositions

c. Assumptions

d. Process

58. Whiles Models are verba, visua, or mathematical representations theories are

a. Theories are formal.,

b. Theories are phenomenal.

c. Theories are literal.

d. Theories are conceptual

59. Which is NOT a concept explained in Dorothy Johnson's Behavioural Systems Model?

a. Achievement

b. Energy fields

c. Affiliation

d. Dependency

60. When a client's skin is dry, which of the following nursing interventions would be most helpful?

a. Bathing daily with mineral oil added to the water. X

b. Limit bathing to once or twice a week.

c. Bathing is. Daily. But no soap is used.

d. Bathing with lotion instead of water.

61. One key difference between the medical model and the nursing model is between

- a. Physiology and biopsychosocial
- b. Assessment and treatment
- c. Anatomy and biopsychosocial
- d. Biology and biopsychosocial

62. Nightingale's philosophy includes the four metaparadigm concepts of nursing but the focus is primarily on ?

- a. Health
- b. Nursing
- c. Person
- d. Environment

63. According to Neuman Systems Model, the increase in energy that occurs in relation to the degree of reaction to the stressor is termed as:

- a. Lines of resistance
- b. Secondary Prevention
- c. Reconstitution
- d. Primary prevention

64. "What is the nature of reality? This question is pertaining to which branch of philosophy?

- a. Axiology
- b. Methodology
- c. Epistemology
- d. Ontology

65. Neuman Systems Model, the concept of environment is

- a. all internal and external factors or influences surrounding the client system
- b. optimal system stability
- c. prevention as intervention; concerned with all potential stressors
- d. composite of physiological psychological, sociocultural, developmental, and spiritual variables in interaction with the internal and external environment; represented by a central structure, lines of defense, and lines of resistance

66. What is the definition of nursing theory?

- a. The ten steps to personal purity and success create the nursing theory.
- b. Nursing theory is the guidelines nurses follow to improve interactions with doctors and administration.
- c. Nursing theory is the practice of structuring ideas that include entire interaction and thoughtfulness toward a patient's needs.
- d. Nursing theory is the fundamental building block to community outreach and facility upkeep

67. The sequential phases of interpersonal relationship in Peplau's theory includes all, EXCEPT

- a. Exploitation
- b. Restoration
- c. identifications
- d. Orientation

68. Which level of needs in Maslows hierarchy includes love, friendship, intimacy, and family?

- a. Self-actualization
- b. Safety
- c. Belongingness
- d. Esteem

69. Leininger, the concept of health can be viewed as

- a. human being, family, group, community, or institution
- b. a state of well-being that is culturally defined, valued, and practiced
- c. the totality of an event, situation, or experience that gives meaning to human expressions, interpretations, and social interactions in physical, ecological, sociopolitical,

And/or cultural settings

- d. Activities directed toward assisting, supporting, or enabling with needs in ways that are congruent with the cultural values, beliefs, and lifeways of the recipient of care

70. Johnson's Behavioral System Model, the concept of person is

- a. includes internal and external environment
- b. efficient and effective functioning of system; behavioral system balance and stability
- c. a caring relationship that includes the care and study of the lived experience of health, illness, and disease
- d. a biopsychosocial being who is a behavioral system with seven subsystems of behaviour.

71. Which theory defines nursing as the science and practice that expands adaptive abilities and enhances person and environment transformation?

- a. Goal attainment theory
- b. Faye Glen Abdelah's theory
- c. Roy's adaptation model
- d. Henderson's definition of nursing

72. Watson's definition of the concept of person included

- a. Novice- Competent- Proficient- Expert
- b. unity of mind-body-spirit-nature
- c. Healthy person
- d. harmony, wholeness, and comfort

73. According to the nursing code of ethics, when working as a nurse and a conflict comes up between your client's needs

And what the family and/or the physician wants, and/or the

Hospital policies, your t loyalty is to the:

- a. client
- b. hospital.
- c. a family
- d. physician.

74. Watson's theory, the person is viewed holistically as a unity of the following but NOT?

- A, Soul
- b. Nature
- c. Mind,
- d. Body,

75. The metaparadigm concepts for the discipline of nursing include the following EXCEPT?

- a. Paradigms
- b environment
- D chealth
- d. health

76. The term which refers the "irreducible, pan dimensional energy field identified by

Pattern and integral with the human field” is:

- a. Health
- b. Unitay Human Being
- c. Nursing
- d. Environment

77. An idea, thought, or notion conceived in the mind.

- a. Concept
- b. Principle
- c. Phenomenon
- d. Theory

78. When examining the client’s abdomen, the nurse will most facilitate the examination by positioning the client in which of the following ways?

A supine with arms extended and hands behind head.

- b. semi-Fowler’s position with knees extended,
- c. supine with smal pilows beneath knees and head
- d. sitting in the chair with legs elevated.

79. Which is NOT a concept related to Faye Abdellah’s theory?

- a. Therapeutic Self-care Demands
- b. Restorative Care Needs
- c. The twenty-one Nursing Problems

d. Susternal Care Needs

80. Transcultural Model of Nursing was proposed by

a. Rosemarie Rizzo Parse

b. Joyce Travelbee

c. Ida Jean Orlando

d. Madeleine Leininger

81 Henderson's basic needs upon which nursing care is based include the following EXCEPT

a. sleep and rest.

b. eating healthy diet

c. eliminate bodily wastes

d. breathe normally.

82. Environmental factors that are likely to be the focus of manipulation by the nurse include which of the following?

I noise, II. Tight, iii. Ventilation

a. I and II

b. I II and iii, v

c. II and i

d. and II

84. A graphic, mathematical, or verbal description of a theory that captures the central components of the theory is referred to as

- a. A Concept
- b. A model
- c. A phenomenon
- d. A theory

85. Which of the following statements is related to Florence Nightingale?

- a. Nursing is a therapeutic interpersonal process.
- b. The role of nursing is to facilitate “the body’s reparative processes” by manipulating client’s environment
- c. Nursing are becomes necessary when the client is unable to fulfil biological, psychological, developmental, or social needs.
- d. Nursing is the science and practice that expands adaptive abilities and enhances person and environment transform ation

86. Theoretical works are categorized as the following but NOT?

- a. Philosophies
- b. middle-range theories
- c. concepts
- d. conceptual models
