

1. Which of the following is a common characteristic of organic farming?
 - a. Use of genetically modified organisms (GMOs)
 - b. Use of natural fertilizers such as compost
 - c. Use of synthetic pesticides
 - d. Use of synthetic herbicides
2. How does drinking water aid in weight management?
 - a. It increases fat storage
 - b. It slows down metabolism
 - c. It helps control hunger and calorie intake
 - d. It increases appetite
3. What is the main function of antioxidants in the body?
 - a. Strengthen bones
 - b. Protect cells from damage
 - c. Increase energy levels
 - d. Promote weight loss
4. How does gender affect metabolic rate?
 - a. Women generally have a higher metabolic rate than men
 - b. Men generally have a higher metabolic rate than women
 - c. Both men and women have the same metabolic rate
 - d. Gender does not affect metabolic rate
5. Which of the following is the main function of carbohydrates in the body?
 - a. Build muscle
 - b. Regulate body temperature
 - c. Provide energy
 - d. Store vitamins
6. Which type of fat is considered the healthiest for heart health?
 - a. Saturated fats
 - b. Monounsaturated fats
 - c. Trans fats
 - d. Polyunsaturated fats
7. Which vitamin is primarily obtained through sunlight exposure?
 - a. Vitamin A
 - b. Vitamin D
 - c. Vitamin B12
 - d. Vitamin C
8. How does temperature affect metabolic rate?
 - a. Temperature has no effect on metabolism
 - b. Both cold and warm environments decrease metabolic rate
 - c. Cold environments increase metabolic rate
 - d. Warm environments decrease metabolic rate
9. What is the primary benefit of meal planning in weight management?
 - a. It increases hunger
 - b. It allows for more frequent snacking
 - c. It helps control portion sizes and calorie intake
 - d. It reduces the need for exercise
10. Which organ is primarily responsible for regulating metabolism?
 - a. Heart
 - b. Lungs
 - c. Liver
 - d. Kidneys

11. Which of the following is true about the nutritional content of organic foods compared to inorganic foods?

- ☐ a. Inorganic foods are always less nutritious
- ☒ b. The nutritional content can vary and is not always higher in organic foods
- ☐ c. Organic foods are always richer in vitamins
- ☐ d. Organic foods are always lower in calories

12. What is the best approach to long-term weight management?

- ☐ a. Extreme calorie restriction
- ☐ b. Fad diets
- ☒ c. Balanced diet and regular exercise
- ☐ d. Skipping meals

13. What should you do if you suspect a food item has been contaminated?

- ☐ a. Freeze it to kill any bacteria
- ☒ b. Discard it immediately
- ☐ c. Taste it to check if it's still good
- ☐ d. Cook it at a higher temperature

14. Which type of diet is most likely to decrease metabolic rate over time?

- a. High-protein diet
- ☒ b. Low-calorie diet
- c. High-fiber diet
- d. Balanced diet

15. How does age affect metabolism?

- ☐ a. Metabolism increases with age
- ☐ b. Metabolism fluctuates randomly with age
- ☒ c. Metabolism decreases with age
- ☐ d. Metabolism remains constant with age

16. Which of the following is a healthy rate of weight loss per week?

- a. 6 to 7 pounds
- b. 2 to 3 pounds
- c. 4 to 5 pounds
- ☒ d. 0.5 to 1 pound

17. What impact does a low-calorie diet have on metabolism?

- a) Depends on the type of calories
- ☒ b) Decreases metabolism
- c) Increases metabolism
- d) Has no effect on metabolism

18. Which of the following types of exercise is most effective for weight management?

- a. Strength training
- ☒ b. Cardio exercises
- c. Flexibility exercises
- d. All of the above

19. What is the effect of thyroid disorders on metabolism?

- a) Thyroid disorders do not affect metabolism
- b) Hypothyroidism increases metabolism
- ☒ c) Hyperthyroidism increases metabolism
- d) Hyperthyroidism decreases metabolism

20. Which mineral is important for maintaining healthy bones and teeth?
- Potassium
 - Calcium
 - Iron
 - Magnesium
21. Why is it important to wash fruits and vegetables before consuming them?
- To remove dirt and pesticide residues
 - To soften their texture
 - To enhance their flavor
 - To increase their shelf life
22. Which of the following factors has the most significant influence on an individual's basal metabolic rate (BMR)?
- Diet
 - Muscle mass
 - Age
 - Gender
23. Which vitamin is necessary for the absorption of calcium in the body?
- Vitamin D
 - Vitamin A
 - Vitamin C
 - Vitamin B12
24. Which of the following is a key principle of food hygiene?
- Cross-contaminating food items
 - Cooking food at a low temperature
 - Washing hands before handling food
 - Using the same cutting board for all foods
25. Which of the following foods is known to temporarily boost metabolism?
- Processed foods
 - Sugary snacks
 - Spicy foods
 - High-fiber vegetables
26. What is a common misconception about organic foods?
- They are always healthier
 - They are more environmentally friendly
 - They support sustainable farming practices
 - They are grown without synthetic pesticides
27. Which mineral is essential for oxygen transport in the blood?
- Zinc
 - Calcium
 - Potassium
 - Iron
28. What is metabolism?
- The process of nerve transmission
 - The process of breaking down food into energy
 - The process of muscle contraction
 - The process of cell division

29. What does the term "organic" refer to in the context of food?
- Food that contains added preservatives
 - Food that is genetically modified
 - Food that is high in protein
 - Food grown without synthetic pesticides and fertilizers
30. Which of the following factors can increase your metabolic rate?
- Sedentary lifestyle
 - Age
 - Muscle mass
 - Low-calorie diet
31. What role do enzymes play in metabolism?
- They speed up chemical reactions
 - They store energy
 - They act as structural components
 - They transport oxygen
32. Which of the following is typically prohibited in organic food production?
- Use of animal manure
 - Synthetic pesticides
 - Crop rotation
 - Natural pest control methods
33. In organic farming, what is often used to manage pests instead of synthetic pesticides?
- Chemical sprays
 - biological pest control
 - Genetically modified organisms
 - Antibiotics
34. Which of the following foods is a good source of vitamin C?
- Bread
 - Cheese
 - Chicken
 - Oranges
35. Which of the following conditions can result from a slowed metabolism?
- Increased energy levels
 - Dehydration
 - Hyperthyroidism
 - Weight gain
36. What is one potential benefit of consuming organic foods?
- Higher levels of synthetic nutrients
 - Reduced intake of pesticide residues
 - Increased exposure to synthetic chemicals
 - longer shelf life
37. Which process involves the breakdown of glucose to produce energy?
- Transcription
 - Photosynthesis
 - Replication
 - Glycolysis

38. How does stress affect weight management?
- a. It can lead to overeating and weight gain
 - b. It has no impact on weight
 - c. It boosts metabolism
 - d. It always causes weight loss
39. Which of the following is a common reason consumers choose organic foods?
- a. Lower cost
 - b. Preference for genetically modified organisms (GMOs)
 - c. Environmental sustainability
 - d. longer shelf life
40. Which of the following hormones plays a key role in regulating metabolism?
- a. Thyroxine (T4)
 - b. Adrenaline
 - c. Melatonin
 - d. Insulin
41. What effect does stress have on metabolism?
- a. Increases metabolism
 - b. Has no effect on metabolism
 - c. Stress only affects metabolism during sleep
 - d. Slows down metabolism
42. Which of the following is a challenge associated with organic farming?
- a. Increased use of synthetic chemicals
 - b. Lower crop yields
 - c. Reduced biodiversity
 - d. Increased soil degradation
43. Which of the following statements is true about organic milk?
- a. It is produced by cows fed organic feed
 - b. It contains antibiotics
 - c. It has a higher fat content than conventional milk
 - d. It comes from cows treated with synthetic hormones
44. At what temperature should perishable foods be stored to prevent bacterial growth?
- a. Below 32°F (0°C).
 - b. Below 40°F (4°C).
 - c. Above 70°F (21°C).
 - d. Between 50°F and 60°F (10°C and 15°C).
45. What is the primary source of energy for cellular metabolism?
- a. Fat
 - b. Vitamins
 - c. Protein
 - d. Carbohydrates
46. Which of the following is a source of complete protein?
- a. Fish
 - b. Rice
 - c. Wheat
 - d. Beans

47. Which of the following processes is catabolic?

- a. Fat storage
- b. Protein synthesis
- c. Glycogen breakdown
- d. DNA synthesis

48. Which of the following can slow down your metabolism?

- a. High protein intake
- b. Dehydration
- c. Regular exercise
- d. Cold temperature

49. Which of the following ingredients is more likely to be found in inorganic processed foods?

- a. Synthetic preservatives
- b. Natural flavors
- c. Organic sugar
- d. Sea salt

50. Why is it important to use separate cutting boards for raw meat and vegetables?

- a. To avoid cross-contamination
- b. To make cleaning easier
- c. To keep knives sharp
- d. To save time

51. Which type of food production is more likely to involve the use of genetically modified organisms (GMOs)?

- a. Inorganic farming
- b. Both organic and inorganic farming
- c. Neither, as GMOs are banned in all food production
- d. Organic farming

52. Which of the following practices can help prevent food poisoning?

- a. Using a dish towel to dry dishes and wipe counters
- b. Cooking meat, poultry, and seafood to safe temperatures
- c. Storing leftovers at room temperature
- d. Thawing frozen food on the kitchen counter

53. Which nutrient is essential for the growth and repair of body tissues?

- a. Vitamins
- b. Carbohydrates
- c. Proteins
- d. Fats

54. Which of the following is a benefit of regular physical activity for weight management?

- a. Causes dehydration
- b. Increases appetite
- c. Helps maintain weight loss
- d. Decreases muscle mass

55. How can sleep affect weight management?

- a. Sleep only affects weight in children
- b. More sleep always leads to weight gain
- c. Lack of sleep can contribute to weight gain
- d. Sleep has no effect on weight

56. What is the key difference between organic and inorganic (conventional) foods?
- Inorganic foods are always less safe
 - Organic foods are always more expensive
 - Organic foods are always more nutritious
 - Organic foods are produced without synthetic inputs
57. Which macronutrient is most important for maintaining muscle mass during weight loss?
- Carbohydrates
 - Vitamins
 - Fats
 - Proteins
58. Which of the following best describes the relationship between metabolism and muscle mass?
- Muscle mass does not affect metabolism
 - Less muscle mass increases metabolic rate
 - More muscle mass increases metabolic rate
 - More muscle mass decreases metabolic rate
59. Which of the following is a benefit of organic farming practices for the environment?
- Increased greenhouse gas emissions
 - Greater use of synthetic chemicals
 - Increased water pollution
 - Reduced soil erosion
60. What is the metabolic pathway that synthesizes glucose from non-carbohydrate sources?
- Lipogenesis
 - Gluconeogenesis
 - Beta-oxidation
 - Glycolysis
61. Which of the following is a micronutrient?
- Carbohydrates
 - Vitamins
 - Protein
 - Fats
62. Which of the following is an effective way to monitor weight management progress?
- Ignoring portion sizes
 - Drinking more sugary drinks
 - Regularly weighing yourself
 - Skipping meals
63. Which vitamin is necessary for the absorption of calcium in the body?
- Vitamin B12
 - Vitamin A
 - Vitamin D
 - Vitamin C
64. Which of the following is the main function of carbohydrates in the body?
- Provide energy
 - Regulate body temperature
 - Build muscle
 - Store vitamins

65. What role does fiber play in weight management?
- a. It helps you feel full and satisfied, reducing overeating
 - b. It adds calories to your diet
 - c. It increases fat absorption
 - d. It slows down metabolism
66. Which of the following is the safest method to thaw frozen food?
- a. On the kitchen counter
 - b. In warm water
 - c. In the refrigerator
 - d. In direct sunlight
67. Which of the following is an essential fatty acid?
- a. Both a and b
 - b. Omega-3
 - c. None of the above
 - d. Omega-6
68. What is one reason why organic foods tend to be more expensive than inorganic foods?
- a. Higher costs of organic farming practices
 - b. Higher marketing costs
 - c. longer shelf life
 - d. Government subsidies
69. Which of the following is an example of cross-contamination?
- a. Cooking meat to the proper internal temperature
 - b. Using the same knife to cut raw chicken and vegetables
 - c. Storing raw meat separately from cooked food
 - d. Washing fruits and vegetables before eating
70. Which certification label indicates that a food product is organic in the United States?
- a. GMO-Free
 - b. FDA Certified
 - c. Fair Trade Certified
 - d. USDA Organic
71. What effect does regular physical exercise have on metabolism?
- a. does not affect metabolism
 - b. Only affects metabolism during the exercise
 - c. Decreases metabolic rate
 - d. Increases metabolic rate
72. Which of the following is an unhealthy weight management practice?
- a. Drinking water before meals
 - b. Eating small, frequent meals
 - c. Regular exercise
 - d. Crash dieting
73. How does hydration affect metabolic processes?
- a. Dehydration increases metabolism
 - b. Proper hydration optimizes metabolism
 - c. Proper hydration slows down metabolism
 - d. Hydration does not affect metabolism

74. Which nutrient is primarily responsible for the regulation of body fluids?
- a. Proteins
 - b. Electrolytes
 - c. Fats
 - d. Carbohydrates
75. What is basal metabolic rate (BMR)?
- a. The number of calories burned during exercise
 - b. The rate of protein synthesis in the body
 - c. The total amount of energy consumed in a day
 - d. The rate at which the body uses energy while at rest
76. Which of the following practices is associated with conventional (inorganic) farming?
- a. Use of natural pesticides
 - b. Use of synthetic fertilizers
 - c. Use of compost
 - d. Use of crop rotation
77. Which of the following behaviors can lead to weight gain?
- a. Regular physical activity
 - b. Eating a balanced diet
 - c. Consuming high-calorie snacks frequently
 - d. Drinking plenty of water
78. Which organelle is known as the "powerhouse" of the cell due to its role in energy production?
- a. Endoplasmic reticulum
 - b. Nucleus
 - c. Mitochondrion
 - d. Ribosome
79. What is the primary role of dietary fibre?
- a. Improve vision
 - b. Provide energy
 - c. Build muscle
 - d. Help with digestion and prevent constipation
80. How does body composition affect metabolism?
- a. More muscle mass increases metabolic rate
 - b. Muscle mass decreases metabolic rate
 - c. More fat mass increases metabolic rate
 - d. Fat and muscle mass do not affect metabolism
