D) Only appreciate first names

152. Which one of these type of Alcohol is distinctively used for rubbing and sterilization?

A) Ethanol

B) Methanol

C) Glycerin

D) Isopropyl

153. Alcohol is a chemical compound and also food as it exerts impact on the mood, cognition, and behavior and has...

A) high calories

B) Empty calories

C) low calories

D) Complete calories

154. What is significantly obvious and different about the palm of the mentally retarded?

A) It has well-arranged and inter joined palmer creases

B) It has joined palmer creases

C) Typically has no palmer creases

D) Has one deep crease or no palmer creases

155. The syndrome fragile X is the second most common cause of which of condition?

A) Dementia

B) Epilepsy

C) delirium

D) Mental retardation

156. Which is not a genetic condition under Mental retardation?

A) TaySach's disease

B) Turner's syndrome

C) Phenylketonuria

D) Galactosaemia

157. Klinefelters syndrome is identified by which set of chromosome

- A) Xo
- B) X
- C) XY
- D) XXY**

158. The long term prevention for Epilepsy is one of the following

- A) Medication (Anticonvulsants)
- B) Surgery (Temporal Lobectomy)
- C) Psychotherapy (Talking cure)**
- D) Precautionary measures (Do's and Don'ts)

159. Confabulation is a common feature in dementia, Korsakoff psychosis and....

- A) Delirium
- B) Neurosyphilis
- C) Chronic Alcoholism**
- D) Epilepsy

160. Lilliputian hallucinosis is an accompanying feature found in which alcoholic state?

- A) Alcoholism
- B) Delirium Tremens
- C) Korsakoff syndrome
- D) Alcoholic hallucinosis**

161. The word "STIGMATA" under mental retardation refers to

- A) level of intelligence Quotient(IQ)
- B) Developmental milestone
- C) Level of retardation
- D) physical developmental deformities**

162. Dependent retarded is synonymous with which corresponding level of retardation?

- A) Mild
- B) Moderate
- C) Severe**
- D) Profound

163. Which of these drugs used in the medical management of Parkinson's disease "stops further destruction of dopamine"

- A) Aricept
- B) Bromocriptine
- C) Selegiline**
- D) Levodopa

164. The naturally occurring Parkinson's disease is termed

- A) Neuroleptic induced Parkinsonism
- B) Wilson's disease
- C) Shy-Drager's syndrome

D) Clinical Idiopathic Parkinsonism

165. AL-Anon is a special support group for which individuals related to Alcoholics or those with drinking problems.....

A) Adults family members only

B) Families and friends

C) Adolescence and young adults

D) Adolescence and family members

166. Alcoholic Anonymous is a support group for alcoholics and the leader

A) Psychiatrist

B) Neurologist

C) Psychologist

D) An Alcoholic

167. In Alcoholic Anonymous the first names of members are used in order

A) hide their identity

B) Maintain integrity

C) Alcoholic status

D) Group affiliation

168. Cognitive enhancing medication among other medication given to treat Dementia are used to do these EXCEPT

A) Lower blood pressure

B) Boost cognitive symptoms

C) balance mood

D) improve coordination

169. A grand mal seizure of the generalized onset type of epilepsy may terminat.....

A) Coma

B) Serial epilepsy

C) Status epilepticus

D) Automatism

170. It is advocated that in the treatment of delirium and dementia, caution and discretion be applied hence medication should be given in.

A) High dose and increased gradually

B) low doses and gradually decreased

C) Low doses often

D) high doses and alternate with low doses

171. The nurse administering medication in the management of Dementia must consider all these EXCEPT.....

A) Weight

B) Activity level

C) Nutritional status

D) Swallowing reflexes

172. Pharmacology use in dementia should be given with caution because. less complete in the elderly.

A) pharmacokinetics is slower

B) Pharmacokinetics is faster

C) Pharmacokinetics is poorly excreted)Pharmacokinetics is poorly distributed

173. A focal impaired aware or awareness can also terminate in

A) Grand mal seizure

B) Automatism

C) Focal motor

D) Focal bilateral seizure

174. This is not a subtype of generalized on-set seizure..

A) Serial epilepsy

B) Myoclonic seizure

C) Atonic seizure

D) Absence seizure

175. Atonic seizure is also referred to as

A) Hand drop

B) Neck flexion

C) Drop attack

D) Flapping tremor

176. The sleep wake cycle in delirium is observed as always.

A) Fragmentary but refreshing

B) Sound and undisturbed

C) Disturbed

D) Refreshing

177. Amnesic syndrome under Cognitive impairment disorders is defined by loss of

A) Recent memory

B) Remote Memory

C) Both recent and remote memory

D) Immediate memory

178. Restlessness and Nocturnal wandering is one of the prominent features of

A) Parkinson's diseases

B) Dementia

C) Epilepsy

D) Mental retardation

179. Cognitive impairment disorders are categorized or classified according to the

A) Signs and Symptoms

B) Etiology

C) Treatment

D) Prognosis

180. Sun downing syndrome as a feature in delirium means..

- A) Patient's signs and symptoms feel better at sun down
- B) Patient feels optimistic about condition and recovery at sundown
- C) Patient's signs and symptoms feel worse or severe at sundown**
- D) Patient feels weak and sleepy at sundown

181. According to Sigmund Freud, stored information that can easily be recalled is found at the.

- A. conscious mind
- B. preconscious mind.**
- C. unconscious mind.
- D. continues mind.

182. The part of personality that is made up of unconscious drives and impulses is known as the

- A. Ego.
- B. Id.**
- C. Superego.
- D. Super Id.

183. The EGO operates on ... principle.

- A. moral
- B. pleasure
- C. reality**
- D. Social

184. The stage of psychosexual development where sexual drives are directed at the parent of the opposite sex isstage.

- A. anal
- B. latent
- C. phallic**
- D. Genital

185. Individuals with paranoid personality disorder have as a key symptom or feature

- A. emotional coldness
- B. isolation
- C. magical thinking
- D. Suspiciousness**

186. Miss Portable, a teacher from Damongo is noted for persistently exhibiting emotional aloofness and appears to be indifferent to either praise or criticism. She is likely to be having Personality disorder.

- A. paranoid
- B. borderline
- C. histrionic
- D. schizoid**

187. Mr. Tankpa is suffering from hypertension and preparing to seek treatment, but he is scared of the side effects that may accompany the treatment. This conflict Mr. Tankpa is going through is....conflict

- A. avoid - avoid
- B. avoid - approach**
- C. approach - approach
- D. multiple avoid - approach

188. Mr. John, a 'galamsayer' is diagnosed of suffering from alcoholic hepatitis and advised to stay away from alcohol. He was heard saying there must be a mistake somewhere because he doesn't believe the alcohol he takes can damage his liver. Mr. John is applying the defence mechanism of....

- A. denial**
- B. undoing
